## SECTION-1 **ENROLLMENTS; TODAY & FUTURE**

In 2001, the enrollment ratio in higher education in India was 6.2% only. Thus, more than 93% students of 10+2 did not join the higher education. Even the students who joined higher education were largely into irrelevant education.

With this % of enrollments in higher education we cannot dream of India as a Super Power!

As per the 11<sup>th</sup> plan, the Government of India targets to increase the higher education enrollment from current 8% to 20%. The total enrolment in higher education at the end of 10<sup>th</sup> Plan is estimated to be 1.2 crores out of which the contribution of distance education alone is 24%. The government has decided to increase the enrolment in distance education from 24% to 40% and to achieve this there is a renewed emphasis on distance education throughout the country.

NARRATION	2001	2012
ENROLLMENT RATIO IN HIGHER EDUCATION	6.2%	20%
TOTAL POPULATION IN AGE GROUP OF 17-23	17 CRORE	18 CRORE
STUDENTS ENROLLED IN HIGHER EDUCATION	1 CRORE	3.6 CRORE
DISTANCE EDUCATION CONTRIBUTION TO H.E	24%	40%
STUDENTS IN ENROLLED IN DISTANCE EDUCATION	24 LAKH	140 LAKH

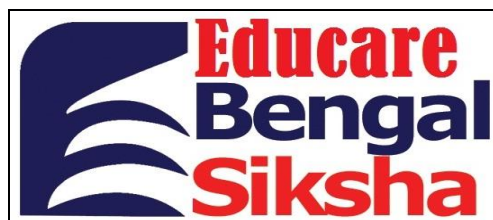

## 1. AN OVERVIEW ON DISTANCE EDUCATION -

Distance Education is an established mode of education being followed by decades by developed countries and being aggressively promoted by UNESCO in developing countries. It is a flexible system of education mainly catering professionals who work to earn a living but at the same time continuously want to upgrade their skills and also for those who cannot afford regular education and want slow paced education through short modules at periodic intervals.

The Gross Enrolment Ratio (GER) in higher education is presently hovering at a mere 13%, a whole 10% below the world average. I am setting sights to raise it to the global average by 2020, which by then will be around 30%. It will mean that enrolment should expand to 40-45 million from the mere 13 million today. The “new” demand for higher education in India has come mainly from two groups that traditionally did not access higher education: a “rising” lower-middle class and women. These sections will continue to fuel demand for higher and will be fighting for more places to provide quality education.

Given the size and diversity of our country and the increasing of aspirations of the people as a result of awareness of the importance of education in the society, traditional educational institutions alone cannot do justice to the galloping demand and our target of reaching a GER of 30 percent. The question then is how to reach those who cannot access formal education. A welfare state cannot remain a mute spectator when people with talent but without the wherewithal to pursue higher education are deprived of the chance of acquiring advanced qualifications, as such a deprivation will ultimately affect the development of the nation in many ways – not just in terms of economic development.

The answer lies in ‘Distance Education’. It is becoming increasingly popular as economic forces encourage, and new technologies facilitate, its spread. The convergence of communications and computing technologies is rewriting the possibilities for distance education both in terms of capabilities and cost. Distance education, has become popular because it offers people from rural, working class communities access to higher education. We are thus targeting an enrolment of at least 7 million students, with a majority from the disadvantaged sections and locations, during the next few years.

## MGU Educational Support & Features

- Self Learning Material (SLM)
- E-Learning
- Learning Management System (LMS)
- Dynamic Web-Portal
- Online On-demand Examination
- Online Admission Facility
- Multi-Entry and Multi-Exit Facility
- Student Placement Services

### Self Learning Material(SLM)

- To facilitate smooth self-study for students for students MGU provides detailed study material along with E-Books for respective courses. All the students are provided with comprehensive Self Learning Material(SLM) at the beginning of every semester. Renowned authors specially design the self-learning Material for each course of the curriculum, with the distance learning methodology in mind. ## Why e-learning?

**“e-learning is changing the way people learn”**

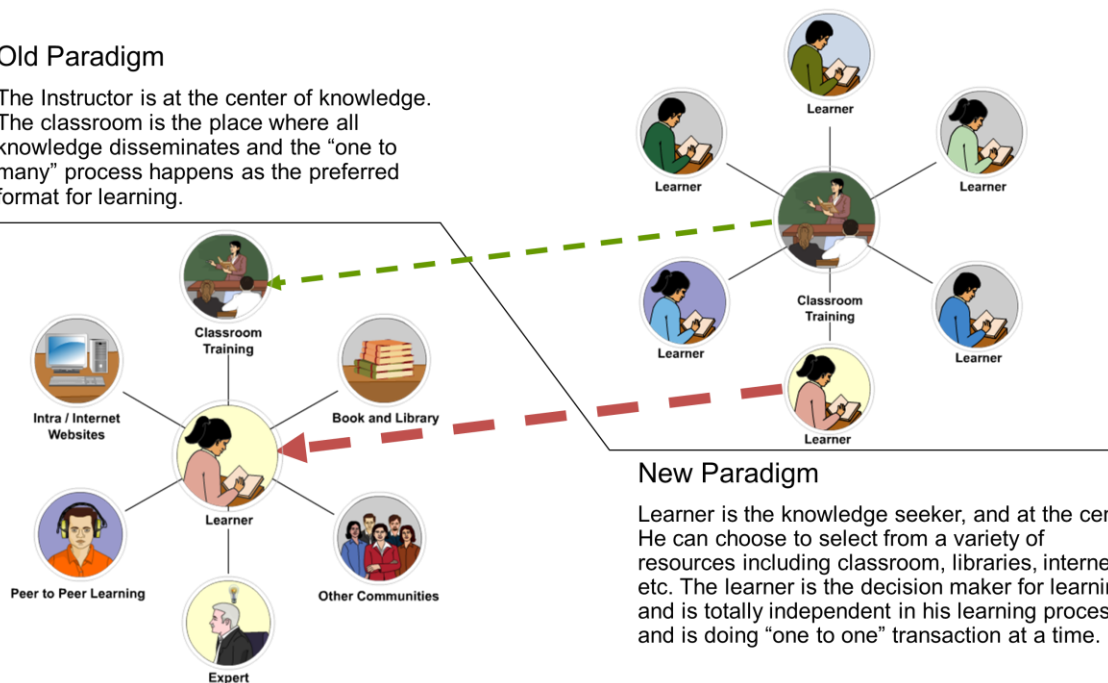

- ❖ Cost saving
  - ❖ Just-in-time access to knowledge and information
  - ❖ Peer-to-peer learning – student to student; teacher to student, etc;
  - ❖ Worksite learning
  - ❖ Manage complexity, volume and pace of training
- 
- ✓ e-learners learn more and retain 25% to 50% more than they would in an instructor-led training or distant learning environment.
  - ✓ e-learning results in a 60% faster learning curve compared to instructor-led training or distant learning. Provides significant time savings.

## New Paradigm in learning

### Old Paradigm

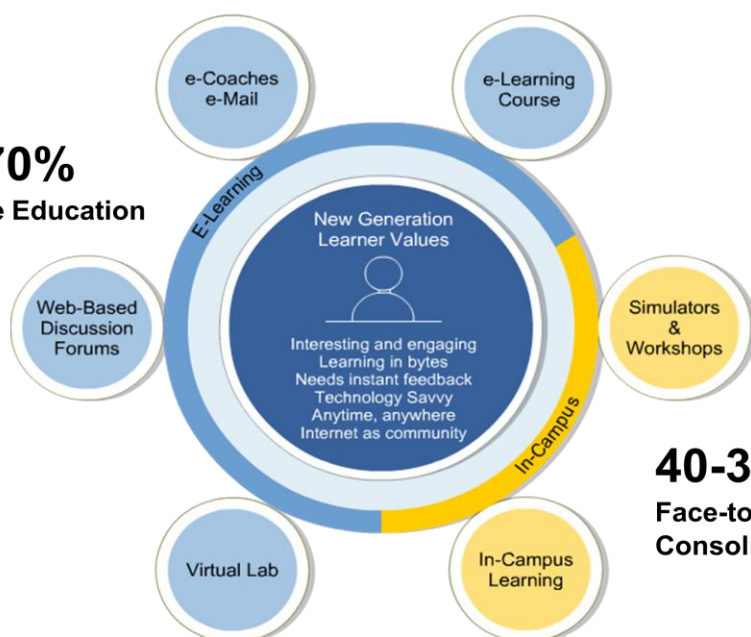

The Instructor is at the center of knowledge. The classroom is the place where all knowledge disseminates and the “one to many” process happens as the preferred format for learning.
