Explanation/ Meaning

Pay Scale

The pay scale is a system that determines the salary or wages of an employee. There are certain factors on which pay scale depends.

The level of employment in terms of responsibilities, seniority, rank or status, the difficulty of the specific work performed. Depending upon these factors the pay scale of an employee is decided by an employer.

Basic Pay

The basic pay is the sum of the initial pay of the employee and Grade pay. This factor of income varies from one job profile to other job profile.

This is an important factor as all further calculations are done on the basis of this factor.

CPC Fitment Factor

The central pay commission fitment factor is the modification in salary made after amendment in the salary and wages as per seventh pay commission.

This factor is fixed at 2.57 for up to Grade pay 4200. The sum of initial pay and grade pay is taken into consideration for the calculation of CPC fitment factor.
