UNIVERSITY OF PUNE Syllabus for Masters Degree in Computer Management M.C.M. [M.C.M. Part I From Academic Year 2012-2013, M.C.M. Part II From Academic Year 2013-2014]

(I) INTRODUCTION

- 1. The name of the programme shall be Masters' Degree in Computer Management (M.C.M.)
- 2. The knowledge and skills required to plan, design and build complex application software systems are highly valued in all industry sectors including business, health, education and the services. The basic objective of the Masters' Degree in Computer Management (M.C.M.) is to provide to the country a steady stream of competent young men and women with the necessary knowledge, skills and foundations for acquiring a wide range of rewarding careers into the rapidly expanding world of Information Technology. In today's Global Economic scenario highly skilled versatile professionals with allround approach for problem solving is need of the hour. MCM program of Pune University wishes to create such professionals.
- 3. The Job Opportunities are :

a. Many graduates begin their careers as junior programmers and, after some experience, are promoted to senior programmers, systems analysts, programmer/analysts, software testers posts. Others seek entrepreneurial roles in the computer world as independent business owners, software authors, consultants, or suppliers of systems and equipment. Career opportunities exist in such areas as management, software and hardware sales, technical writing, training others on computers, consulting, software development and technical support.

b. Application areas include transaction processing (such as order processing, airline, railway reservations, banking systems), accounting functions, sales analysis, games, forecasting, simulation, database management, decision support data communications, and e-commerce.

4. a. The first two semesters of the programme is a mix of computer-related and general business courses. The computer-related courses use computers to introduce standard techniques of programming; the use of software packages systems analysis and design. The general business courses include the functional areas of management like the study of marketing management, financial operations management and general management. management, The course would emphasize the study and creation of business applications, rather than mere programming. Considering the current environment, fundamental concepts related to web-based applications are introduced. Inclusion of Mobile Technologies, Web technologies gives new platforms to students to work on.

b. In semesters III and IV, students are exposed to system development in the information processing environment, with special emphasis on Management Information Systems and Computer Resource Management. Specializations are included in IIIrd Semester which includes network Technology, Software Testing or Software Development. Inclusion of specialization papers will improve thorough knowledge of students in that subject. It will also focus on particular technology in which student is more interested.

c. Colleges are given the opportunity to select Latest technology and prepare students in that Technology with the help of Departmental Subject. In addition Global Industry approved certifications could be offered as supplementary skill upgrade.

d. Soft skills techniques are covered in every semester, which will lead to overall personality development of the student and that will help them in their placement activities and to sustain in the organization successfully. Colleges are encouraged to teach minimum one foreign language in addition to English to enhance employability of students.

- 5. **Duration:** The M.C.M. program will be full-time two years Masters Degree in Computer Management.
- 6. The new curriculum would focus on imparting skills, necessary for developing a career in the field of business applications of computer, in emerging global scenario which emphasizes e-business in all sectors of the economy.
- 7. The institute should organize placement program for the MCM students, by interacting with the industries and software consultancy houses in and around the region in which the educational institution is located.
- 8. **Intake:** In each class, not more than 60 students will be admitted.

(II) ELIGIBILITY FOR ADMISSION

Graduates possessing any faculty of any statutory University shall be eligible for admission to the M.C.M. course.

(III) NUMBER OF LECTURES AND PRACTICALS :

Lectures and practicals should be conducted as per the scheme of lectures and practicals.

(IV) PRACTICAL TRAINING AND PROJECT WORK:

Towards the end of the second year of study, a student will be examined in the course "Project Work".

a. Project Work may be done individually or in groups in case of bigger projects. However if project is done in groups, each student must be given a responsibility for a distinct module and care should be taken to monitor the progress of individual student.

b. Student should take guidance from an internal guide and prepare a Project report on "Project Work" in 2 copies to be submitted to the Director of the

Institute by 31st March. Wherever possible, a separate file containing source-code listings should also be submitted.

c. The Project Work should be of such a nature that it could prove useful or be relevant from the commercial / management angle.

d. The project report will be duly assessed by the Internal guide of the subject and marks will be communicated by the Director to the University after receiving the Seat numbers from the University along with marks of the internal credit for theory and practical to be communicated for all other courses.

e. The project report should be prepared in a format prescribed by the University which also specifies the contents and the method of presentation.

f. The project work will carry 80 marks for Internal assessment and 120 marks for external viva. The external viva shall be conducted by a minimum of two external examiners.

g. Project Work can be carried out in the Institute or outside with prior permission of the Institute.

h. The external viva-voce examination for Project Work would be held in March/April of the second year of study, by a panel of two external examiners.

(IV) ASSESSMENT

The final total assessment of the candidates is made in terms of an Internal assessment and an external assessment for each course.

For each paper, 30% marks will be based on internal assessment and 70% marks for semester end examination (external assessment), unless otherwise stated.

The division of the 30% marks allotted to internal assessment of theory papers is on the basis of tutorial work and written test of 15 marks, seminars and presentations 10 marks and attendance 5 marks.

The internal marks will be communicated to the University at the end of each semester, but before the semester end examinations. These marks will be considered for the declaration of the results.

(V) EXAMINATION

Examinations shall be conducted at the end of each semester i.e. during April/May and also in October/November.

(VI) STANDARD OF PASSING

a. Every candidate must secure 40% marks in each head of passing.

b. The passing marks for external examination will thus be 28 out of 70 and for internal examination 12 out of 30 and aggregate marks taking both together will be 40 marks.

c. Reassessment of Internal marks :

In case of those students who have secured less than passing percentage of marks in internal i.e. less than 40%, the institute will administer a separate internal test. The results of which may be conveyed to the University as the Revised Internal Marks.

In case the result of the internal test as above, results in lower marks than the original, the original figure of the marks will prevail. In short, the rule is higher of the two figures of the marks.

However, the institute will not administer any internal test, for any subject for those candidates who have already scored 40% or more marks in the internal examination.

(VIII) BACKLOG

Two semesters backlog can be carried to the third semester.

(IX) CLASS

There shall be numerical marking for each question. At the time of declaration of the result, the marks obtained by a candidate are converted into classes as shown below:

The class will be awarded on the basis of aggregate marks scored by the student (i.e. out of 2400),provided he/she has passed in both the internal/external examinations of all the subjects in M.C.M. Part I and Part II.

CLASS	TOTAL MARKS		
First Class with Distinction	1680 and above		
First Class	1440 to 1679		
Higher Second Class	1320 to 1439		
Second Class	1200 to 1319		
Pass Class	960 to 1199		
Fail	959 and below		

(X) MEDIUM OF INSTRUCTION

The medium of instruction will be English.

(XI) REVISION OF SYLLABUS

As the computer technology is changing very fast, revision of the syllabus should be considered every 3 years.

(XII) TEACHING AND PRACTICALS SCHEME

Each Session will be of 1 and 1/2 Hrs. (Includes Lecture & Practical) For a Year : 28 Weeks Teaching , 12 Weeks Vacation , 12 Weeks PL & Exam

Semester – I						
Subject Code	Subject Title	Internal	External			
101	Fundamentals of Information Technology	30	70			
Objective: To give introduction to computer systems, operating systems, numbering systems, microprocessor, input output devices.						

Sr. No	Chapter Details	Nos. of Sessions	%	Reference Books
1	Introduction to Computer Systems Computer definition Characteristics of Computers Computer Generations (First, Second, Third, Fourth, Fifth with example) Types of Computers (Super computer, Mainframe computer, Mini computer, Micro computer) Digital Block Diagram and function of each unit of Block diagram	3	10	1,2,3,4
2	Input and Output Units of Computer System 1. Input devices (I : Keyboard, II : Pointing devices - Mouse, Joystick, Touch Screen, Light Pen, Stylus) II : Scanning devices (Optical Scanners, Bar Code readers, MICR, OCR, OMR) IV : Image capturing devices (Digital Camera, Digital video camera) V: Audio input	4	10	1,2,3,4

	devices-Microphone			
	2. Output devices (I : Monitors – Cathode ray tube, Flat panel monitor, II : Printers (Ink jet printer, Laser printer, Thermal printer, Dot matrix printer, Plotter, Photo printer) III : Audio output device – Speakers, Head phones)			
	Storage devices			
3	1. Storage (I : Types of Memory – Primary and Secondary / RAM and ROM) II (Storage Capacity : Bit, Byte, MB, KB, GB, TB) III : Primary Storages (RAM, ROM, PROM, EPROM, Cache Memory, function of Cache Memory, Virtual Memory)	3	10	1,2,3,4
	IV : Secondary Storages(Punch Card, Magnetic Tape, Magnetic Disk, Floppy Disc, CD, DVD, Hard Disk, Pen Drive)			
4	Processing device Process Devices : (I : Microprocessor, II : Specialty processor – Graphics co processor, Parallel processor)	3	9	1,3
	Electronic data and coding system			
5	Number Systems (I : Types - Non Positional Number System, Positional Number System (Binary, Octal, Hexadecimal Number Systems),II : Conversion of One Number System to Another, III : Coding systems : BCD, EBCDIC, ASCII, Unicode)	3	12	1,3
	Software system			
6	Software : I - Definition, II - Types of Software, III - Operating System : (Definition and Functions, Types of Operating System, Difference between Windows and Open source Operating System, Batch Processing, Spooling, Multiprocessing, Multiprogramming, Time- Sharing, On-Line Processing, Real-Time Processing	6	12	1,2,4,5
7	Operating Systems			
	Process Management, CPU Scheduling, Memory Management, File Management	8	15	5,6

8	Computer Language I. Computer language : High Level Language, Low Level Language, II.Language Converter: Compiler, Interpreter, Assembler	2	10	1,3
9	Computer networking Networking, I : Computer network and its benefits II : Types of networks - LAN, WAN, MAN, Intranet, Internet III : Network Topologies, IV : OSI Model (Seven layers) V : Communication Media	5	12	7,8
10	Practical Hands on and presentations by students Practical Approach : Computer Assembly, Handling Boot Setup, Installation of Operating System and Server, Connecting your client to server, User and Workgroup Handling, General Operating system handling and current new topics in IT	3		

Books

- 1. Computer Fundamentals by P.K. Sinha, BPB Pub, 4th Ed.
- 2. Computer Fundamental by Ram B, new Age International Pub, 4th Ed.
- 3. Computer Fundamental by Oka Milind M
- 4. Computer Fundamental by Rajaraman,PHI,4th Ed.
- 5. Operating System by Galvin, TMH, 8th Ed.
- 6. Operating System by Achyut Godbole, TMH, 2nd Ed.
- 7. Computer Networks by Andrew S. Tanenbaum, Pearson, 4th Ed.
- 8. Fundamentals of computer networks by Sudakshina Kundu

	Semester – I						
Subject Code	Subject Title	Internal	External				
102	C Programming & Data Structure	30	70				
Objective programs	Objective: After completing this subject student will be able to understand and write programs by using C language along with basic concepts of Data Structures.						

Sr. No	Chapter Details	Nos. of Session	%	Reference Books
	C Fundamentals	2	8	1,2,3,4
	A Brief History of C,	3		
	C is middle-level Language,			
1	C is a Structured Language,			
1	C Character Set, Identifiers and Keywords under ANSI			
	C. Data Types, Constants: int,			
	float, double, char. Qualifiers: long, short, unsigned			
	and signed. Escape sequences (like\n,\b etc.).			
	Arithmetic Expressions and different built-in			
	Operators. Pre-processor			
	directives (like #include, #define), concept of header			
	files, Symbolic constants,			
	Comments, sizeof, steps involved in translation of C			
	Program. Concept of typedef for renaming a built-in			
	data type.			
	Flow Charts and Decision Table		5	1,2,3
	Flow Diagram, Flow Chart symbols and their use,			
	System flowcharts, program	2		

2	flowcharts, outline flowcharts, detail flowcharts, flowcharts and signs of communications, flow lines, process decisions, connectors, terminals, flowcharts for simple programs-problems.			
3	Built-in operators and functions . Console based I/O and related built-in I/O functions: printf(), scanf(), getch(), getchar(),putchar(), gets(), puts().	2	4	1,2,3,4
4	Decision and Case Control Structure if statement, if-else construct, use of logical operators and Compound Relational Tests, Nested if statements, The else if construct, the relational operators, the conditional expression (ternary) operator. The Switch Statement with or without break, concept of a case label, goto statement, concept of a goto label, comparison between goto and case labels.	2	5	1,2,3,4
5	Loop Control Structure Concept of Loop, loops supported by 'C', concept of top tested and bottom tested loops, the for loop statement, Nested for Loop , for loop variants, the while loop statement, simple and nested while loop, Increment/decrement operators; Use of Break and Continue, the do-while loop, comparison between for, while and do while loops.	2	5	1,2,3,4,5
6	Storage Classes Automatic, Register, Static (local and global),External. Scope rules.	1	4	1,2,3,4,5
7	Arrays Concept of a collection, types of collections supported by 'C', Array collection and its features, concept of indexing, index variable, index type, positional value of a member of array collection, concept of dimension and size of an array, 'C' syntax for declaration of array, name of the array and its type, Referring individual elements, Entering data into an array, reading data from an array, concept of Array initialization and list of initializers, size option, Bounds checking, the concept of two dimension arrays and related syntax, similarities between dimension and nesting String	4	10	1,2,3,4,5,8
	Functions Concept of a subprogram, the interface of a		12	1,2,3,4,5,8

8	subprogram, role of a interface, Arguments of a subprogram, kinds of subprograms supported by C, return statement as an interface, local variables, Default Return type and the type void, Passing values between functions through interfaces, Declaration of function type, iterative and recursive subprograms, Recursion, concept of call by value, call by reference, return and their underlying implementation should be explained, similarities and differences between Function & Macros, concept of nested macros and their use, recursion as a special nested call.	4		
9	Pointers Concept of Pointers, Pointer as an address variable, concept of a pointer data type and its syntax, built-in address operator, Pointers to existing variables of different data types and their uses, use of indirection operator, the name of the array as a pointer variable, Pointers and Arrays, Pointers arithmetic, use of unary operators (++,), One Dimension Arrays and Pointer, concept of array of pointers and simple use, command line arguments for the main, pointer as a return type of a function.	4	8	1,2,3,4,5,8
10	Structures Structure as a homogeneous and heterogeneous collection, possible applications, syntax of declaring structure, Initializing structures, structure variables, accessing structure elements using member operator, Arrays of Structures, and array as member of structure, conceptual difference between array and structure collection, Functions and Structures, nested structures, concept of anonymous structures and their use, Concept of self referential structure, pointer as member of structure and pointer to structure use of member selector operator(->), comparison between indirection (*) operator and member selector operator (->), structure as an argument to function and return type of a function.	3	8	1,2,3,4,5,7,8
11	Unions Concept of Union collection, Syntax of declaration and its use, comparison of Array, Structure and Union, array of unions and union as a member of structure, structure as a member of union and array as member of union, concept of memory saving and union. union	2	2	1,2,3,4,5,7,8

	as a generic data type, concept of anonymous union.			
	Console based I/O use of console as a file environment, use of keyboard		5	1,2,3,4,5,7,8
12	and VDU as I/O files: Use of stdin, stdout, stdprn and	2		
	stderr as built-in file pointers for console	2		
	environment, use of printf(), scanf() as fprintf() and			
	File based L/O		10	1224578
	Concent of a file text files in 'C' concent of a		10	1,2,3,4,3,7,0
13	nredefined FILE nointer and its definition as given in			
	header file stdio.h. meanings of different members of	3		
	the structure representing FILE, Disk I/O Functions:			
	High level file I/O or standard functions- fopen(),			
	<pre>putc(), getc(), fclose(), fgets(),fputs(),feof(), simple file</pre>			
	based programs showing the working of different			
	members of FILE structure.			
	Dynamic Memory Allocation and Memory		6	1,2,3,4,5,7,8
14	functions	2		
	concept of dynamic environment as run time	-		
	management use of huilt-in dynamic memory			
	management tools of 'C' viz. malloc Ω , free Ω , simple			
	programs using malloc () and free()			
	Bitwise Operator		5	1,3,4,5,7,8
	Concept of modifying the value using bit shifting,	-		
15	built-in bit shift operators left bit shift operator(<<)	2		
	and right bit shift operator (>>) their uses, limitations			
	of bitwise operators,			
	use of bitwise relational operators.			
16	Data Structure Concepts	2	3	10,11,12
	Definition of data structure,			
	Concept of Link list, Stack, Trees and Queue.

- **Note:** 1. System concept, Types and Characteristics of System can be explained in brief just to get idea about what is system and how it works.
 - 2. Methodology must be case study oriented throughout the syllabus.
 - 3. Faculty must design different cases based on SSAD and/or OOAD, which will impart insight knowledge for the preparation towards presentation and project.
 - 4. ER model and Normalization for mapping with table design will be covered in DBMS .

It is proposed that expert from industry be invited to conduct lectures and workshops to understand the industry soft-skill requirement.

Semester – I			
Subject	Subject Title	Internal	External
Code			
106	C and Case Tools Practical	100	

The practical sessions and assignments would be based on the topics covered in the subject code – 102 and 103

- Find Area, Perimeter of Square & Rectangle.
- Find max. Among 3 nos.
- Check leap year
- Factorial of Number
- Calculate a ^b
- Prime Number.
- Perfect Number.
- Armstrong Number.
- Floyd's Triangle
- Fibonacci Series
- Inter conversion of Decimal, Binary & Hexadecimal no.
- LCM & GCD of numbers
- Insert & Delete an element at given location in array.
- Transpose of matrices
- Multiplication of matrices
- Display upper & lower diagonal of matrices
- Array of Structure e.g. student result, Employee pay slip, Phone bill
- Function with no parameter & no return values
- Function with parameter & return values
- Function with parameter & no return values
- Function with call by reference
- Recursion function e.g. sum of digit, reverse of digit
- String manipulation function e.g. string copy, concatenation, compare, string length, reverse
- Pointer Arithmetic
- File handling e.g. Read / Write file, copy file, merging file
- Random access of file
- File handling with command line arguments
- Macro expansion
- File Inclusion

Note: this is not limited subject teacher can include new assignments based on syllabus.

Semester – I				
Subject Code	Subject Title	Internal	External	
107	Soft Skills Practical-Word Power, Business English	30		
Objective: To improve the vocabulary of English and comfort ability with business English				

Objective: To improve the vocabulary of English and comfort ability with business English. Use of language lab is also encouraged and lot of hearing practice, reading and understanding exposure should be given to the students.

Semester – II				
Subject Code	Subject Title	Internal	External	
201	Business Application and ERP Tools	30	70	

Objective :

1. The processes and practices in business and their applications are taught in subject. Student will go through Design to Development life cycle typically carried out in an industry. 2. He will gain domain knowledge in various fields and come to know about HR, manufacturing practices. 3. Also the financial aspect of business and management will be taught to student through this subject

	Semester – II					
Subject	Subject Title	Internal	External			
Code						
205	TECHNICAL HELP DESK	70				
Objective	: Candidates can expect to gain knowledge and understanding	; in the follo	wing upon			
successful	completion of the education					
Service I	Management as a practice (Comprehension)					
Service L	ifecycle (Comprehension)					
Key Prine	ciples and Models (Comprehension)					
Generic (Concepts (Awareness)					
• Selected	Processes (Awareness)					
• Selected	• Selected Roles (Awareness)					
Selected Functions (Awareness)						
Technolo	gy and Architecture (Awareness)					
• ITIL Qua	ification scheme (Awareness).					

Sr.	Chapter Details	Nos. of	%	Reference
No		Sessions		Books
1.	Service Strategy	2	7%	1 to 7
	Describe basics of Value Creation through Services			
2.	Service Design	4	12%	1 to 7
	04-3. Understand the importance of People, Processes,			
	Products and Partners for Service Management			
	04-4. Discuss the five major aspects of Service Design:			
	Service Portfolio Design			
	Identification of Business Requirements, definition of			
	Service Requirements and design of Services			
	Technology and architectural design			
	Process design			
	Measurement design			
3.	Continual Service Improvement	2	12%	2,3
	04-8. Discuss the Plan, Do, Check and Act (PDCA) Model to			
	control and manage quality			
	04-9. Explain the Continual Service Improvement Model			
	04-10. Understand the role of measurement for Continual			
	Service Improvement and explain the following key			
	elements:			
	The role of KPIs in the Improvement Process			
	Baselines			
	Types of metrics (technology metrics, process metrics,			
	service metrics)			
	Processes			

	The purpose of this unit is to help the candidate understand how the Service Management processes contribute to the Service Lifecycle, to explain the high level objectives, scope, basic concepts, activities and challenges for five of the core processes and to state the objectives and some of the basic concepts for thirteen of the remaining processes including how they relate to each other. The list of activities to be included from each process is the minimum required and should not be taken as an exhaustive list.			
4.	Service Strategy 05-1. State the objectives and basic concepts for: • Demand Management Challenges in managing demand for services Activity-based Demand Management (Patterns of business activity (PBAs)) Business activity patterns and user profiles (User profiles) • Financial Management Business Case	4	10%	2,3,4
5.	Service Design Explain the high level objectives, scope, basic concepts, process activities, key metrics (KPI's), roles and challenges for: Service Level Management (SLM) Service-based SLA Multi-level SLAs Service level requirements (SLRs) SLAM chart Service review Service improvement plan (SIP) . State the objectives, basic concepts and roles for: • Service Catalogue Management • Availability Management Service availability Component availability Reliability Maintainability Serviceability • Information Security Management (ISM) Security framework Information security management system (ISMS) • Supplier Management Supplier Contract Database (SCD)	6	12%	1

	Canacity Management			
	Capacity Management			
	Business canacity management			
	Service canacity management			
	Component capacity management			
	IT Service Continuity Management			
	Business Continuity Plans			
	Business Continuity Management			
	Business Continuity Management			
	Dusiness impact Analysis Diale Analysia			
(Commiss Transition	6	120/	1
6.	Service Transition	0	12%	1
	Explain the high level objectives, scope, basic concepts,			
	process activities, key metrics, roles and challenges for:			
	lypes of change request			
	Change process models and workflows (big table)			
	Standard change			
	Remediation Planning			
	Change Advisory Board / Emergency Change Advisory			
	Board			
	Service Asset and Configuration Management (SACM)			
	The Configuration Model			
	Configuration items			
	Configuration Management System (CMS)			
	Definitive Media Library			
	Configuration baseline			
	05-6. State the objectives and basic concepts for:			
	05-61 Release and Deployment Management			
	05-62 Knowledge Management			
	DIKW & SKMS			
7.	Service Operation	8	10%	1 to 71 to
	05-7. Explain the high level objectives, scope, basic			7
	concepts, process activities, metrics, roles and challenges			
	for:			
	Incident Management			
	Problem Management			
	05-8. State the objectives, basic concepts and roles for:			
	• Event Management			
	• Request Fulfillment			
	 Access Management 			
8	Functions	4	10%	1 to 7
	The purpose of this unit is to help the candidate to explain			
	the role, objectives, organizational structures, staffing and			
	metrics of the Service Desk function and to state the role,			

	objectives and overlap of three other functions. Specifically, candidates must be able to: 06-1. Explain the role, objectives, organizational structures, staffing and metrics of: • The Service Desk function 06-2. State the role, objectives and organizational overlap of: • The Technical Management function • The Application Management function • The IT Operations Management function (IT Operations Control and Facilities Management)			
9	Roles The purpose of this unit is to help the candidate to account for the role and to be aware of the responsibilities of some of the key roles in Service Management. Specifically, candidates must be able to: 07-1. Account for the role and the responsibilities of the • Process owner • Service owner 07-2. Recognize the RACI model and explain its role in determining organizational struct	2	5%	1 to 7
10	Technology and Architecture The purpose of this unit is to help the candidate to: 08-2. Understand how Service Automation assists with integrating Service Management processes	2	10%	1 to 7

Semester – III				
Subject Code	Subject Title	Internal	External	
302ST	Software Quality Assurance	30	70	

Objective : To enable student to learn Software Quality Assurance good practices with the help of various techniques, Strategies and tools.

Sr.No	Name of topic	No of sessions	%	Reference books
1	Software project Management	8	20	2.3.5
1	1 1 Software projects	0	20	2,0,0
	1.2 Project Life Cycle and stakeholders			
	1.3 Scope management, Time management,			
	Risk Management			
2	Software quality	4	15	1,2,3,4
	2.1 Definition			
	2.2 Software errors, software faults and			
	software failures			
	2.5 Soliware quality assurance – definition			
	2.4 Software quality assurance vs. software			
	quality control			
	2.5 The objectives of SQA activities			
3	Pre-project SQA Components	4	10	1
	3.1 Contract Review			
	3.2 Development and Quality Plan			
4	SQA components in Project life cycle	4	10	1
	activities assessment.			
	4.1 Verification and Validation			
	4.2 Various types of Reviews			
	4.3 Inspections			
	4.4 Walkthrough			
	4.5 Software testing			
	4.6 Impact of CASE Tools			
5	SQA Infrastructure Components	6	12	1
	5.1 Procedures and procedure manuals			

	5.2 Templates and Checklists			
	5.3 Staff training			
	5.4 Corrective and preventive actions			
	5.5 Documentation control			
6	Software Quality Factors	3	8	1,2,3,4
	6.1 Mccall's Quality Model			
	6.2 Product, Process quality metrics			
7	Standardization	7	15	1,2,3,4
	7.1 ISO 9001 and ISO 9000-3			
	7.2 SEI-CMM,			
	7.3 IEEE 1012 standard			
	7.4 ISO/IEC 12207 standard.			
8	Configuration Management	4	10	2,3
	8.1 Change control			
	8.2 Release and version control			
	8.3 Software configuration management			
	audit

303SD	Mobile Programming using Android	30	70	
Objective : This of	course introduces mobile application development for	or the Android pla	atform. Students	
will learn skills for creating and deploying Android applications, with particular emphasis on software				
engineering topics including software architecture, software process, usability, and deployment.				

Sr.No.	Name of The Chapter	Nos. of Session	%	References
1	 Introduction to Android A little Background about mobile technologies Android – An Open Platform for Mobile development Android SDK Features Android versions and features 	6	15	1,2,5
2	 Tools for Development Installing Android First Android application Running on Emulator Android development Tools Eclipse, IDEs and Tools 	2	5	1,3,4,7
3	 Android Architecture and OOPS Building Blocks of Android Java Classes and Objects Class Methods and Instances Inheritance and Polymorphism in Java Interface and Abstract class 	4	10	1,3,6
4	 Android UI and Advance Java Fundamental Android UI Design Introducing Views In Creating new Views Introducing Layouts Creating new Views Using resources Complex UI components Building UI for performance Using themes Debugging Android Code 	8	20	1,6,7

5	Android Graphics and Multimedia			
	 Basic Graphics Input Handling Playing Audio & Video Recording Audio and Video Adding new media to media store Raw Audio Manipulation 	6	15	1,3,7
6	 Database and Content Providers Introducing Android Databases Introducing SQLite on Android SQLiteOpenHelper and creating a database Opening and closing a database Working with cursors Inserts, updates, and deletes Creating new content Provider Using Content providers Native Android Content provider 	8	20	1,3,5,7
7 8	 Services, Broadcast Receivers, Preferences Overview of services in Android Implementing a Service Service lifecycle Bound versus unbound services Broadcast Receiver Life Cycle Introduction to Preference Types of Preference Live Project 	6	15	1,6,7

The Guidelines regarding the documentation and scope of project are mentioned here below

MCM-II SEM-IV (COMMERCIAL SYSTEM PROJECTS)

Project Report should be submitted in following format for Commercial Application Projects viz. Payroll, Sales, Purchase, Inventory, Book Shop, Examination system etc. Where VB, Access, Oracle, ASP and Java is used.

2 Blank Pages at beginning Title Page Certificate from Company Certificate from Guide Acknowledgement Index with printed Page Numbers CHAPTER 1 : INTRODUCTION 1.1 Company Profile 1.2 Existing System and Need for System

1.3 Scope of Work1.4 Operating Environment - Hardware and Software

CHAPTER 2 : PROPOSED SYSTEM

2.1 Proposed System2.2 Objectives of System2.3 User Requirements

CHAPTER 3 : ANALYSIS & DESIGN

3.1 Data Flow Diagram (DFD)
3.2 Functional Decomposition Diagram (FDD)
3.3 Entity Relationship Diagram (ERD)
3.4 Data Dictionary
3.5 Table Design
3.6 Code Design
3.6 Code Design
3.7 Menu Tree
3.8 Menu Screens
3.9 Input Screens
3.10 Report Formats
3.11 Test Procedures and Implementation

CHAPTER 4 : USER MANUAL

4.1 User Manual4.2 Operations Manual / Menu Explanation4.3 Forms and Report Specifications

Drawbacks and Limitations Proposed Enhancements Conclusion Bibliography ANNEXURES: ANNEXURE 1 : INPUT FORMS WITH DATA

Project report should be submitted in following format for project using OOAD, Embedded System, WAP and other technologies and Web Deployed Systems where C, C++, J2EE, .NET, OOAD and JAVA, SDK's, API's are used.

*** TECHNICAL PROJECTS ******

2 Blank Pages at beginning Title Page Certificate from Company Certificate from Guide Acknowledgement Index with printed Page Numbers CHAPTER 1 : INTRODUCTION 1.1 Company Profile 1.2 Existing System and Need for System 1.3 Scope of Work 1.4 Operating Environment - Hardware and Software

1.5 Detail Description of Technology Used

CHAPTER 2 : PROPOSED SYSTEM

2.1 Proposed System2.2 Objectives of System2.3 User Requirements

CHAPTER 3 : ANALYSIS & DESIGN

3.1 Object Diagram
3.2 Class Diagram
3.3 Use Case Diagrams
3.4 Module Hierarchy Diagram
3.5 Component Diagram
3.6 Deployment Diagram (in case of Web Deployment)
3.7 Module Specifications
3.8 Interface Diagram (in case of WAP and Embedded Systems)
3.9 Web Site Map Diagram (in case of Web Site)
3.10 User Interface Design (Screens etc.)
3.11 Table specifications (in case back end is a database)
3.12 Test Procedures and Implementation

CHAPTER 4 : USER MANUAL

4.1 User Manual4.2 Operations Manual / Menu Explanation4.3 Program Specifications / Flow Charts

Drawbacks and Limitations Proposed Enhancements Conclusion Bibliography ANNEXURES:

ANNEXURE 1 : USER INTERFACE SCREENS ANNEXURE 2 : OUTPUT REPORTS WITH DATA (if any) ANNEXURE 3 : SAMPLE PROGRAM CODE (which will prove sufficient development is done by the student) 2 Blank Pages at the end.

Internal [30] Marks Breakup			
Unit Test Marks	5		
Prelim Marks	5		
Assignment	5		
Presentations/Case-Study/Group Activity	10		
Attendance	5		
Total Marks	30
