School Performance Fact Sheet
Reporting for Calendar Years 2012 & 2013

In compliance with the California Postsecondary Education Act of 2009 and in recognition of the importance of consumer protection, University of the People (UoPeople) provides the following statements of fact. The Bureau for Private Postsecondary Education (BPPE), as the regulatory body for private postsecondary institutions in the State of California, requires that an institution provide information to students, prior to enrollment, on completion rates, placement rates, licensure examination passage rates, and salary/wage information.

Educational programs at UoPeople are not designed to lead to, nor does UoPeople make any express or implied claim relating to preparing students for, a particular career, occupation, vocation, job, or job title. UoPeople does not advertise or provide placement services, nor does it express or imply that a particular salary may be earned after completing a degree program; thus, no placement, licensure, or salary information is applicable to the institution. Information regarding general salary and placement statistics may be available from government sources or from the institution but it is not equivalent to actual performance data.

COMPLETION DATA:

UoPeople admits new students five times a year. Students can choose to study on a full-time or part-time basis and can request to be on leave for one or more terms. The flexibility to study at one's own pace means that students progress through their programs of study at different rates; however, students pursuing an Associate of Science degree must complete their degree program within twenty-five terms of active study (the equivalent of 5 years). Students pursuing the Bachelor of Science degree must complete their degree program within fifty terms of active study (the equivalent of 10 years). Currently, most students at UoPeople opt for part-time enrollment and/or one or more terms on leave during the course of their studies, although there are those who do choose to study full-time every term of the year.

Data provided below for the Associate of Science degree programs would normally be based on students who began their program five years before the reporting year. Data for the Bachelor of Science degree programs would similarly be based on those who began their program ten years before the reporting year. Since UoPeople did not begin enrolling students until September 2009, data for the 2012 and 2013 calendar years are limited to those students who elected to pursue the Associate of Science degree on a full-time basis with no terms out of residence.
