A. K. Shukla

Regional Officer (WRO), AICTE
Mumbai

S. K. Mahajan

DTE, Maharashtra

Viral Thakkar

Alumni (AICAR -1st Batch)

AICAR Business School

– A Temple of Learning & Research

AICAR Business School was set up in 2002 by AICAR Trust with the aim of developing world class leaders and communicators, capable of providing leadership through its unique pedagogy, in all spheres of commerce and service in any part of the world. A picturesque campus spread over 33 acres of landscaped green and undulating grassy mounds, between Matheran Hills and Ulhas River provides an excellent academic environment with facilities such as gymnasium, swimming pool, indoor & outdoor sports, that blend modern management teachings with gurukul environment.

AICAR Business School offers the following AICTE approved 2-year full-time residential programmes:

- a. Post Graduate Diploma in Management (PGDM) with specializations in Finance, Marketing, Communication and HR.
- b. Post Graduate Diploma in Banking, Insurance and Finance Management (PGDM-BIF).

These programmes are designed to meet the needs of a broad band of industries. The Institute also provides advanced Training & Development of Practising Managers in various disciplines. It has also set up the 'AICAR-Bhukhanvala Center for Entrepreneurship Development' to provide and enhance entrepreneurial skills of budding entrepreneurs. Its campus is equipped with air-conditioned classrooms, library and reading room, computer laboratory, Wi-Fi facility, 24x7 internet connectivity, hostel for more than 200 students, spacious cafeteria and power backup system.

Through its unique teaching pedagogy

of '**Learning-By-Doing**' (LBD), AICAR prepares students to be uniquely positioned in industry by mastering skills of execution through problem solving and team performance approach. Intense mentoring by faculty and industry experts, coupled with exposure to 'live' projects and organized collaborative learning of management elements ensures wholesome development of the students.

APTECH and AICAR have formed a strategic alliance with a vision to develop AICAR into a Global Education Hub. Aptech Ltd. – a Global Learning Solutions Provider operates in more than 35 countries through 1000+ Centers and is listed at BSE & NSE. In its history of more than two decades, Aptech has developed capability and capacity for world-class content development, testing and certification, education and training in IT and non-IT areas. As a strategic partner and resource provider, Aptech supports AICAR in its journey by creating world class education practices, forging industry interfaces/alliances, developing world-class Course material/content and expanding current scope of education, whilst also supporting student placements.

AICAR's '**Learning-By-Doing**' pedagogy combines classroom sessions with home assignments, case studies and presentations, individual and group projects, business games and exposure to 'live' projects and industry experts. The LBD factor helps build analytical abilities, presentation skills, interpersonal skills through team-work, whilst helping students to effectively grasp practical aspects of management fundamentals.

Reinforcing the LBD process is a project now underway for Eureka Forbes (Eureka- AICAR Innovation Lab) to determine the future aspirations and desires of the rural population. The study seeks to establish an understanding and appreciation of the likely demand for household durables amongst villagers. Another study now being done for Basil Life Care provides excellent opportunities for our students to acquire virtual experience and valuable knowledge in building their thinking capabilities.

Organized collaborative learning of **Social, Legal, Economic, Political** and **Technology (SLEPT)** elements help students acquire deeper understanding of business/management issues. We also endeavour to provide opportunity to students to work on rural and community-based social projects in order to get exposure to rural behaviour and opportunities.

Teaching material as used by individual faculty during their sessions, is made available for continuous reference, on-time, through our unique Learner's Management Systems. We also encourage students to question concepts, theories and practices in order to gain practical insight.

Holistic development of students is ensured through continuous mentoring and developmental/grooming sessions. Each faculty acts as a mentor and guardian for a group of students and coaches them continuously on various issues. Sessions conducted under holistic development include Experiential Learning, Self-introspection, Confidence Building, Meditation and Awakening of inner-Intelligence.
