Description	Up to 240hp with 3-man crew	Up to 550hp with 4-man crew	Up to 1,000hp with 4 or 5 man crew

Rental Services

	Tubular Products	Sand-X	SmartTong Rod Connection Service
Description	Pipe and tubular products at the point of need	A “must-have” for an increasing number of customers in the gas shale plays	Innovative Oilfield technology, increasing safety and productivity

Fluid Management

	Tanks	Disposal Wells	Trucks
Description	Acid Tanks, Frank Tanks, Sand-X	Commercial, Private, Semi-Private	Vacuum, Crane, Hot Oil, Kill, Transport, Winch, Other

Intervention Services

	Gooseneck	Large Diameter CT	CT Coiled Tubing
Description	Coiled Tubing uses a continuous metal pipe, which is spooled on a large reel. The pipe is fed downhole in oil and gas wells in order to deliver downhole tools, inject fluids, or perform downhole activities.		

Fishing Services

	Whipstocks and Mills	Custom Tool Machining	KTD Shear Sub
Description	Includes all types from flat bottom to piranha to watermelon mills	Tools are maintained before and after use, and tools can be custom machined for special jobs	Used in offshore applications, the KDTSS is used when sticking occurs in the drilling bottom hole assembly

Key Energy Services is all about performance. We are the performance leaders in well-site intervention services because of all the things we bring to the table. Our people are more experienced and better prepared than others in the industry. And we support them with better equipment and technology.

Rig Services

Key's extensive fleet of service rigs includes a wide range of classes, from 160hp, Class I scoping masts/poles to 500+ hp, Class V self-propelled carrier or trailer-mounted rigs. Each is available with ancillary equipment, depending on class and site needs.

Rental Services

Key has an extensive array of rental equipment and services, from hard items such as pipe, rods, or even BOPs, to our proprietary services such as SmartTongSM Rod Connection Services, Hydra-Walk[®] Pipe Handling System, and the Sand-X system. Depending on the situation and site needs, ancillary equipment and services are also available.

Fluid Management

Fluid handling plays a critical role in effective reservoir management. Key Energy Services can mobilize in minutes to deliver drilling fluids or dispose of produced waters. Our extensive fleet of trucks is on call 24/7 and manned by responsive, experienced crews that are ready to roll when you are.

Intervention Services

Key's expanded Intervention Services bring value and time savings to your well site. Minimizing downtime is only the beginning of the payoff. These services include matrix and fracture stimulation, fill and scale removal, logging, perforating, nitrogen jet lift, sand control, milling and drilling, cementing, well circulation, and mechanical isolation.

Fishing Services

Key's extensive arsenal of fishing tools includes a wide range of equipment, from whipstocks and mills to our exclusive line of Johnston Jars and proprietary drilling tensile shear sub. Each is available with ancillary equipment, depending on situation and site needs.
