INTRODUCTION

We are passing through a phase, which is witnessing an unprecedented growth in the number of aspirants for university education. This is also an era of emergence of new areas of knowledge.

It is the resolve of the State to enable 20% of the 18-22 age-group to enter the campuses of the Indian universities in the 11th plan period. A large number of first generation learners are entering the portals of universities. This has been possible due to consistent efforts by society to ensure enrolment from social groups like the Scheduled Castes, Scheduled Tribes, Other Backward Classes, women, minority religious communities and other economically depressed groups, mostly coming from the rural areas. Their entry into the hallowed spaces of higher learning have critically changed the way we have been looking at the goals and direction of the policies and institutional framework of higher education. With the entry of a large number of first generation university goers, the very profile of the university campus, which has remained unchanged since the colonial times, would be transformed. There is an urgent need to further democratize universities to make them more equitable and inclusive places. At the same time, universities should be able to excite the creative imagination of the young minds and create an ambience which helps generate diverse kinds of creative and academic innovations. Issues of access, equity and social justice have to be considered concomitantly with the need for fostering quality and excellence so as to develop a creative and innovative human resource base.

Introduction of Credit-semester system in our University from 2009-10 academic year onwards must now be reinforced with complementary changes. Revitalizing the idea of university in an entirely new egalitarian context is the primary purpose of Single Window System (SWS) of admission called Centralised Allotment Process (CAP). CAP provides the students with an appropriate awareness and understanding of the programmes provided by the affiliated colleges under the University. It helps the students to judiciously choose the right one from the wide range of programmes with utmost freedom. It is introduced as a safety rail to prevent students from being incapacitated in many ways. CAP assures the students not only transparency in admission procedure, but also provides an opportunity to pursue their area of interest / specialized subject with greater degree of independence than is customary at the undergraduate level, setting one's own learning objectives within the framework of the programme. This was often overlooked in the traditional admission procedure, which resulted in a lot of discrepancies in the learning experience as well as the admission procedures.

The greatest advantage is saving of time. The students need to submit only one application and can track its status on-line. CAP eliminates manipulation at all levels. The students are thus provided an excellent opportunity to choose a right programme as well as an institution of their choice without fear or favour. The placement of the candidate in various programmes and institution will be according to their choice, merit and socially determined norms. The marks/Grades at the Plus Two level decide the eligibility for admissions to the degree programme.

It also cuts a lot of unnecessary expenditure of money incurred by way of submission of separate applications in multiple institutions. Only one application needs to be registered on-line for opting multiple programmes/colleges on preferential basis. CAP thus eliminates anxiety and unnecessary visits to institutions to enquire about the admission status.

The admissions under cultural/sports quota for outstanding students are decided by the respective colleges in the best interests of students and the institutions concerned who excel in respective fields. Admission to seats reserved for physically challenged candidates are also done by the respective institutions. CAP assures that the seats under reservation for SC/ST/physically challenged candidates are exclusively allotted to them. In other words, CAP ensures social justice. CAP never infringes on the right of any stake holders in higher education. It only empowers all sections - the academic community - through rule based, transparent and state-of-the-art delivery system.

CAP showcases the menu of choice of programmes and colleges before the student community. It advises the students on the management of their plans to complete the programme to the best. The greatest advantage is that it allows the students to select and specialize in particular aspects of their chosen subject of study. The students are thus benefited in a big way, by combining transparency and freedom to select subjects of their choice.
