2.	As	per	schedule	P	of	Drugs	and	Cosmetics
	Act,	the	Diphth	eria	toxoid	has	expiry	period
	of:							
	1. 6 mon		2. 12 r					
	3. 2 years		4. 5 y∈					
8.	•	henicol co	mes under s	chedule :				
	1. G		2. H					
	3. W		4. P					
	-	of Narcotic	•					
	1. Coca		2. Opi	um				
	3. Charas		4. Dox	•				
•	•	l its prepar	ation belong	s to sche	dule :			
	1. P		2. Q					
	3. C ₁		4. L					
	Schedule	X drug is :						
	1. Amphe	tamine	2. Cyc	lobarbital				
	3. Glutet	himide	4. All o	of the abo	ve			
	Drug Insp	ector is ap	pointed und	er section):			
	1. 19		2. 42					
	3. 21		4. 30					
	Schedule	M	and	Υ	were	introduced	in	Drugs
	and Cosm	netics Act in	n :					
	1. 1976		2. 1982	<u>)</u>				
	3. 1988		4. 1980)				
٠.	Example (of Schedul	e G drug is :					
	1. Tetracy	cline	2. Amp	icillin				
	3. Ibuprof	en	4. Tolb	utamide				
0.	Example (of Schedul	e X drug is :					
	1. Diazepa	am	2. Eme	tine				
	3. Quinidi	ne	4. Cipro	ofloxacin				
1.	Opium	ha	ıs	been	under	legisl	ative	control
	since:							
	1. 1820		2. 1857	'				

22.	β-blockers with :	are	С	ontraindicated		in	patients
	1. Supraventricular tac	hyca	rdia				
	2. Hyperthyroidism						
	3. Coroqary artery dise	ase					
	4. Jacksonian seizure						
23.	Which of the following	is di	rectly acting sy	mpathomimetic	agent?		
	1. Ephedrine	2.	Amphetamine	9			
	3. Dopamine	4.	Thiopental so	dium			
24.	Streptomycin is more e	ffect	ive at :				
	1. Acidic pH	2.	Alkaline pH				
	3. Neutral pH	4.	any pH				
25.	The most common drug	g cau	ising anaphyla:	(is is :			
	1. Streptomycin	2.	Indomethacin				
	3. Penicillin	4.	Doxycycline				
26.	The most common side	effe	ct of verapmni	il is :			
	1. Bradycardia	2.	Psoriasis				
	3. Cardiac arrhythmia.	4.	Constipation				
27.	The anthelmintic drug	actin	g by producing	flaccid paralysis	of the wor	m is :	
	1. Stibophen	2.	Diethyl carbar	mazine			
	3. Piperazine	4.	Mebendazole				
28.	Drug resistance is comm	monl	y produced by	:			
	1. Ethambutol	2.	Rifampicin				
	3. Pyrazinamide	4.	INH				
29.	Propranolol with:	is	C	ontraindicated		in	patients
	Angina pectoris	2.	Supraventricu	lar		arrh	ythmia
	3. Hypertension		Glaucoma				
30.	The most		serious	side	effect	of	phenyl
	butazone is :						1 3
	1. Headache	2.	Epigastric dist	ress			
	3. Agranulocytosis	4.	Blurred				
31.	Drug[that		often	cause	tach	ycardia	when
	given in low dose is :						
	1. Propranolol	2.	Verapamil				
	3. Nitroglycerin	4.	Chloroquine				
32.	Calcium channel blocke	er wi	th predominan	t peripheral acti	on is :		
	1. Nicardepine	2.	Lidoflazine				
	3. Nifedepine	4.	Diltiazem				

33. The that following antihypertensive drugs tend to elevate plasma triglycerides are: 1. ACE inhibitors 2. Calcium channel blockers 3. α -Adrenolytic receptor blocker 4. Thiazide diuretics 34. Angiotensin II blocker is: 1. Histamine 2. Saralasin 3. Diltiazem 4. Trimethaphan 35. Which one of the following is not a pharmacological effect of morphine? 1. Constriction of the pupil 2. C.N.S. depression 4. Respiratory failure 3. Diarrhoea 36. The antiarrhythmic drug quinidine is: 1. (+) stereoisomer of quinine 2. (-) stereoisomer of quinine 3. (+) Racemic mixture of quinine 4. None of the above 37. The xenobiotic that does not cause nephro-toxicity is : 1. Streptozocin 2. Cisplatin 3. Gentamicin 4. Isoniazid 38. Ibuprofen is a: 1. acetic acid derivative 2. propionic acid derivative 3. butanoic acid derivative 4. None of the above 39. Which is the alkylating agent in the following? 1. Cyclophosphamide 2. Methotrexate 3. Allopurinol 4. Rifampicin 40. The best synthesis for chloramphenicol starts with: 2. p-Nitrophenol 1. *p*-Nitroaniline 3. p-Nitroacetophenone 4. p-Nitrobenzoic acid 41. Gray baby syridrome is due to the indiscriminate use of : 2. Chloramphenicol 1. Streptomycin 3. Penicillin. 4. Tetracycline 42. Vincristine is a:

3. Antifungal 4. Antibiotic

1. Antineoplastic

43. Penicillinase resistant penicillin is :

1. Amoxycillin 2. Ampicillin

2. Antiviral

	3. Penicillin V	4.	Meth	icillin					
44.	Which of the follow	ing anti	neopla	stic agent	is met	abolized by	xanthine	oxidase?	
	1. 6-Mercaptopurin	e 2.	Vincr	istine					
	3. Chlorambucil	4.	6-Thi	oguanine					
45.	The drug	u	sed'	in		hypertens	sive	patients	for
	the diagnosis of phe	ochron	ocyto	ma is :					
	 Methyl DOPA 	2.	Guan	ethidine					
	3. Clonidine	4.	Quini	dine					
46.	Which of	the	hy	pnotic	is	used	in	the	treatment
	of abstinence pheno	mena ?	•						
	1. Chloral hydrate	2.	Meth	yprylon					
	3. Paraldehyde	4.	Glute	thimide					
47.	Hypnotic used in ger	na tic pa	atients	is:					
	1. Methyprylon	2.	Mepr	obamate					
	3. Chloral hydrate	4.	Ethina	mate					
48.	Sedative		exhibit	ting		drug		ant	icholinergic
	activity is :								
	 Chloral hydrate 	2.	Glute	thimide					
	3. Meprobamate	4.	Paral	dehyde					
49.	H ₂ rece	ptor		antag	onists		have	,	therapeutic
	value for patients w	ith :							
	1. Hepatitis	2.	Rhini	tis					
	3. Gastric hypersecr	etion	4.	Dermati	tis				
50 .	The barbiturate that	t can ca	use ch	oleresis is :					
	1. Thiopental	2.	Cyclo	barbital.					
	3. Phenobarbital	4.	Amol	parbital					
51.	Pyrental pamoate is	used ir	the tr	eatment o	f:				
	1. Typhoid	2.	Amo	ebiasis					
	3. Pinworm infectio	n 4.	Schist	tosomiasis					
52 .	Phenytoin metabolis	sm is in	hibited	l by :					
	1. Chloramphenicol	2.	Disult	iram					
	3. Dicumarol	4.	All of	the above					
53.	In chlo	ramphe	nicol		resis	tant	typ	hoid,	the
	drug prescribed is :								
	1. Streptomycin	2.	Penic	illin					
	3. Ciprofloxacin	4.	Rima	ntadine					
54.	The metal used in th	ne treat	ment c	of rheumat	oid art	hritis is :			
	1. Ag	2.	Au						
	3. Cu	4.	Sb

	1.	Vibrio cholera	2.	Bordetella _l	pertussi	is				
	3.	Mycobacterium tubei	rcul	osis						
	4.	Clostridium tetany								
101.	Th	e causative organism	for	gas gangren	e is :					
	1.	Yersinia	2.	Bordello pe	rtussis					
	3.	Treponema pallidum	4.	Clostridium	perfrin	gens				
102.	St	aphylococcus		aureus		produce	es	а		pigment
	dι	ıring their growth havi	ing	:		-				
	1.	Red, color	2.	Green color	-					
	3.	Yellow color	4.	Black color						
103.	In	the Rideal Walker tes	t th	e strain used	is:					
	1.	Bacillus subtilis	2.	Staphyloco	ccus au	reus				
	3.	Pasteurel spastics	4.	Salmonella	typhi					
104.		An organic	а	cid wid	lely	used	in	the	treatme	nt of
	sk	in condition is :								
	1.	Propionic acid	2.	Sorbic acid						
	3.	Undecanoic acid	4.	Benzoic aci	d					
105.	Α	substance	tl	nat ho	olds	the	nui	mber	of	bacteria
	at	a constant level is kno	own	as:						
	1.	Antagonizes	2.	Inhibitor						
	3.	Antiseptic	4.	Bacteriosta	tic					
106.	Id	entify the molecule w	hich	controls the	e biosyr	nthesis of	protein	s in living	organisms	:
	1.	DNA	2.	RNA						
	3.	Purines	4.	Pyrimidines	S					
107.	ΑI	l amino acids are optic	ally	active, exce	ept:					
	1.	Tryptophan	2.	Phenylalani	ne					
	3.	Valine	4.	Glycine						
108.		mannose is		present	İ	in	some	pla	ant	products
	lik	e:								

	1.	Resins	2.	Pectins			
	3.	Mucilage	4.	Gums			
109.	Ga	lactose is a mai	n constitu	ent of :			
	1.	Milk sugar	2.	Honey			
	3.	Cane sugar	4.	Chitin			
110.	Gly	cogen is presen	it in all bo	dy tissues, e	except:		
	1.	Liver	2.	Brain			
	3.	Kidney.	4.	Stomach			
111.	Th	e following ions	help in er	nzymatic tra	nsfer of phosp	hate from ATP to py	yruvic acid :
	1.	Sodium	2.	Calcium			
	3.	Magnesium	4.	Potassium			
112.	Dι	ıring glycolysis d	of glucose	the energy I	iberated in the	e absence of oxygen	i is known as :
	1.	Oxygenesis	2.	Glyconeoge	enesis		
	3.	Glycogenolysis	4.	Anaerobic f	ermentation		
113.	Tr	eatment of pent	toses with	a concentra	ated mineral a	cid yields a cyclic ald	dehyde known as
	1.	Pentaldehyde	2.	Cyclopental			
	3.	Hexaldehyde	4.	Furfural			
114.	Ну	poglycemia		depress	es	insulin	secretion
	an	d thus increases	s the rate	of:			
	1.	Hydrolysis	2.	Reduction			
	3.	Gluconeogenes	sis 4.	Respiratory	acidosis		
115.	Mi	ilk sugar is knov	vn as :				
	1.	Fructose	2.	Glucose			
	3.	Sucrose	4.	Lactose			
116.	Ar	essential agent	t for conve	erting glucos	e to glycogen	in liver is :	
	1.	Lactic acid	2.	GTP			
	3.	UTP	4.	Pyruvic acid	i		
117.		Which	of	the	following	hormones	is not
	inv	olved in carbor	nydrate m	etabolism :			
	1.	ACTH	2.	Glucagon			
	3.	Vasopressin	4.	Growth Ho	rmone		
118.	Th	e distinguishing	test betw	veen monos	accharides and	disaccharides is :	
	1.	Bials test	2.	Seliwanoff's	s test		
	3.	Barfoed's test	4.	Hydrolysis t	test		
119.	Th	e ir	ntermedia	te	in	hexose	monophosphate
	sh	unt is :					
	1.	D-Ribulose	2.	D-Ribose			
	3.	D-Xylose	4.	D-Lyxose			
120.	Or	n boiling, Bened	ict's solut	ion in not re	duced by		
	1.	Sucrose	2.	Lactose			
	3.	Maltose	4.	Fructose			

121.	Th	e sweetenin	g agent con	nmonly	used in	the che	wable tablets	is		
	1.	Sucrose	2	. Cycl	amate so	dium				
	3.	saccharin sc	dium 4	. man	nitol					
122.	Wa	ater :	attack	test	: i	is	used	to	identify	the
	alk	alinity in :								
	1.	Type I Glass	2	. Type	e II Glass					
	3.	Type III Glas	ss 4	. All t	he above	types				
123.	Α	type	of	f	low	in	which		viscosity	increases
	wh	en the subs	tance is agit	ated is	: :					
	1.	Plastic	2	. Pseu	idoplastic	С				
	3.	Dilatant	4	. Thix	otropic					
124.			ingredie				tioned		below	are
		-			jents for	film coa	ting, except :			
		Cellulose ac	•	late						
		Carnauba w								
		Hydroxyeth
