SCHEME AND SYLLABUS UNDER

CHOICE BASED CREDIT SYSTEM

B.Sc. WITH ZOOLOGY

| | CORE COURSE (12) | Ability Enhancement Compulsory Courses AEC (2) | Skill Enhancement Courses SEC (4) | Discipline Specific Elective DSE (4) |
|-----|---|--|--|---|
| I | CC- Botany I CC- Zoology I CC- Chemistry I | English Communication | | |
| II | CC- Botany II CC-Zoology II CC- Chemistry II | Environmental Science | | |
| III | CC- Botany III CC-Zoology III CC- Chemistry III | | SEC-I | |
| IV | CC- Botany IV CC-Zoology IV CC- Chemistry IV | | SEC-II | |
| V | | | SEC-III | DSE-Botany I DSE-Zoology I DSE-Chemistry I |
| VI | | | SEC-IV | DSE-Botany II DSE-Zoology II DSE-Chemistry II |

Discipline Core Courses: Zoology

- 1. Animal Diversity
- 2. Comparative Anatomy and Developmental Biology of Vertebrates
- 3. Physiology and Biochemistry
- 4. Genetics and Evolutionary Biology

Discipline Specific Electives: Zoology (Any two)

- 1. Animal Biotechnology
- 2. Applied Zoology
- 3. Aquatic Biology
- 4. Immunology
- 5. Reproductive Biology
- 6. Insect, Vector and Diseases

Skill Enhancement Courses: Zoology

- 1. Apiculture
- 2. Aquarium Fish Keeping
- 3. Medical Diagonistics
- 4. Sericulture

CORE COURSE I ANIMAL DIVERSITY

| THEORY | CREDITS 4) |
|--|------------------------------|
| Unit 1: Kingdom Protista General characters and classification up to classes; Locomotory Organelles a Protozoa | 4 and locomotion in |
| Unit 2: Phylum Porifera General characters and classification up to classes; Canal System in <i>Sycon</i> | 3 |
| Unit 3: Phylum Cnidaria General characters and classification up to classes; Polymorphism in Hydroz | 3 |
| Unit 4: Phylum Platyhelminthes General characters and classification up to classes; Life history of <i>Taenia sol</i> | 3 lium |
| Unit 5: Phylum Nemathelminthes General characters and classification up to classes; Life history of <i>Ascaris</i> its parasitic adaptations | 5 <i>lumbricoides</i> and |
| Unit 6: Phylum Annelida General characters and classification up to classes; Metamerism in Annelida | 3 |
| Unit 7: Phylum Arthropoda General characters and classification up to classes; Vision in Arthropoda, M Insects | 5 Aetamorphosis in |
| Unit 8: Phylum Mollusca General characters and classification up to classes; Torsion in gastropods | 4 |
| Unit 9: Phylum Echinodermata General characters and classification up to classes; Water-vascular system in | 4 Asterias |
| Unit 10: Protochordates General features and Phylogeny of Protochordata | 2 |
| Unit 11: Agnatha General features of Agnatha and classification of cyclostomes up to classes | 2 |
| Unit 12: Pisces General features and Classification up to orders; Osmoregulation in Fishes | 4 |

| Unit 13: Amphibia | 4 |
|---|--------------------|
| General features and Classification up to orders; Parental care | |
| Unit 14: Reptiles General features and Classification up to orders; Poisonous and non-poisonous snakes, E mechanism in snakes | 4 Biting |
| Unit 15: Aves General features and Classification up to orders; Flight adaptations in birds | 5 |
| Unit 17: Mammals Classification up to orders; Origin of mammals | 5 |
| Note: Classification of Unit 1-9 to be followed from "Barnes, R.D. (1982). Invertebrate | |

Zoology, V Edition"

ANIMAL DIVERSITY

PRACTICAL

(CREDITS 2)

1. Study of the following specimens:

Amoeba, Euglena, Plasmodium, Paramecium, Sycon, Hyalonema, and Euplectella, Obelia, Physalia, Aurelia, Tubipora, Metridium, Taenia solium, Male and female Ascaris lumbricoides, Aphrodite, Nereis, Pheretima, Hirudinaria, Palaemon, Cancer, Limulus, Palamnaeus, Scolopendra, Julus, Periplaneta, Apis, Chiton, Dentalium, Pila, Unio, Loligo, Sepia, Octopus, Pentaceros, Ophiura, Echinus, Cucumaria and Antedon, Balanoglossus, Herdmania, Branchiostoma, Petromyzon, Sphyrna, Pristis, Torpedo, Labeo, Exocoetus, Anguilla, Ichthyophis/Ureotyphlus, Salamandra, Bufo, Hyla, Chelone, Hemidactylus, Chamaeleon, Draco, Vipera, Naja, Crocodylus, Gavialis, Any six common birds from different orders, Sorex, Bat, Funambulus, Loris

- 2. Study of the following permanent slides:T.S. and L.S. of *Sycon*, Study of life history stages of *Taenia*, T.S. of Male and female *Ascaris*
- 3. Key for Identification of poisonous and non-poisonous snakes

An "**animal album**" containing photographs, cut outs, with appropriate write up about the above mentioned taxa. Different taxa/ topics may be given to different sets of students for this purpose.

- Ruppert and Barnes, R.D. (2006). *Invertebrate Zoology*, VIII Edition. Holt Saunders International Edition.

- Young, J. Z. (2004). *The Life of Vertebrates*. III Edition. Oxford university press.
- Pough H. Vertebrate life, VIII Edition, Pearson International.
- Hall B.K. and Hallgrimsson B. (2008). *Strickberger's Evolution*. IV Edition. Jones and Bartlett Publishers Inc.

CORE COURSE II

COMPARATIVE ANATOMY AND DEVELOPMENTAL BIOLOGY OF VERTEBRATES

| THEORY | (CREDITS 4) |
|--|-------------|
| Unit 1: Integumentary System Derivatives of integument Nails and hooves in birds and mammals | 4 |
| Unit 2: Skeletal System Evolution of visceral arches | 3 |
| Unit 3: Digestive System Brief account of alimentary canal and digestive glands | 4 |
| Unit 4: Respiratory System Brief account of Gills, lungs, air sacs and swim bladder | 5 |
| Unit 5: Circulatory System Evolution of heart and aortic arches | 4 |
| Unit 6: Urinogenital System Succession of kidney, Evolution of urinogenital ducts | 4 |
| Unit 7: Nervous System Comparative account of brain | 3 |
| Unit 8: Sense Organs Types of receptors | 3 |

Unit 9: Early Embryonic Development

Gametogenesis: Spermatogenesis and oogenesis w.r.t. mammals, vitellogenesis in birds; Fertilization: external (Sea urchin), internal (mammals), blocks to polyspermy; Early development of frog and humans (structure of mature egg and its membranes, patterns of cleavage, fate map, up to formation of gastrula);types of morphogenetic movements; Fate of germ layers; Neurulation in frog embryo.

Unit 10: Late Embryonic Development

Implantation of embryo in humans, Formation of human placenta and functions, other types of placenta on the basis of histology; Metamorphic events in frog life cycle and its hormonal regulation.

12

Fundamental processes in development (brief idea) – Gene activation, determination, induction, Differentiation, morphogenesis, intercellular communication, cell movements and cell death

COMPARATIVE ANATOMY AND DEVELOPMENTAL BIOLOGY OF VERTEBRATES

PRACTICAL

(CREDITS 2)

1. Osteology:

- a) Disarticulated skeleton of Pigeon and Guineapig
- b) Mammalian skulls: One herbivorous (Guineapig) and one carnivorous animal (Dog)

2. Frog - Study of developmental stages - whole mounts and sections through permanent slides/ photograph - cleavage stages, blastula, gastrula, neurula, tail bud stage, tadpole external and internal gill stages.

3. Examination of gametes - frog/rat - sperm and ova through permanent slides or photomicrographs.

- Carlson, Bruce M (1996). Patten's Foundations of Embryology, McGraw Hill, Inc.

PHYSIOLOGY AND BIOCHEMISTRY

THEORY (CREDITS 4) Unit 1: Nerve and muscle 8 Structure of a neuron, Resting membrane potential, Origin of Action potential and its propagation in myelinated and non-myelinated nerve fibres, Ultra-structure of skeletal muscle, Molecular and chemical basis of muscle contraction 5 **Unit 2: Digestion** Physiology of digestion in the alimentary canal; Absorption of carbohydrates, proteins, lipids **Unit 3: Respiration** 5 Pulmonary ventilation, Respiratory volumes and capacities, Transport of Oxygen and carbon dioxide in blood **Unit 4: Excretion** Structure of nephron, Mechanism of Urine formation, Counter-current Mechanism **Unit 5: Cardiovascular system** Composition of blood, Hemostasis, Structure of Heart, Origin and conduction of the cardiac impulse, Cardiac cycle **Unit 6: Reproduction and Endocrine Glands** Physiology of male reproduction: hormonal control of spermatogenesis; Physiology of female reproduction: hormonal control of menstrual cycle Structure and function of pituitary, thyroid, Parathyroid, pancreas and adrenal **Unit 7: Carbohydrate Metabolism** 8 Glycolysis, Krebs cycle, Pentose phosphate pathway, Review of electron transport chain **Unit 8: Lipid Metabolism** 5 β oxidation of palmitic acid **Unit 9: Protein metabolism** 5 Transamination, Deamination and Urea Cycle **Unit 10: Enzymes** Mechanism of action, Enzyme Kinetics, Inhibition 6

5

6

7

PHYSIOLOGY AND BIOCHEMISTRY

PRACTICAL

(CREDITS 2)

- 1. Identification of permanent histological sections of mammalian pituitary, thyroid, pancreas, adrenal gland
- 2. Identification of permanent slides of ileum, liver, lung, kidney
- 3. Qualitative tests to identify functional groups of carbohydrates in given solutions (Glucose, Fructose, Sucrose, Lactose)
- 2. Estimation of total protein in given solutions by Lowry's method.
- 3. Study of activity of salivary amylase under optimum conditions

- Tortora, G.J. and Derrickson, B.H. (2009). *Principles of Anatomy and Physiology*, XII Edition, John Wiley & Sons, Inc.
- Widmaier, E.P., Raff, H. and Strang, K.T. (2008) Vander's Human Physiology, XI Edition., McGraw Hill
- Guyton, A.C. and Hall, J.E. (2011). Textbook of Medical Physiology, XII Edition, Harcourt Asia Pvt. Ltd/ W.B. Saunders Company

CORE COURSE IV GENETICS AND EVOLUTIONARY BIOLOGY

THEORY

Unit 1: Introduction to Genetics

Mendel's work on transmission of traits, Genetic Variation, Molecular basis of Genetic Information

Unit 2: Mendelian Genetics and its Extension

Principles of Inheritance, Chromosome theory of inheritance, Incomplete dominance and codominance, Multiple alleles, Lethal alleles, Epistasis, Pleiotropy, sex linked inheritance, extra-chromosomal inheritance

Unit 3: Linkage, Crossing Over and Chromosomal Mapping

Linkage and crossing over, Recombination frequency as a measure of linkage intensity, two factor and three factor crosses. Interference and coincidence

Unit 4: Mutations

Chromosomal Mutations: Deletion, Duplication, Inversion, Translocation, Aneuploidy and Polyploidy; Gene mutations: Induced versus Spontaneous mutations, Back versus Suppressor mutations,

Unit 5: Sex Determination Chromosomal mechanisms, Mechanism of sex determination in Drosophila, dosage compensation

Unit 6: Origin of Life Major Events in Origin of Life

Unit 7: Introduction to Evolutionary Theories

Lamarckism, Darwinism, Neo-Darwinism

Unit 8: Direct Evidences of Evolution

Types of fossils, Incompleteness of fossil record, Dating of fossils, Phylogeny of horse

Unit 9: Processes of Evolutionary Change

Organic variations; Isolating Mechanisms; Natural selection (Example: Industrial melanism); Types of natural selection (Directional, Stabilizing, Disruptive), Artificial selection

Unit 10: Species Concept

Biological species concept (Advantages and Limitations); Modes of speciation (Allopatric, Sympatric)

(CREDITS 4)

7

9

3

8

4

2

5

5

9

6

Unit 11: Macro-evolution

Macro-evolutionary Principles (example: Darwin's Finches)

Unit 12: Extinction

Mass extinction (Causes, Names of five major extinctions, K-T extinction in detail), Role of extinction in evolution

6

GENETICS AND EVOLUTIONARY BIOLOGY

PRACTICAL

(CREDITS 2)

- 1. Study of Mendelian Inheritance and gene interactions (Non Mendelian Inheritance) using suitable examples. Verify the results using Chi-square test.
- 2. Study of Linkage, recombination, gene mapping using the data.
- 3. Study of Human Karyotypes (normal and abnormal) (from photograph).
- 4. Study of fossil evidences from plaster cast models and pictures
- 5. Study of homology and analogy from suitable specimens/ pictures

6. Charts:

- a) Phylogeny of horse with diagrams/ cut outs of limbs and teeth of horse ancestors
- b) Darwin's Finches with diagrams/ cut outs of beaks of different species
- 7. Visit to Natural History Museum/ Nature interpretation centre and submission of report

- Gardner, E.J., Simmons, M.J., Snustad, D.P. (2008). *Principles of Genetics*. VIII Edition. Wiley India.
- Snustad, D.P., Simmons, M.J. (2009). *Principles of Genetics*. V Edition. John Wiley and Sons Inc.

- Barton, N. H., Briggs, D. E. G., Eisen, J. A., Goldstein, D. B. and Patel, N. H. (2007). *Evolution*. Cold Spring, Harbour Laboratory Press.
 - Hall, B. K. and Hallgrimsson, B. (2008). *Evolution*. IV Edition. Jones and Bartlett Publishers
 - Campbell, N. A. and Reece J. B. (2011). *Biology*. IX Edition, Pearson, Benjamin, Cummings.
 - Douglas, J. Futuyma (1997). *Evolutionary Biology*. Sinauer Associates.

DISCIPLINE CENTRIC ELECTIVE COURSES

DSE 1 ANIMAL BIOTECHNOLOGY

| THEORY | |
|---|----|
| Unit 1: Introduction | 8 |
| Concept and scope of biotechnology | |
| Unit 2: Molecular Techniques in Gene manipulation | 24 |
| Cloning vectors: Plasmids, Cosmids, Phagemids, Lambda Bacteriophage, M13 BAC, YAC, MAC and Expression vectors (characteristics) | 3, |
| Restriction enzymes: Nomenclature, detailed study of Type II. | |
| Transformation techniques: Calcium chloride method and electroporation. | |
| Construction of genomic and cDNA libraries and screening by colony and plaqu hybridization | e |
| General concept of Southern, Northern and Western blotting; DNA sequencing: | |
| Sanger method, Polymerase Chain Reaction, DNA Finger Printing and DNA micro | |
| array | |
| Unit 3: Genetically Modified Organisms | 18 |
| Production of cloned and transgenic animals: Nuclear Transplantation, Retrovira Method, DNA microinjection | ıl |
| Applications of transgenic animals: Production of pharmaceuticals, production of donor organs, knockout mice. | νf |
| Unit 4: Culture Techniques and Applications | 10 |
| Animal cell culture, Expressing cloned genes in mammalian cells, Molecula diagnosis of genetic diseases (Cystic fibrosis, Sickle cell anemia) | ır |

ANIMAL BIOTECHNOLOGY

PRACTICAL

(Credits 2)

- 1. Genomic DNA isolation from *E. coli* (method)
- 2. Plasmid DNA isolation (pUC 18/19) from *E. coli* (Boiling MiniPrep method) Holmes & Quigly method
- 3. Restriction digestion of plasmid DNA/ Lambda DNA using *Eco*RI/ *Hin*dIII, eloctrophoresis and observation
- 4. To study following techniques through photographs
 - a) Southern Blotting
 - b) Northern Blotting
 - c) Western Blotting
 - d) DNA Sequencing (Sanger's Method)
 - e) PCR
 - f) DNA fingerprinting
- 5. Project report on animal cell culture

- Brown, T.A. (1998). *Molecular Biology Labfax II: Gene Cloning and DNA Analysis*. II Edition, Academic Press, California, USA.
- Glick, B.R. and Pasternak, J.J. (2009). *Molecular Biotechnology Principles and Applications of Recombinant DNA*. IV Edition, ASM press, Washington, USA.

- Snustad, D.P. and Simmons, M.J. (2009). *Principles of Genetics*. V Edition, John Wiley and Sons Inc.
- Watson, J.D., Myers, R.M., Caudy, A. and Witkowski, J.K. (2007). *Recombinant DNA-Genes and Genomes- A Short Course*. III Edition, Freeman and Co., N.Y., USA.
- Beauchamp, T.I. and Childress, J.F. (2008). *Principles of Biomedical Ethics*. VI Edition, Oxford University Press.

DSE 2 APPLIED ZOOLOGY

(CREDITS 4)

THEORY

| Unit 1: Introduction to Host-parasite Relationship | 3 |
|--|-------|
| Host, Definitive host, Intermediate host, Parasitism, Symbiosis, Commensalism, Reserv Zoonosis | voir, |
| Unit 2: Epidemiology of Diseases | 7 |
| Transmission, Prevention and control of diseases: Tuberculosis, typhoid | |
| Unit 3: Rickettsiae | 6 |
| Brief account of Rickettsia prowazekii | |
| Unit 4: Parasitic Protozoa | 8 |
| Life history and pathogenicity of Entamoeba histolytica, Plasmodium vivax | |
| Unit 5: Parasitic Helminthes | 5 |
| Life history and pathogenicity of Ancylostoma duodenale and Taenia solium | - |
| Unit 6: Insects of Economic Importance | 8 |
| Biology, Control and damage caused by Helicoverpa armigera, Papilio demoleus, H Sitophilus oryzae and Tribolium castaneum | - |
| Unit 7: Insects of Medical Importance | 8 |
| Medical importance and control of Anopheles, Aedes, Xenopsylla cheopis | |
| Unit 8: Animal Husbandry | 5 |
| Preservation and artificial insemination in cattle; Induction of early puberty | and |
| synchronization of estrus in cattle | |
| Unit 9: Poultry Farming | 5 |
| Principles of poultry breeding, Management of breeding stock and broilers | |
| Unit 10: Fish Technology | 5 |
| Concept of monoculture, polyculture, monosex culture, pen culture, cage culture, Induce | d |
| breeding and transportation of fish seed | |

APPLIED ZOOLOGY

PRACTICAL

(CREDITS 2)

- 1. Identification of *Plasmodium vivax*, *Entamoeba histolytica*, *Trypanosoma gambiense*, *Ancylostoma duodenale* and *Wuchereria bancrofti* and any of their life stages through permanent slides/photomicrographs or specimens.
- 2. Identification of arthropod vectors associated with human diseases: *Pediculus, Culex, Anopheles, Aedes* and *Xenopsylla*.
- 3. Study of insect damage to different plant parts/stored grains through damaged products/ photographs and submission of any three crop pest.
- 4. Identifying feature and economic importance of *Helicoverpa* (*Heliothis*) armigera, Papilio demoleus, Callosobruchus chinensis, Sitophilus oryzae and Tribolium castaneum
- 5. Submission of report on poultry farm/ animal breeding centre

- Park, K. (2007). Preventive and Social Medicine. XVI Edition. B.B Publishers.
- Arora, D. R and Arora, B. (2001). *Medical Parasitology*. II Edition. CBS Publications and Distributors.
- Kumar and Corton. Pathological Basis of Diseases.
- Atwal, A.S. (1986). Agricultural Pests of India and South East Asia, Kalyani Publishers.
- Dennis, H. (2009). Agricultural Entomology. Timber Press (OR).
- Hafez, E. S. E. (1962). Reproduction in Farm Animals. Lea & Fabiger Publisher
- Dunham R.A. (2004). Aquaculture and Fisheries Biotechnology Genetic Approaches.
 CABI publications, U.K.
- Pedigo, L.P. (2002). Entomology and Pest Management, Prentice Hall.

DCE 3

AQUATIC BIOLOGY

THEORY

(Credits 4)

UNIT 1: Aquatic Biomes

Brief introduction of the aquatic biomes: Freshwater ecosystem (lakes, wetlands, streams and rivers), estuaries, intertidal zones, oceanic pelagic zone, marine benthic zone and coral reefs.

UNIT 2: Freshwater Biology

Lakes: Lake as an Ecosystem, Physico–chemical Characteristics: Light, Temperature, Thermal stratification, Dissolved Solids, Carbonate, Bicarbonates, Phosphates and Nitrates, Turbidity; dissolved gases (Oxygen, Carbon dioxide). Nutrient Cycles in Lakes-Nitrogen, Sulphur and Phosphorous.

Streams: Physico-chemical environment, Adaptation of hill-stream fishes.

UNIT 3: Marine Biology

Salinity and density of Sea water, Continental shelf, Adaptations of deep sea organisms, Coral reefs.

UNIT 4: Management of Aquatic Resources

Causes of pollution: Agricultural, Industrial, Sewage, Thermal and Oil spills,

Eutrophication, Management and conservation (legislations), Sewage treatment

Water quality assessment- BOD and COD.

PRACTICAL

(Credits 2)

- 1. Determine the area of a pond using graphimetric and gravimetric method.
- 2. Identify the important zooplanktons present in a lake ecosystem.
- 3. Determine the amount of Dissolved Oxygen, Free Carbon dioxide, Total Alkalinity in water collected from a nearby lake/ water body.
- 4. Instruments used in limnology (Secchi disc, Van Dorn Bottle, Conductivity meter, Turbidity meter, PONAR grab sampler) and their significance.

- Anathakrishnan : Bioresources Ecology 3rd Edition
- Goldman : Limnology, 2nd Edition
- Odum and Barrett : Fundamentals of Ecology, 5th Edition
- Pawlowski : Physicochemical Methods for Water and Wastewater Treatment, 1st
 Edition
- Wetzel : Limnology, 3rd edition
- Trivedi and Goyal : Chemical and biological methods for water pollution studies
- Welch : Limnology Vols. I-II

DSE 4 IMMUNOLOGY

Unit 1: Overview of the Immune System

Introduction to basic concepts in immunology, components of immune system, principles of innate and adaptive immune system

Unit 2: Cells and Organs of the Immune System

Haematopoeisis, Cells of immune system and organs (primary and secondary lymphoid organs) of the immune system

Unit 3: Antigens

THEORY

Basic properties of antigens, B and T cell epitopes, haptens and adjuvants

Unit 4: Antibodies

Structure, classes and function of antibodies, monoclonal antibodies, antigen antibody interactions as tools for research and diagnosis

Unit 5: Working of the immune system

Structure and functions of MHC, exogenous and endogenous pathways of antigen presentation and processing, Basic properties and functions of cytokines, Complement system: Components and pathways (classical and alternate).

Unit 6: Immune system in health and disease

Gell and Coombs' classification and brief description of various types of hypersensitivities, Introduction to concepts of autoimmunity and immunodeficiency,

Unit 7: Vaccines

General introduction to vaccines, Various types of vaccines: Brief idea

(CREDITS 4)

10

8

8

8

. 12

10

4

IMMUNOLOGY

PRACTICAL

(CREDITS 2)

- 1. Demonstration of lymphoid organs
- 2. Histological study of spleen, thymus and lymph nodes through slides/ photographs
- 3. Preparation of stained blood film to study various types of leucocytes.
- 4. Ouchterlony's double immuno-diffusion method (demonstration).
- 5. ABO blood group determination.
- 6. Cell counting and viability test from splenocytes of farm bred animals/cell lines.
- 7. Demonstration of
 - a) ELISA
 - b) Immunoelectrophoresis

- Kindt, T. J., Goldsby, R.A., Osborne, B. A. and Kuby, J (2006). *Immunology*, VI Edition. W.H. Freeman and Company.
- David, M., Jonathan, B., David, R. B. and Ivan R. (2006). *Immunology*, VII Edition, Mosby, Elsevier Publication.
- Abbas, K. Abul and Lechtman H. Andrew (2003.) Cellular and Molecular Immunology. V Edition. Saunders Publication.
- Immunology and Immunotechnology (2005) Chakravarty A..K. (Oxford University Press).

DSE 5

REPRODUCTIVE BIOLOGY

THEORY

(CREDITS 4)

Unit 1: Reproductive Endocrinology

Gonadal hormones and mechanism of hormone action, steroids, glycoprotein hormones, and prostaglandins, hypothalamo – hypophyseal – gonadal axis, regulation of gonadotrophin secretion in male and female; Reproductive System: Development and differentiation of gonads, genital ducts.

Unit 2: Functional anatomy of male reproduction

Anatomy of male reproductive system in rat and human; Histoarchitecture of Testis, Spermatogenesis, Androgen synthesis and metabolism; Epididymal function and sperm maturation; Accessory glands functions.

Unit 3: Functional anatomy of female reproduction

Anatomy of female reproductive system in rat and human; Histoarchitecture of Ovary, folliculogenesis, ovulation, corpus luteum formation and regression; Steroidogenesis and secretion of ovarian hormones; Reproductive cycles (human) and their regulation, changes in the female tract; Ovum transport in the fallopian tubes; Sperm transport in the female tract, fertilization; Hormonal control of implantation; Hormonal regulation of gestation, pregnancy diagnosis, foeto – maternal relationship; Mechanism of parturition and its hormonal regulation; Lactation and its regulation

Unit 4: Reproductive Health

Infertility in male and female: causes, diagnosis and management; Assisted Reproductive Technology: sex selection, sperm banks, frozen embryos, in vitro fertilization, IUT, ICSI; Modern contraceptive technologies.

REPRODUCTIVE BIOLOGY

PRACTICAL

(CREDITS 2)

- 1. Report on an established animal house: set up and maintenance of animal house, breeding techniques, care of normal and experimental animals.
- 2. Examination of vaginal smear from live rats.
- 3. Demonstration of reproductive organs.
- 4. Identification of histological sections from photomicrographs/ permanent slides of rat/human: testis, epididymis and accessory glands of male reproductive systems; Sections of ovary, fallopian tube, uterus (proliferative and secretory stages), cervix and vagina.
- 5. Sperm count and sperm motility in rat (demonstration).

- Austin, C.R. and Short, R.V. reproduction in Mammals. Cambridge University Press.
- Degroot, L.J. and Jameson, J.L. (eds). Endocrinology. W.B. Saunders and Company.
- Knobil, E. et al. (eds). The Physiology of Reproduction. Raven Press Ltd.
- Hatcher, R.A. et al. The Essentials of Contraceptive Technology. Population Information Programme.

DSE 6

INSECT, VECTORS AND DISEASES

| THEORY | (Credits 4) |
|---|-------------|
| Unit I: Introduction to Insects | 6 |
| General Features of Insects, Morphological features, Head – Eyes, Types of antennae, Mouth parts w.r.t. feeding habits | f |
| Unit II: Concept of Vectors | 6 |
| Brief introduction of Carrier and Vectors (mechanical and biological vector) Reservoirs, Host-vector relationship, Adaptations as vectors, Host Specificity | , |
| Unit III: Insects as Vectors | 8 |
| Classification of insects up to orders, detailed features of orders with insects as vectors – Diptera, Siphonaptera, Siphunculata, Hemiptera | |
| Unit IV: Dipteran as Disease Vectors | 24 |
| Dipterans as important insect vectors - Mosquitoes, Sand fly, Houseflies; | |
| Study of mosquito-borne diseases – Malaria, Dengue, Chikungunya, Vira encephalitis, Filariasis; Control of mosquitoes | 1 |
| Study of sand fly-borne diseases – Visceral Leishmaniasis, Cutaneous Leishmaniasis, Phlebotomus fever; Control of Sand fly | 8 |
| Study of house fly as important mechanical vector, Myiasis, Control of house fly | |
| Unit IV: Siphonaptera as Disease Vectors | 6 |
| Fleas as important insect vectors; Host-specificity, Study of Flea-borne diseases - Plague, Typhus fever; Control of fleas | - |
| Unit V: Siphunculata as Disease Vectors | 4 |
| Human louse (Head, Body and Pubic louse) as important insect vectors; Study of louse-borne diseases –Typhus fever, Relapsing fever, Trench fever, Vagabond's disease, Phthiriasis; Control of human louse | |
| Unit VI: Hempitera as Disease Vectors | 6 |
| Bugs as insect vectors; Blood-sucking bugs; Chagas disease, Bed bugs as mechanical vectors, Control and prevention measures | 8 |

INSECT VECTORS AND DISEASES

PRACTICAL

(CREDITS 2)

- 1. Identification of different kinds of mouth parts of insects (from slides/ photographs)
- 2. Identification of following insect vectors through permanent slides/ photographs: Aedes, Culex, Anopheles, Pediculus humanus capitis, Pediculus humanus corporis, Phithirus pubis, Xenopsylla cheopis, Cimex lectularius, Phlebotomus argentipes, Musca domestica.,
- 3. Study of different diseases transmitted by above insect vectors
- 4. Submission of a project report on any one of the insect vectors and disease transmitted

SUGGESTED READINGS

- Imms, A.D. (1977). A General Text Book of Entomology. Chapman & Hall, UK

SKILL ENHANCEMENT COURSES

SEC 1

APICULTURE

(CREDITS 2)

(4)

(10)

Unit 1: Biology of Bees Classification and Biology of Honey Bees Social Organization of Bee Colony

Unit 2: Rearing of Bees Artificial Bee rearing (Apiary), Beehives – Newton and Langstroth Bee Pasturage Selection of Bee Species for Apiculture

| Bee Keeping Equipment Methods of Extraction of Honey (Indigenous and Modern) | |
|---|-----|
| Unit 3: Diseases and Enemies Bee Diseases and Enemies Control and Preventive measures | (5) |
| Unit 4: Bee Economy Products of Apiculture Industry and its Uses (Honey, Bees Wax, Propolis), Pollen etc | (2) |
| Unit 5: Entrepreneurship in Apiculture Bee Keeping Industry – Recent Efforts, Modern Methods in employing artificial Beehives for cross pollination in horticultural gardens | (4) |

SEC – 2

AQUARIUM FISH KEEPING

(CREDITS 2)

Unit1: Introduction to Aquarium Fish Keeping

The potential scope of Aquarium Fish Industry as a Cottage Industry, Exotic and Endemic species of Aquarium Fishes

Unit 2: Biology of Aquarium Fishes

Common characters and sexual dimorphism of Fresh water and Marine Aquariumfishes such as Guppy, Molly, Sword tail, Gold fish, Angel fish, Blue morph, Anemone fish and Butterfly fish

Unit 3: Food and feeding of Aquarium fishes

Use of live fish feed organisms. Preparation and composition of formulated fish feeds

Unit 4: Fish Transportation

Live fish transport - Fish handling, packing and forwarding techniques.

Unit 5: Maintenance of Aquarium

General Aquarium maintenance – budget for setting up an Aquarium Fish Farm as a Cottage Industry

SEC 3 MEDICAL DIAGNOSTICS

| THEORY (Cr | |
|---|----------|
| Unit 1: Introduction to Medical Diagnostics and its Importance | 2 |
| Unit 2: Diagnostics Methods Used for Analysis of Blood Blood composition, Preparation of blood smear and Differential Leucocyte Count (D.L.C) using Leishman's stain, Platelet count using haemocytometer, Erythrocyte Sedimentary Rate (E.S.R), Packed Cell Volume (P.C.V.) | 10 |
| Unit 3: Diagnostic Methods Used for Urine Analysis Urine Analysis: Physical characteristics; Abnormal constituents | 6 |
| Unit 4:Non-infectious Diseases Causes, types, symptoms, complications, diagnosis and prevention of Diabetes (Type and Type II), Hypertension (Primary and secondary), Testing of blood glucose using Glucometer/Kit (Principle) | 6 2 I |
| Unit 5: Infectious Diseases Causes, types, symptoms, diagnosis and prevention of Tuberculosis and Hepatitis | 3 |
| Unit 6: Tumours Types (Benign/Malignant), Detection and metastasis; Medical imaging: X-Ray of Bor fracture, PET, MRI and CT Scan (using photographs). | 3 ne |

1. Introduction

The syllabus for Zoology at undergraduate level using the Choice Based Credit system has been framed in compliance with model syllabus given by UGC.

The main objective of framing this new syllabus is to give the students a holistic understanding of the subject giving substantial weightage to both the core content and techniques used in Zoology.

Keeping in mind and in tune with the changing nature of the subject, adequate emphasis has been given on new techniques and understanding of the subject.

The syllabus has also been framed in such a way that the basic skills of subject are taught to the students, and everyone might not need to go for higher studies and the scope of securing a job after graduation will increase.

There is wide deviation in the infrastructure, be it physical or in human resource, in the form of teachers' expertise and ability and aspiration of the students. Hence, University is free to choose the Electives as per their infrastructural strengths and offer at least 6 to 7 electives

While the syllabus is in compliance with UGC model curriculum, it is necessary that Zoology students should learn "Immunology" as one of the core courses rather than as elective. Also, an important discipline specific elective on "Microbiology" has been added.

Project Work may be introduced instead of the 4th Elective with a credit of 6 split into 2+4, where 2 credits will be for continuous evaluation and 4 credits reserved for the merit of the dissertation.

2. Scheme for CBCS Curriculum

2.1.Credit Distribution across Courses

| Course Type | Number of Courses | Credits | | |
|---|-------------------|----------|-----------|--------------------|
| | | Theory | Practical | Theory + Practical |
| Core Courses | 14 | 14×4 =56 | 14×2 =28 | 84 |

3. Core Subjects Syllabus

3.1. Core T1 –Non-Chordates I

| Non-Chordates I | | |
|--|------------------|--------|
| | 4 Credits | Class |
| | | |
| Unit 1: Basics of Animal Classification | | 4 |
| Definitions: Classification, Systematics and Taxonomy; Levels of Taxonomy: Alpha, Bet Taxonomic Hierarchy, Taxonomic types: Primary, Secondary (Definition) | ta & Gamma Taxo | onomy; |
| Codes of Zoological Nomenclature; Principle of priority; Synonymy and Homonymy concept of classification (Whittaker and Carl Woese) | kingdom | |
| Unit 2: Protista and Metazoa | | 15 |
| Protozoa | | |
| General characteristics and Classification up to phylum (according to Levine et. al., 1981), Locomotion in <i>Euglena</i> , <i>Paramoecium</i> and <i>Amoeba</i> ; Conjugation in <i>Paramoecium</i> . | | |
| Life cycle and pathogenicity of Plasmodium vivax and Entamoeba histolytica | | |
| Metazoa | | |
| Evolution of symmetry and segmentation of Metazoa | | |
| Unit 3: Porifera | | 6 |
| General characteristics and Classification up to classes; Cell types, Spicules and Canal sy | ystem in sponges | |
| Unit 4: Cnidaria | | 10 |
| General characteristics and Classification up to classes Metagenesis in Obelia | | |
| Polymorphism in Cnidaria | | |
| Corals and coral reef diversity, function & conservation | | |
| Unit 5: Ctenophora | | 2 |

| General characteristics | | |
|--|---|--|
| Unit 6: Platyhelminthes | 6 | |
| General characteristics and Classification up to classes | | |
| Life cycle of Fasciola hepatica and Taenia solium | | |
| Unit 7: Nematoda | 7 | |
| General characteristics and Classification up to classes | | |
| Life cycle, of Ascaris lumbricoides and Wuchereria bancrofti | | |
| Parasitic adaptations in helminthes | | |
| Reference Books | | |
| Ruppert and Barnes, R.D. (2006). Invertebrate Zoology, VIII Edition. Holt Saunders International Entric | | |
| Edition. Invertebrates by Brusca & Brusca. Second edition, 2002. | | |

Classification for metazoans to be followed from: Rupert and Barnes, 1994, 6th Edition.

3.2. Core P1 –Non-Chordates I Lab

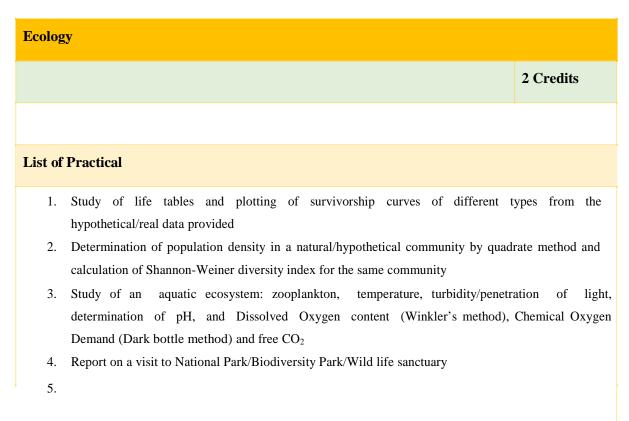

| Non-C | hordates I | |
|---------|--|-----------|
| | | 2 credits |
| | | |
| List of | Practical | |
| 1. | Preparation of whole mount of Euglena/ Amoeba / Paramoecium | |
| | 2. Identification with reasons: Amoeba, Euglena, Tetranucleate stage of En. Paramecium, trophozoite stage/ signet ring stage of Plasmodium (from the prepared | |
| 3. | Identification with reasons: Sycon, Neptune's Cup, Obelia, Physalia, Millepora, Aurelia, Tubipora, | |
| | Corallium, Alcyonium, Gorgonia, Metridium, Pennatula, Fungia, Meandrina, Madre | pora |
| 4. | Spot identification of adult Fasciola hepatica, Taenia solium and Ascaris lumbricoid | des |
| | Staining/mounting of any protozoa/helminth from gut of cockroach | |

3.3. Core T2 – Ecology

| Isory of ecology, Autecology and synecology, Levels of organization, Laws of limiting actors, Study of Physical factors (light and temperature), The Biosphere - Introduction.20Unit 2: Population20Unitary and Modular populations Unique and group attributes of population: Demographic factors, life tables, fecundity tables Definitions), survivorship curves, dispersal and dispersion.20Exponential and logistic growth, equation and patterns, r and k strategies Population regulation - lensity-dependent and independent factors11Community characteristics: species diversity, abundance, , dominance, richness, Vertical stratification, Ecotone and edge effect. Ecological succession with one example10Cypes of ecosystem with an example in detail, Food chain: Detritus and grazing food chains, Linear and Y-shaped food chains, Food web, Energy flow through the ecosystem, Ecological pyramids and accological efficiencies10Nutrient and biogeochemical cycle with an example of Nitrogen cycle tuman modified ecosystem10 | Ecology | |

3.4. Core P2 – Ecology Lab

3.5. Core T3 - Non-Chordates II

| Non-Chordates II | |
|--|-------|
| 4 Credits | Class |
| | |
| Unit 1: Introduction | 2 |
| Evolution of coelom and metamerism | |
| Unit 2: Annelida | 10 |
| General characteristics and Classification up to classes | |
| Excretion in Annelida through nephridia, locomotion in Nereis | |
| Metamerism in Annelida. | |
| Unit 3:Arthropoda | 16 |
| General characteristics and Classification up to classes | |
| Vision in Insecta only. | |
| Respiration in Arthropoda (Gills in prawn and trachea in cockroach) | |
| Metamorphosis in Lepidopteran Insects. | |
| Unit 4: Onychophora | 2 |
| General characteristics and Evolutionary significance; and affinities of <i>Peripatus</i> . | |
| Unit 5: Mollusca | 10 |
| General characteristics and Classification up to classes | |
| Nervous system and torsion and detorsion in Gastropoda | |
| Respiration in <i>Pila</i> sp; Evolutionary significance of trochophore larva. | |
| Unit 6: Echinodermata | 8 |
| General characteristics and Classification up to classes | |
| Water-vascular system in Echinodermata, Larval forms in Echinodermata, Affinities with Chordates | s |

| | Page17 |
|--|--------|
| Unit 7: Hemichordata | 2 |
| General characteristics of phylum Hemichordata. Relationship with non-chordates and chordates | |
| Reference Books | |
| Ruppert and Barnes, R.D. (2006). Invertebrate Zoology, VIII Edition. Holt Saunders International Edition | |
| ► TheInvertebrates: A New Synthesis, III Edition, Blackwell Science | |

Note: Classification to be followed from Rupert and Barnes, 1994, 6th Edition / Brusca and Brusca 2003.

3.6. Core P3–Non-Chordates II

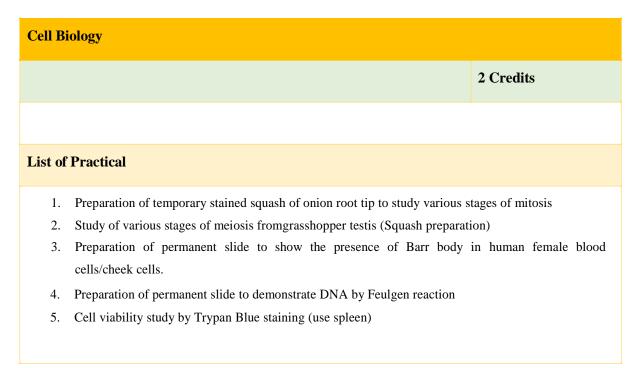

| Non-C | hordates II |
|----------|---|
| | 2 Credits |
| | |
| List of | Practical |
| 1. | Identification with reasons: a. Annelids - Aphrodite, Nereis/Heteronereis, Sabella, Chaetopterus, Pheretima, Hirudinaria b. Arthropods - Limulus, Palamnaeus, Palaemon, Daphnia, Balanus, Sacculina, Cancer, Eupagurus, Scolopendra, Julus, Bombyx, Periplaneta, termites and honey bees Onychophora - Peripatus c. Molluscs - Chiton, Dentalium, Pila, Doris, Helix, Unio, Ostrea, Sepia, Octopus, Nautilus d. Echinodermates - Pentaceros/Asterias, Ophiura, Clypeaster (Sand Dollars), Echinus, Cucumaria and Antedon e. Hemichordates- Balanoglossus |
| 2. | Study of digestive system, septal nephridia, pharyngeal naphridia of earthworm (chart/model) |
| 3. | Identification of T.S. through pharynx, gizzard, and typhlosolar intestine of earthworm |
| 4. 5. | Mounting of mouth parts and dissection of digestive system and nervous system of <i>Periplaneta</i> To submit a Project Report on any related topic to larval forms (crustacean, mollusc and echinoderm) |

3.7. Core T4 - Cell Biology

| Cell Biology | | |
|--|-----------------|-------|
| | 4 Credits | Class |
| | | |
| Unit 1: Overview of Cells | | 2 |
| Basic structure of Prokaryotic and Eukaryotic cells, Viruses, Viroid, Prion and Myco | plasma | |
| Unit 2: Plasma Membrane | | 6 |
| Ultra structure and composition of Plasma membrane: Fluid mosaic model | | |
| Transport across membrane: Active and Passive transport, Facilitated transport | | |
| Cell junctions: Tight junctions, Gap junctions, Desmosomes | | |
| Unit 3: Cytoplasmic organelles I | | 5 |
| Structure and Functions: Endoplasmic Reticulum, Golgi Apparatus, Lysosomes | | |
| Protein sorting and mechanisms of vesicular transport | | |
| Unit 4: Cytoplasmic organelles II | | 6 |
| Mitochondria: Structure, Semi-autonomous nature, Endosymbiotic hypothesis | , Mitochondrial | |
| Respiratory Chain, Chemi-osmotic hypothesis Peroxisomes: Structure and Functions | | |
| Centrosome: Structure and Functions | | |
| Unit 5: Cytoskeleton | | 5 |
| Types and function of cytoskeleton, structure of microtubules and microfilaments | | |
| Accessory proteins of microfilament & microtubule | | |
| A brief idea about molecular motors | | |
| Unit 6: Nucleus | | 8 |
| Structure of Nucleus: Nuclear envelope, Nucleolus | | |
| Chromatin: Euchromatin and Hetrochromatin and packaging (nucleosome) | | |
| | | |

| Unit 7: Cell Division | 10 |
|--|----|
| Cell cycle and its regulation, Cancer (Concept of oncogenes and tumor suppressor genes). Mitosis and Meiosis: Basic process and their significance | |
| | |
| Unit 8: Cell Signaling | 8 |
| Cell signalling transduction pathways; Types of signaling molecules and receptors | |
| GPCR and Role of second messenger (cAMP), Protein kinase and Ca ⁺² | |
| Apoptosis and Necrosis- brief idea | |
| Reference Books | |
| ► Lewin's Cells – 3rd Edition – Cassimeris/Lingappa/Plopper – Johns & Bartlett Publishers | |
| Biology of Cancer by Robert. A. Weinberg. 2nd edition. Cooper, G.M. and Hausman, P.E. (2000). The Call: A Molecular Approach. V. Edition. | |
| Cooper, G.M. and Hausman, R.E. (2009). The Cell: A Molecular Approach. V Edition. ASM Press and Sunderland, Washington, D.C.; Sinauer Associates, MA. | |
| Bruce Albert, Bray Dennis, Levis Julian, Raff Martin, Roberts Keith and Watson James (2008). Molecular Biology of the Cell, V Edition, Garland publishing Inc., New York and London. | |

3.8. Core P4–Cell Biology Lab

3.9. Core T5 - Chordates

| Chordates | | |
|--|---------------------|--------|
| | 4 Credits | Class |
| | | |
| Unit 1: Introduction to Chordates | | 2 |
| General characteristics and outline classification of Phylum Chordata (upto class leve | el) | |
| Unit 2: Protochordata | | 6 |
| General characteristics and classification of sub-phylum Urochordata and Cephal Classes. Retrogressive metamorphosis in <i>Ascidia</i> . General organization and Feeding | - | |
| Unit 3: Origin of Chordata | | 2 |
| Dipleurula concept and the Echinoderm theory of origin of chordates | | |
| Advanced features of vertebrates over Protochordata | | |
| Unit 4: Agnatha | | 2 |
| General characteristics and classification of cyclostomes up to order, Metamorphosis importance of ammocoete larva | s in Lamprey, Zoolo | ogical |
| Unit 5: Pisces | | 6 |
| General characteristics and classification of Chondrichthyes and Osteichthyes up to S | Subclasses | |
| Accessory respiratory organ, migration and parental care in fishes | | |
| Swimbladder in fishes. | | |
| Unit 6: Amphibia | | 6 |
| General characteristics and classification up to living Orders. | | |
| Parental care in Amphibia, Metamorphosis in toad, Neoteny and paedogenesis | | |
| Unit 7: Reptilia | | 8 |
| General characteristics and classification up to living Orders. | | |
| Poison apparatus and Biting mechanism in poisonous Snakes | | |

| Unit | 8: Aves | 8 |
|--------|--|---|
| Gener | al characteristics and classification up to Sub-Classes | |
| Exosk | eleton, migration and double respiration in Birds | |
| Princi | ples and aerodynamics of flight | |
| Unit | 9: Mammals | 8 |
| Gener | al characters and classification up to living orders | |
| Affini | ties of Prototheria | |
| Exosk | eletal derivatives of mammals | |
| Adapt | ive radiation in mammals with reference to locomotory appendages | |
| - | ocation in Micro chiropterans and Cetaceans | |
| Lenor | | |
| Unit | 10: Zoogeography | 2 |
| - | ographical realms, Plate tectonic and Continental drift theory, distribution of birds and hals in different realms | |
| Refe | rence Books | |

Note: Classifications for Protochordata, Agnatha, Reptilia, Aves and Mammalia to be followed from Young (1981), for Pisces to be followed from Romer (1959), for Amphibia to be followed from Duellman and Trueb (1986)/ Young (1981).

3.10. Core P5–Chordates Lab

| Chord | ates | |
|---------|--|-----------------------------|
| | | 2 Credits |
| | | |
| List of | Practical | |
| | Identification with reasons: | |
| 1. | Protochordata | |
| | Herdmania, Branchiostoma | |
| 2. | Agnatha | |
| | Petromyzon, Myxine | |
| 3. | Fishes | |
| | Scoliodon, Sphyrna, Torpedo, Heteropneustes, Labeo, Exocoetus, Echen | eis, Anguilla, Hippocampus, |
| | Tetrodon/ Diodon-, Anabas, Flat fish | |
| 4. | Amphibia | |
| | Necturus, Axolotl,- Tylototriton, Bufo, Hyla | |
| 5. | Reptilia | |
| | | eleon- Draco, Bungarus,- |
| | Vipera, Naja, Hydrophis, - Crocodylus. | |
| | Key for Identification of poisonous and non-poisonous snakes | |
| 6. | Mammalia: Bat (Insectivorous and Frugivorous), Funambulus | |
| 7. | Mounting of pecten from Fowl head | |
| 8. | Dissection of brain and pituitary of Tilapia/carp. | |

3.11. Core T6 - Animal Physiology: Controlling & Coordinating Systems

| Animal Physiology: Controlling & Coordinating Systems | |
|--|-------|
| 4 Credits | Class |
| | |
| Unit 1: Tissues | 4 |
| Structure, location, classification and functions of epithelial tissue, connective tissue, muscular tissue and nervous tissue | |
| Unit 2: Bone and Cartilage | 4 |
| Structure and structural types of bones and cartilages, Ossification | |
| Unit 3: Nervous System | 10 |
| Structure and types of neuron, resting membrane potential, Origin of action potential and it propagation across the myelinated and unmyelinated nerve fibers; Types of synapse, Synapti transmission and Neuromuscular junction; Reflex action and its types | |
| Unit 4: Muscular system | 10 |
| Histology of different types of muscle; Ultra structure of skeletal muscle; Molecular and chemical basis of skeletal muscle contraction; Characteristics of muscle fibre: muscle twitch, tetanus. | |
| Unit 5: Reproductive System | 6 |
| Histology of testis and ovary | |
| Roles of Hormones in Reproduction including placental hormones | |
| Unit 6: Endocrine System | 16 |
| Histology and function of pituitary, thyroid, pancreas and adrenal | |
| Classification of hormones; Mechanism of Hormone action | |
| Signal transduction pathways for Steroidal, Protein and peptide hormones Hypothalamus (neuroendocrine gland) - principal nuclei involved in neuroendocrine control of anterior pituitary and endocrine system | |

Reference Books

- ► Histology: A Text and Atlas. Sixth Edition. Ross & Pawlina. Lippincott Williams & Wilkins.
- ► Eckert Animal Physiology by David Randall and Warren Burggren. 4th edition. W. H. Freeman.

3.12. Core P6–Animal Physiology: Controlling & Coordinating Systems Lab

| | al Physiology: Controlling & Coordinating Systems |
|----|--|
| | 2 Credits |
| | |
| 1. | Practical Demonstration of the unconditioned reflex action (Deep tendon reflex such as knee jerk reflex),/Recording of simple muscle twitch with electrical stimulation (or Virtual) |
| 2. | Preparation of temporary mounts: Squamous epithelium, / Striated muscle fibres |
| 3. | Identification of permanent slides of Mammalian skin, Cartilage, Bone, Spinal cord, Nerve cell, |
| | Pituitary, Pancreas, Testis, Ovary, Adrenal, Thyroid and Parathyroid |
| | Microtomy: Preparation of permanent slide of any five mammalian (Goat/white rat) tissues |

3.13. Core T7 - Genetics

| Genetics | |
|---|-------|
| 4 Credits | Class |
| | |
| Unit 1: Mendelian Genetics and its Extension | 10 |
| Principles of inheritance, Incomplete dominance and co-dominance, Epistasis Multiple alleles, Lethal alleles, Pleiotropy, | |
| Sex-linked, sex- influenced and sex-limited inheritance, Polygenic Inheritance. | |
| Unit 2: Linkage, Crossing Over and Chromosomal Mapping | 10 |
| Linkage and Crossing Over, molecular mechanism of crossing over (Holliday model), Measuring Recombination frequency and linkage intensity using three factor crosses, Interference and coincidence | |
| Unit 3: Mutations | 10 |
| Types of gene mutations (Classification), Types of chromosomal aberrations (Classification with one suitable example of each), Non-disjunction and variation in chromosome number; Molecular basis of mutations in relation to UV light and chemical mutagens | |
| Unit 4: Sex Determination | 8 |
| Mechanisms of sex determination in Drosophila | |
| Sex determination in mammals | |
| Dosage compensation in Drosophila & Human | |
| Unit 5: Extra-chromosomal Inheritance | 4 |
| Criteria for extra chromosomal inheritance, Antibiotic resistance in Chlamyadomonas, | |
| Kappa particle in Paramoecium | |
| Shell spiralling in snail | |
| Unit 6: Recombination in Bacteria and Viruses | 6 |
| Conjugation, Transformation, Transduction, Complementation test in Bacteriophage | |

3.14. Core P7–Genetics Lab

| Genetics | |
|--|-----------|
| | 2 Credits |
| | |
| List of Practical | |
| 1. Chi-square analyses | |
| 2. Linkage maps based on conjugation | |
| 3. Identification of chromosomal aberration in <i>Drosophila</i> and man from phot | ograph |
| 4. Pedigree analysis of some human inherited traits | |

| Comparative Anatomy of Vertebrates | |
|--|--------------|
| 4 C | Credits Clas |
| | |
| Unit 1: Integumentary System | 6 |
| Structure, function and derivatives of integument in birds and mammals | |
| Unit 2: Skeletal System | 6 |
| Overview of axial and appendicular skeleton; Jaw suspension; Visceral arches. | |
| Unit 3: Digestive System | 8 |
| Comparative anatomy of stomach in birds and mammals; dentition in mammals | |
| Unit 4: Respiratory System | 6 |
| Respiratory organs in fish, amphibian, birds and mammals | |
| Unit 5: Circulatory System | 8 |
| General plan of circulation, Comparative account of heart and aortic arches | |
| Unit 6: Urinogenital System | 6 |
| Succession of kidney, Evolution of urinogenital ducts | |
| Unit 7: Nervous System | 6 |
| Comparative account of brain, Cranial nerves in mammals | |
| Unit 8: Sense Organs | 4 |
| Classification of receptors | |
| Reference Books | |
| Kardong, K.V. (2005) Vertebrates' Comparative Anatomy, Function and H IV Edition. McGraw-Hill Higher Education | Evolution. |

 - Ltd.

3.16. Core P8–Comparative Anatomy of Vertebrates

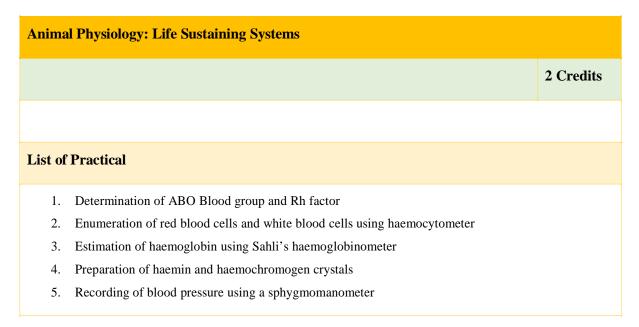

| 2 Credits List of Practical 1. Study of placoid, cycloid and ctenoid scales through permanent slides/photographs | Comparative Anatomy of Vertebrates | | |
|--|------------------------------------|-----------|--|
| | | 2 Credits | |
| | | | |
| 1. Study of placoid, cycloid and ctenoid scales through permanent slides/photographs | List of Practical | | |
| Study of disarticulated skeleton of Toad, Pigeon and Guineapig Identification of skulls: <i>Trionix</i>, <i>Calotes</i>, Guineapig and Dog Dissection of Tilapia/ Carp/ Rat: Circulatory system, Origin and distribution of 9th and 10th cranial nerve | | | |

3.17. Core T9 - Animal Physiology: Life Sustaining Systems

| Animal Physiology: Life Sustaining Systems | | |
|--|---------------|------|
| | 4 Credits | Clas |
| | | |
| Unit 1: Physiology of Digestion | | 12 |
| Structural organisation and functions of Gastrointestinal tract and Associated glands chemical digestion and absorption of Carbohydrates, Lipids, and Proteins ; Digestion and absorption of Carbohydrates, Lipids, and Proteins ; Digestion and absorption of Carbohydrates, Lipids, and Proteins ; Digestion and absorption of Carbohydrates, Lipids, and Proteins ; Digestion and absorption of Carbohydrates, Lipids, and Proteins ; Digestion and absorption and absorption and carbohydrates, Lipids, and Proteins ; Digestion and absorption and carbohydrates, Lipids, and Proteins ; Digestion and carbohydrates, and proteins ; Digestion and proteins ; Digest | | |
| Unit 2: Physiology of Respiration | | 10 |
| Mechanism of Respiration, Respiratory volumes and capacities, transport of Oxygen and Carbon dioxide in blood, Dissociation curves and the factors influencing it, types of respiratory pigments; Carbon monoxide poisoning | | |
| Unit 3: Physiology of Circulation | | 12 |
| Components of Blood and their functions; Structure and functions of haemoglobin | | |
| Haemostasis; Blood clotting system, Fibrinolytic system | | |
| Haemopoiesis; Basic steps and its regulation | | |
| Blood groups; ABO and Rh factor | | |
| Unit 4: Physiology of Heart | | 8 |
| Structure of mammalian heart with special reference to human, Coronary Circulation, | Structure and | |
| working of conducting myocardial fibres, Origin and conduction of cardiac impulses | | |
| Cardiac Cycle and cardiac output | | |
| Blood pressure and its regulation | | |
| Unit 5: Thermoregulation & Osmoregulation | | |
| Physiological classification based on thermal biology. | | |
| Thermal biology of endotherms | | |
| Osmoregulation in aquatic vertebrates | | |

| Extrar | enal osmoregulatory organs in vertebrates | |
|--------|--|---|
| Unit | 6: Renal Physiology | 8 |
| | are of Kidney and its functional unit, Mechanism of urine formation, counter current nism for formation of concentrated urine, Regulation of acid-base balance | |
| Refer | ence Books | |

3.18. Core P9–Animal Physiology: Life Sustaining Systems Lab

3.19. Core T10 - Fundamentals of Biochemistry

| Fundamentals of Biochemistry | |
|--|------------------------------|
| 4 Credits | Clas |
| | |
| Unit 1: Carbohydrates | 8 |
| Structure and Biological importance: Monosaccharides, Disaccharides, Polysaccharide | es; |
| Carbohydrate metabolism: Glycolysis, Citric acid cycle, Pentose phosphate pathway, G | Gluconeogenesis |
| Unit 2: Lipids | 7 |
| Structure and Significance: Physiologically important saturated and unsaturated acylglycerols, Phospholipids, Sphingolipid, Glycolipids, Steroids, Eicosanoids and ter | • |
| Lipid metabolism: definition of alpha and omega oxidation; β -oxidation of saturated acids; Fatty acid biosynthesis | l and even carbon-chain fatt |
| Unit 3: Proteins | 10 |
| Amino acids | |
| Structure, Classification, General and Electro chemical properties of α -amino acid | ls; |
| Proteins | |
| Bonds stabilizing protein structure; Levels of organization: primary, secondary, tertiar plot | y, quaternary, Ramachandr |
| Protein metabolism: Transamination, Deamination,, Urea cycle, | |
| Unit 4: Nucleic Acids | 10 |
| Structure: Purines and pyrimidines, Nucleosides, Nucleotides, Nucleic acids | |
| Types of DNA and RNA, Complementarity of DNA, Hpyo- Hyperchromaticity of DN | A |
| Unit 5: Enzymes | 13 |
| Nomenclature and classification; Cofactors; Specificity of enzyme action; Isozyme enzyme action; Enzyme kinetics; Derivation of Michaelis-Menten equation, Linew | |
| | |

| noncompetitive); Allosteric enzymes and their kinetics; Strategy of enzyme action- Catalytic and Regulatory (Basic concept with one example each) Unit 5: Oxidative Phosphorylation Redox systems; Review of mitochondrial respiratory chain, ATP synthesis, Inhibitors and un-couplers of Electron Transport System Reference Books Cox, M.M and Nelson, D.L. (2008). Lehninger's Principles of Biochemistry, V Edition, W.H. Freeman and Co., New York. Berg, J.M., Tymoczko, J.L. and Stryer, L. (2007). Biochemistry, VI Edition, W.H. Freeman and Co., New York. 3.20. Core P10 – Fundamentals of Biochemistry Lab

| Fundamentals of Biochemistry | | |
|------------------------------|--|-----------|
| | | 2 Credits |
| | | |
| List of | Practical | |
| 1. | Qualitative tests of functional groups in carbohydrates (Molisch's Test, Iod Benedict's Test,Barfoed's Test,Seliwanoff's Test), proteins (Biuret test,Mi (safonification). | |
| 2. | Paper & TLC chromatography of amino acids. | |
| 3. | Quantitative estimation of proteins Lowry Method | |
| 4. | Demonstration of proteins separation by SDS-PAGE | |
| 5. | To study the enzymatic activity of salivary amylase | |
| | | |
| | | |
| | | |

Molecular Biology 4 Credits Class **Unit 1: Nucleic Acids** 5 Salient features of DNA and RNA Watson and Crick Model of DNA, Clover leaf model of tRNA 10 **Unit 2: DNA Replication** Mechanism of DNA Replication in Prokaryotes, Semi-conservative, bidirectional and discontinuous ReplicationRNA priming, Inhibitors of replication 10 **Unit 3: Transcription** Mechanism of Transcription in prokaryotes Inhibitors of transcription **Unit 4: Translation** 12 Mechanism of protein synthesis in prokaryotes, Ribosome structure and assembly in prokaryotes, fidelity of protein synthesis, aminoacyl tRNA synthetases and charging of tRNA; Proteins involved in initiation, elongation and termination of polypeptide chain; Genetic code, Degeneracy of the genetic code and Wobble Hypothesis; Inhibitors of protein synthesis **Unit 5: Gene Regulation** 4 Regulation of Transcription in prokaryotes: *lac* operon and *trp* operon;

3.21. Core T11 - Molecular Biology

| Unit 6: DNA Repair Mechanisms | 4 |
|--|---|
| Types of DNA repair mechanisms, RecBCD model in prokaryotes, nucleotide and base excision repair, SOS repair | |
| Unit 7: Molecular Techniques | 5 |
| Basic Principles of PCR, Western and Southern blot, Northern Blot, Sanger DNA sequencing | |
| Reference Books | |
| ► Molecular Cell Biology by Harvey Lodish. 7 th Edition. W.H. Freeman. | |
| ► Molecular Biology of The Gene by Watson. 7 th Edition. Pearson. | |
| ► iGenetics: A Molecular Approach by Peter. J. Russell. 3 rd edition. Pearson Benjamin | |
| Cummings. | |

3.22. Core P11–Molecular Biology Lab

3.23. Core T12 - Immunology

| Immunology | | |
|---|---------------|-------|
| | 4 Credits | Class |
| | L | |
| Unit 1: Overview of Immune System | | 2 |
| Basic concepts of health and diseases, Historical perspective of Immunology, Cells and Immune system | organs of the | |
| Unit 2: Innate and Adaptive Immunity | | 12 |
| Anatomical barriers, Inflammation, Cell and molecules involved in innate immunity, Adaptive im (Cell mediated and humoral). Structure of B and T cell Receptor and its signalling, T cell development & | | |
| Unit 3: Antigens | | 4 |
| Antigenicity and immunogenicity, Immunogens, Adjuvants and haptens, Factors immunogenicity, B and T-Cell epitopes | influencing | |
| Unit 4: Immunoglobulins | | 8 |
| Structure and functions of different classes of immunoglobulins, Antigen- antibody Immunoassays (ELISA and RIA), Hybridoma technology, Monoclonal antibody produc | | |
| Unit 5: Major Histocompatibility Complex | | 2 |
| Structure and functions of MHC molecules. | | |
| Unit 6: Cytokines | | 2 |
| Types, properties and functions of cytokines. | | |
| Unit 7: Complement System | | 6 |
| Components and pathways of complement activation (Classical & alternative). | | |
| Unit 8: Hypersensitivity | | 4 |

| Gell a | nd Coombs' classification and brief description of various types of hypersensitivities. | |
|--------|--|---|
| Unit | 9: Immunology of disease | 6 |
| Malaı | ia | |
| Unit | 10: Vaccines | 4 |
| Vario | us types of vaccines. Active & passive immunization (Artificial and natural). | |
| Refe | rence Books | |

- David Male Jonathan Brostoff David Roth Ivan Roitt (2012). Immunology 8th Edition, Elsevier

3.24. Core P12–Immunology Lab

| Immunology | |
|---|-----------|
| | 2 Credits |
| | |
| List of Practical | |
| 1. Demonstration of lymphoid organs. | |
| 2. Identification of spleen, thymus and lymph nodes through slides/ photo | graphs |
| 3. Preparation of stained blood film to study various types of leukocytes | |
| 4. Lymphocyte separation from spleen | |
| 5. Demonstration of ELISA | |
| | |

3.25. Core T13 - Developmental Biology

| Developmental Biology | |
|--|-------|
| 4 Credits | Class |
| | |
| Unit 1: Introduction | 2 |
| Basic concepts: Phases of Development, Cell cell interaction, Differentiation and growth, Differential gene expression | |
| Unit 2: Early Embryonic Development | |
| Gametogenesis, Spermatogenesis, Oogenesis; Types of eggs, Egg membranes; Fertilization (External (Sea urchin) and Internal (mammal)): Changes in gametes, Blocks to polyspermy; Planes and patterns of cleavage; Types of Blastula; Fate maps (including Techniques); Early development of frog and chick up to gastrulation; Embryonic induction and organizers | |
| Unit 3: Late Embryonic Development | 8 |
| Fate of Germ Layers; Extra-embryonic membranes in chick; Implantation of embryo in humans, Placenta (Structure, types and functions of placenta) | |
| Unit 4: Post Embryonic Development | 12 |
| Development of brain and Eye in chick | |
| Regeneration: Modes of regeneration, epimorphosis, morphallaxis and compensatory regeneration (with one example each) | |
| Unit 5: Implications of Developmental Biology | 8 |
| Teratogenesis: Teratogenic agents and their effects on embryonic development; In vitro fertilization, Stem cell (ESC), Amniocentesis | |
| Reference Books | |
| Gilbert, S. F. (2010). Developmental Biology, IX Edition, Sinauer Associates, Inc., Publishers, Sunderland, Massachusetts, USA Slack JMW, Essential Developmental Biology | |

3.26. Core P13–Developmental Biology Lab

| Develo | pmental Biology | |
|---------|---|---------------------------|
| | | 2 Credits |
| | | |
| List of | Practical | |
| 1. | Preparation of whole mount of different developmental stages of chick | |
| 2. | Identification of whole mounts of developmental stages of chick through | igh permanent slides: 24, |
| | 48, 72, and 96 hours of incubation (Hamilton and Hamburger stages) | |
| 3. | Study of the developmental stages and life cycle of Drosophila from stock | culture |
| 4. | Demonstration of male gametes of rat. | |
| 5. | Project report on Drosophila culture/chick embryo development | |

| 3.27. | Core T14–Evolutionary Biology & Biostatistics | |
|------------|---|--|
| olutionary | Biology | |

| Evolutionary Biology | | |
|---|----------------------|-------|
| | 4 Credits | Class |
| | | |
| Unit 1 | | 5 |
| Origin of life, RNA world | | |
| Unit 2 | | 5 |
| Historical review of Evolutionary concepts, Lamarkism, Darwinism and Neo Darw | inism | |
| Unit 3 | | 6 |
| Geological time scale, Evolution of horse, Phylogenetic trees and their interpretate divergent evolution | ions, convergent and | |
| Neutral theory of molecular evolution, Molecular clock | | |
| Unit 4 | | 5 |
| Sources of variations: Heritable variations and their role in evolution | | |
| Unit 5 | | 12 |
| Population genetics: Hardy-Weinberg Law (statement and derivation of equation law to biallelic Population); Evolutionary forces upsetting H-W equilibrius (concept of fitness, types of selection, selection coefficient, mode of select superiority). | m; Natural selection | |
| Genetic Drift mechanism (founder's effect, bottleneck phenomenon) | | |
| Role of Migration and Mutation in changing allele frequencies. | | |
| Unit 6 | | 6 |
| Species concept, Isolating mechanisms, modes of speciation | | |
| Adaptive radiation/macroevolution (exemplified by Galapagos finches) | | |
| | | |

| Unit 7 | 2 |
|--|------------|
| Extinctions, Back ground and mass extinctions (causes and effects), detailed example of K-T extinction | |
| Unit 8 Biostatistics | 9 |
| Central tendencies, Measures of dispersion (Variance, Standard daviation, Standard error) Correlation ar regression, T test | ıd |
| Reference Books | |

| ► K. S. Negi. 2002. Biostatistics. AITBS publishers, New Dilhi. | |

3.28. Core P14–Evolutionary Biology Lab

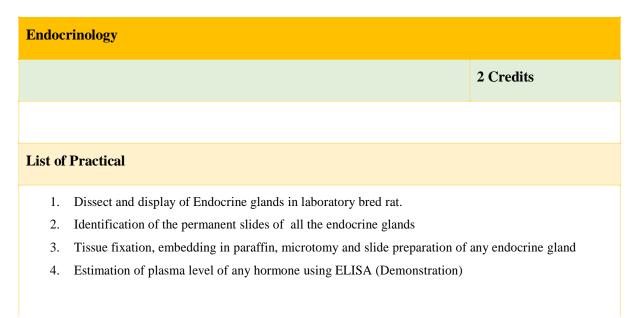

| Evolut | ionary Biology | |
|---------|---|-----------------------|
| | | 2 Credits |
| | | |
| List of | Practical | |
| 1. | Study of vertebrate fossils from models/ pictures (upto class) | |
| 2. | Study of homology and analogy from suitable specimens /Photographs/ mo | dels |
| 3. | Study and verification of Hardy-Weinberg Law by chi square analysis | |
| 4. | Graphical representation and interpretation (correlation and regression | n) of data of height/ |
| | weight of a sample of 100 humans in relation to their age and sex, | |

4. Department Specific Electives Subjects Syllabus

4.1. DSE T1 -Endocrinology

| Endocrinology | |
|--|-------|
| 4 Credits | Class |
| | |
| Unit 1: Introduction to Endocrinology | 4 |
| General idea of Endocrine systems, Classification, Characteristic and Transport of Hormone Neurosecretions and Neurohormones | s, |
| Unit 2: Epiphysis, Hypothalamo-hypophysial Axis | 16 |
| Structure of pineal gland, Secretions and their functions in biological rhythms and reproduction. Structure and functions of hypothalamus and Hypothalamic nuclei, Regulation of neuroendocrin glands, Feedback mechanisms | e |
| Structure of pituitary gland, Hormones and their functions, Hypothalamo-hypophysial portal systen Disorders of pituitary gland. | 1, |
| Unit 3: Peripheral Endocrine Glands | 16 |
| Structure, Hormones, Functions and Regulation of Thyroid gland, Parathyroid, Adrenal, Pancrea Ovary and Testis | s, |
| Hormones in Calcium and glucose homeostasis, Disorders of endocrine glands | |
| Unit 4: Regulation of Hormone Action | 14 |
| Mechanism of action of steroidal, non-steroidal hormones with receptors | |
| Bioassays of hormones using RIA & ELISA | |
| Estrous cycle in rat and menstrual cycle in human | |
| Multifaceted role of Vasopressin & Oxytocin. Hormonal regulation of parturition. | |
| Reference Books | |
| ► Guyton and Hall. Textbook of Medical Physiology. 13th Edition | |
| ► Histology: A Text and Atlas. Sixth Edition. Ross & Pawlina. Lippincott Williams Wilkins. | & |
| Vertebrate Endocrinology by David O. Norris, | |

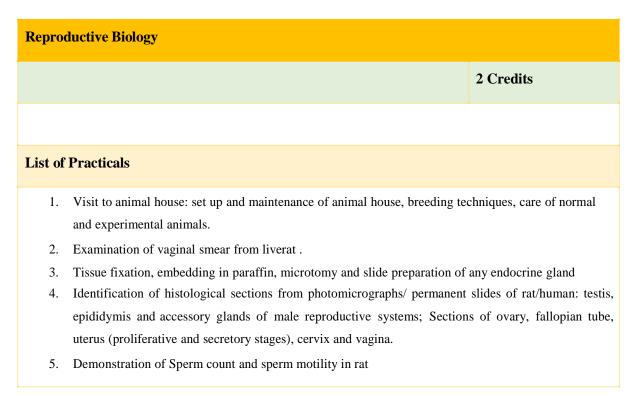

4.2. DSE P1-Endocrinology Lab

4.3. DSE T2 -Reproductive Biology

| Reproductive Biology | |
|--|-------|
| 4 Credits | Class |
| | |
| Unit 1: Reproductive Endocrinology | 10 |
| Gonadal Hormones, Mechanism of action of steroids and glycoprotein hormones. hypothalamo – hypophyseal – gonadal axis, regulation of gonadotrophin secretion in human (male and female) | |
| Reproductive system: | |
| Development and differentiation of gonads, genital ducts | |
| Unit 2: Functional anatomy of male reproduction | |
| Histoarchitechture of testis in human; Spermatogenesis; Hormonal regulation; Androgen synthesis; Accessory glands functions | |
| Unit 3: Functional anatomy of female reproduction | |
| Histoarchitechture of ovary in human; Oogenesis; Hormonal regulation; Steroidogenesis and secretion of ovarian hormones; Reproductive cycles (human) and their regulation, fertilization; Hormonal control of implantation; Hormonal regulation of gestation, pregnancy diagnosis, foeto – maternal relationship; Mechanism of parturition and its hormonal regulation; Lactation and its regulation | |
| Unit 4: Reproductive Health | 8 |
| Infertility in male and female: causes, diagnosis and management | |
| Assisted Reproductive Technology: sex selection, sperm banks, frozen embryos, in vitro fertilization, IUI, ICSI | |
| Modern contraceptive technologies | |
| Reference Books | |
| Ross & Pawlina. Histology: A text and Atlas. 6th edition. | |
| ► Guyton & Hall. Medical Physiology. 11th edition. | |
| ► Knobil, E. et al. (eds). The Physiology of Reproduction. Raven Press Ltd. | |
| ► Hatcher, R.A. et al. The Essentials of Contraceptive Technology. Population Information Programme. | |

4.4. DSE P2 – Reproductive Biology Lab

4.5 DSE T3-Animal Behaviour and Chronobiology

| Animal Behaviour and Chronobiology | | |
|---|----------------|-------|
| | 4 Credits | Class |
| | | |
| Unit 1: Introduction to Animal Behaviour | | 5 |
| Origin and history of Ethology, Brief contributions of Karl Von Frish, Ivan Pavlov, K Tinbergen, Proximate and ultimate causes of behaviour, Methods and recording of a behaviour | | iko |
| Unit 2: Patterns of Behaviour | | 6 |
| Stereotyped Behaviours (Orientation, Reflexes); Individual Behavioural patterns; Insti Behaviour; Associative learning, classical and operant conditioning, Habituation, Imprin | | |
| Unit 3: Social and Sexual Behaviour | | 15 |
| Social Behaviour: Concept of Society; Communication: Chemical communications in insects and the sense | | es |
| Altruism; Reciprocal altruism and Kin selection Insects' society with Honey bee as example; Foraging in honey bee and advantages of the waggle dance. | | |
| Sexual Behaviour: Asymmetry of sex, Sexual dimorphism, Mate choice, Intra-sexual s rivalry), Inter-sexual selection (female choice), Sexual conflict in parental care. | election (male | |
| Unit 4: Introduction to Chronobiology | | 10 |
| Brief historical developments in chronobiology; Biological oscillation: the concept of A amplitude, phase and period | Average, | |
| Adaptive significance of biological clocks | | |
| Unit 5: Biological Rhythm | | 14 |
| Types and characteristics of biological rhythms: Short- and Long- term rhythms; Cir Tidal rhythms and Lunar rhythms; Concept of synchronization and masking; Photic zeitgebers; Circannual rhythms; Photoperiod and regulation of seasonal reproduction Role of melatonin. | and non-photic | |
| Reference Books | | |

4.6. DSE P3 – Animal Behaviour and Chronobiology Lab

| Animal Behaviour and Chronobiology | |
|---|----------------------------|
| | 2 Credits |
| | |
| List of Practical | |
| To study the aggressive behavior of fish To study the learning behavior of rat, To study geotaxis behaviour in soil arthropod. To study the phototaxis behaviour in soil arthropod/insect larvae . Visit to Forest/ Wild life Sanctuary/Biodiversity Park/ Zoological Park to st of animals and prepare a short report. | udy behavioural activities |
| | |

4.7 DSE T4– Wild Life Conservation and Management

| Wild Life Conservation and Management | |
|---|-------|
| 4 Credits | Class |
| | |
| Unit 1: Introduction to Wild Life | 6 |
| Values of wild life - positive and negative; Conservation ethics; Importance of conservation; Causes of depletion; World conservation strategies. | |
| Unit 2: Evaluation and management of wild life | 8 |
| Habitat analysis, Physical parameters: Topography, Geology, Soil and water | |
| Biological Parameters: food, cover, forage, browse and cover estimation | |
| Standard evaluation procedures: remote sensing and GIS. | |
| Unit 3: Management of habitats | 6 |
| Setting back succession; Grazing logging; Mechanical treatment; Advancing the successional process; Cover construction; Preservation of general genetic diversity | |
| Restoration of degraded habitats | |
| Unit 4: Population estimation | 12 |
| Population density, Natality, Birth rate, Mortality, fertility schedules and sex ratio computation; Pug marks and census method. | |
| Unit 5: Aims and objectives of wildlife conservation | 6 |
| Wildlife conservation in India – through ages; different approaches of wildlife conservation; modes of conservation; in-situ conservation and ex-situ conservation: necessity for wildlife conservation | |
| Unit 6: Management planning of wild life in protected areas | 5 |
| Estimation of carrying capacity; Eco tourism / wild life tourism in forests; Concept of climax persistence; Ecology of perturbence. | |
| Unit 7: Man and Wildlife | 3 |

| | and consequences of human-wildlife conflicts; mitigation of conflict – an overview; ement of excess population | |
|--------|--|---|
| Unit 8 | 3: Protected areas | 4 |
| | al parks & sanctuaries, Community reserve; Important features of protected areas in India; Tiger vation - Tiger reserves in India; Management challenges in Tiger reserve. | |
| Refer | ence Books | |

4.8. DSE P4 –Wild Life Conservation and Management Lab

| Wild I | Life Conservation and Management | |
|----------|---|---------------------------|
| | | 2 Credits |
| | | |
| List of | [•] Practical | |
| 1. 2. | Identification of mammalian fauna/ avian fauna, herpeto-fauna of any prote Demonstration of basic equipment needed in wildlife studies use, care a Binoculars, Spotting scope, Range Finders, Global Positioning System, and lenses) | and maintenance (Compass, |
| 3. | Familiarization and study of animal evidences in the field; Identification marks, hoof marks, scats, pellet groups, nest, antlers, etc. | 1 of animals through pug |
| 4. | Demonstration of different field techniques for fauna | |
| 5. | PCQ, ten tree method, Circular, Square & rectangular plots, Parker's 2 St ground cover assessment, Tree canopy cover assessment, Shrub cover assess | - |
| 6. | Trail / transect monitoring for abundance and diversity estimation of mamindirect evidences) | mals and bird (direct and |

4.9 DSE T5- Microbiology

| Microbiology | |
|--|-------|
| 6 Credits | Class |
| | |
| Unit 1: Introduction to Microbiology | 4 |
| Historical perspective of Microbiology, Prokaryotic pathogens, Eukaryotic pathogens | |
| Unit 2: Bacterial taxonomy | 4 |
| Principles and modern approaches of bacterial taxonomy. Basic idea about Hackel and Whittaker's kingdom concept and domain concept of Carl Woose | |
| Unit 3: Morphology of Bacteria and Virus | 14 |
| Cell wall (Structure of peptidoglycan), Cell envelope (Cell membrane, Differences between gram- positive and gram-negative species, External capsule and glycocalyx, Plasmids and episomes. Nuclear material, Bacterial Chromosome (Fundamental differences with eukaryotic chromosome). Reserve materials (carbon and phosphate reserve, cyanophycin), Cytoplasmic inclusions (Chlorosome, magnetosome, carboxysome, gas vesicles, ribosome). Structural organization of viruses, Prions and viroids | |
| Unit 4: Normal flora | 4 |
| Distribution of normal flora in the body: Skin, eye, mouth, intestinal tract, urino-genital tract, Beneficial functions of normal flora. Harmful effects of normal flora | |
| Unit 5: Pathogenicity of Microorganisms | 10 |
| Bacterial pathogenesis: Entry to the host, Adherence to host cells, Invasiveness, Bacterial toxins : Exotoxins, Endotoxins, Antigenic switching.Viral Pathogenesis:Cellular level (Cell death, Transformation, Cell fusion, Cytopathic effect).Initial infections: Routes of entry and dissemination to secondary sites, Typical secondary sites of localization, Virus shedding and mode of transmission; Factors involved in termination of acute infection | |
| Unit 6: Infection of pathogens to human populations | 2 |

Communicable, Non-communicable, Endemic, Epidemic, Pandemic and Sporadic

| Unit 7: Diagnostic Microbiology and Bacteria culture | 4 |
|--|---|
| Koch's postulates, Sensitivity and specificity of test results, Principles and applications: Simple staining, Gram-staining, Acid-fast staining, Collection of specimens, Growth requirements and Growth factors, Oxygen requirement. Culture Media: Simple media, Complex media, Selective media and Enriched media | |
| Unit 8: Genetic recombination in bacteria | 4 |
| Transformation, Conjugation- F+, F-, Hfr & F' strain, Transduction, Generalised & specialized types. | |
| Unit 9: Microbial Diseases | 4 |
| Name of pathogen, symptoms, pathogenesis, mode of action & preventive measures of following diseases: Bacterial (Polio, Typhoid, Staphylococcal Food Poisoning), Viral (Dengue, AIDS) | |
| Reference Books | |

4.10. DSE P5- Microbiology Lab

| Micro | biology | |
|---------|--|--------------|
| | | Credits |
| | | |
| List of | Practical | |
| 1. | Simple staining and Gram's staining of bacteria. | |
| 2. | Preparation of liquid media (broth) and solid media for routine cultivation of | of bacteria. |
| 3. | Preparation of slant and stab. | |
| 4. | Pure culture techniques: Spread plate, Pour plate and Streak plate | |
| 5. | Biochemical test for characterization: | |
| | Catalase, Nitrate-reduction, Indole production, Methyl Red and Voges-Pros | skauer Test. |
| 6. | Microbiological examination of milk (Methylene blue reductase test). | |
| 7. | Sugar fermentation test. | |

4.11 DSE T6 - Parasitology

| Parasitology | |
|--|-------|
| 4 Credits | Class |
| | |
| Unit 1: Introduction to Parasitology | 2 |
| Brief introduction of Parasitism, Parasite, Parasitoid carriers and Vectors (mechanical and biological vector) Host parasite relationship | |
| Unit 2: Parasitic Protists | 12 |
| Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of <i>Giardia intestinalis</i> , <i>Trypanosoma gambiense</i> , <i>Leishmania donovani</i> | |
| Unit 3: Parasitic Platyhelminthes | 12 |
| Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of <i>Schistosoma haematobium</i> , <i>Taenia sajinata</i> | |
| Unit 4: Parasitic Nematodes | 12 |
| Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of Ascaris lumbricoides, Ancylostoma duodenale, Wuchereria bancrofti and Trichinella spiralis, Brugia malayi | |
| Unit 5: Parasitic Arthropods | 10 |
| Biology, importance and control of ticks (Soft tick <i>Ornithodoros</i> , Hard tick <i>Ixodes</i>), mites (<i>Sarcoptes</i>), Lice (<i>Pediculus</i>), Flea (<i>Xenopsylla</i>) and Bug (<i>Cimex</i>) | |
| Unit 5: Parasite Vertebrates | 2 |
| Brief account of Cookicutter Shark, Hood Mocking bird, Vampire bat | |
| Reference Books | |

4.12. DSE P6 –Parasitology Lab

| Parasi | tology | |
|---------|---|---------------------------|
| | | 2 Credits |
| | | 4 |
| List of | Practicals | |
| 1. | Identification of any stage of Giardia intestinalis, Trypanosoma gambiens | e, Leishmania donovani |
| | through permanent slides/micro photographs | |
| 2. | Identification of adult and any stage of Schistosoma haematobium, Tae | enia sajinata through |
| | permanent slides/micro photographs | |
| 3. | Identification of adult and any stage of Ancylostoma duodenale, Brugia | malayi and Trichinella |
| | spiralis through permanent slides/micro photographs | |
| 4. | Identification of Pediculus humanus, Xenopsylla cheopis and Cimex lecture | ularius through permanent |
| | slides/ photographs | |
| 6. | Study of monogenea from the gills of fresh water fish [Gills can be procu | red from fish market as |
| | by-product of the industry/ Study of gut parasite of cockroach | |
| 7. | Study of nematode/cestode parasites from the intestines of Poultry bird [| Intestine can be procured |
| | from poultry/market as a by-product] | |
| | | |

4.13 DSE T7 - Animal Biotechnology

| Animal Biotechnology | | |
|--|----------------------|-------|
| | 4 Credits | Class |
| | | |
| Unit 1: Introduction | | 5 |
| Organization of prokaryotic and eukaryotic genome, Concept of genomics | | |
| Unit 2: Molecular Techniques in Gene manipulation | | 23 |
| Cloning vectors: Plasmids, Cosmids, Phagemids, Lambda Bacteriophage, M13, BAC, YAC, MAC and Expression vectors (characteristics).Restriction enzymes: Nomenclature, detailed study of Type II. Transformation techniques: Calcium chloride method and electroporation. Construction of genomic and cDNA libraries and screening by colony and plaque hybridization | | |
| Southern, Northern and Western blotting | | |
| DNA sequencing: Sanger method | | |
| Polymerase Chain Reaction, DNA Finger Printing and DNA micro array | | |
| Unit 3: Genetically Modified Organisms | | 12 |
| Production of cloned and transgenic animals: Nuclear Transplantation, Retro- microinjection. Applications of transgenic animals: Production of pharmaceuticals, production of | | |
| out mice. | | |
| Unit 4: Culture Techniques and Applications | | 10 |
| Animal cell culture, Expressing cloned genes in mammalian cells, Molecular diseases (Cystic fibrosis, Sickle cell anemia) | diagnosis of genetic | |
| Reference Books | | |
| Brown, T.A. (1998). Molecular Biology Labfax II: Gene Cloning and Edition, Academic Press, California, USA. | l DNA Analysis. II | |

4.14. DSE P7 – Animal Biotechnology Lab

| | | | 2 Credits |
|--------|---|---|----------------|
| | | | |
| ist of | Practic | al | |
| 150 01 | Tucue | | |
| 1. | Genomi | ic DNA isolation from E. coli (method) | |
| 2. | Plasmid | DNA isolation (pUC 18/19) from E. coli (Boiling mir | niprep method) |
| 3. | Restriction digestion of plasmid DNA/ lambda DNA by <i>Eco</i> RI/ <i>Hin</i> dIII, electrophoresis and observatior | | |
| 4. | Construction of circular and linear restriction map from the data provided. | | |
| 5. | Calculation of transformation efficiency from the data provided. | | |
| 6. | To study following techniques through photographs | | |
| | a. | Southern Blotting | |
| | b. | Northern Blotting | |
| | c. | Western Blotting | |
| | d. | DNA Sequencing (Sanger's Method) | |
| | e. | PCR | |
| | f. | DNA fingerprinting | |
| 7. | Project | report on animal cell culture | |

4.15. DSE T8 - Biology of Insects

| Biology of Insects | | |
|--|-------------------|-------|
| | 4 Credits | Class |
| | | |
| Unit 1: Introduction | | 2 |
| General Features of Insects | | |
| Distribution and Success of Insects on the Earth | | |
| Unit 2: Insect Taxonomy | | 4 |
| Basis of insect classification; Classification of insects up to orders (according to Brus 2016) | sca and Brusca, | |
| Unit 3: General Morphology of Insects | | 6 |
| External Features; Head – Eyes, Types of antennae, Mouth parts w.r.t. feeding habits | | |
| Thorax: Wings and wing articulation, Types of Legs adapted to diverse habi appendages and genitalia | tat Abdominal | |
| Unit 4: Physiology of Insects | | 20 |
| Structure and physiology of Insect body systems - Integumentary, diges circulatory, respiratory, endocrine, reproductive, and nervous system | stive, excretory, | |
| Photoreceptors: Types, Structure and Function | | |
| Metamorphosis: Types and Neuroendocrine control of metamorphosis | | |
| Unit 5: Insect Society | | 6 |
| Social insects with special reference to termites | | |
| Trophallaxis in social insects such as ants, termites and bees | | |
| Unit 6: Insect Plant Interaction | | 4 |
| Theory of co-evolution, role of allelochemicals in host plant mediation Host-plan phytophagous insects, Major insect pests in paddy | nt selection by | |

| Unit | 7: Insects as Vectors | 8 |
|-------|---|---|
| Insec | as as mechanical and biological vectors, Brief discussion on houseflies and mosquitoes as | |
| impo | tant vectors | |
| Refe | rence Books | |
| ► | A general text book of entomology, Imms , A. D., Chapman & Hall, UK | |
| ► | The Insects: Structure and function, Chapman, R. F., Cambridge University Press, UK | |

| ► | Mosquito, Chandra G (2000), Sribhumi Pub. Co. | |
| ► | Medical Entomology, Hati A. K., Allied Book Agency, 2010 | |

Note: Classification to be followed from IMMS A. D. (1938)

4.16. DSE P8 –Biology of Insects Lab

| Biology of Insecta | | | |
|--------------------|---|-----------|--|
| | | 2 Credits | |
| | | | |
| List of | Practical | | |
| 1. | Study of life cycle of Mosquito/ Silk moth | | |
| 2. | Study of different kinds of antennae, legs and mouth parts of insects | | |
| 3. | Mounting of insect wings, spiracles and genitalia of any insects | | |
| 4. | Methodology of collection, preservation and identification of insects. | | |
| 5. | Morphological studies of various castes of Apis, Camponotus Odontoterme | S | |
| 6. | Study of major insect pests of paddy/tea and their damages | | |

4.17. DSE T9 - Fish and Fisheries

| Fish and Fisheries | | |
|--|-----------|-------|
| | 4 Credits | Class |
| | | |
| Unit 1: Introduction and Classification | | 4 |
| General description of fish | | |
| Feeding habit, habitat and manner of reproduction | | |
| Classification of fish (up to Subclasses) | | |
| Unit 2: Morphology and Physiology | | 14 |
| Types of fins and their modifications; Locomotion in fish; Hydrodynamics; Types of Scales, Use of scales in Classification and determination of age of fish; Gills and gas exchange; Swim Bladder: Types and role in Respiration, buoyancy; Osmoregulation in Elasmobranchs; Reproductive strategies (special reference to Indian fish); Electric organ, Bioluminescence | | |
| Unit 3: Fisheries | | 10 |
| Inland Fisheries; Marine Fisheries; Environmental factors influencing the seasonal variations in fish catches in the Arabian Sea and the Bay of Bengal; Fishing crafts and Gears; Depletion of fisheries resources; Application of remote sensing and GIS in fisheries; Fisheries law and regulations | | |
| Unit 4: Aquaculture | | 16 |
| Sustainable Aquaculture; Extensive, semi-intensive and intensive culture of fish; Pen and cage culture; Polyculture; Composite fish culture; Brood stock management; Induced breeding of fish; Management of finfish hatcheries; Preparation and maintenance of fish aquarium; Preparation of compound diets for fish; Role of water quality in aquaculture; Fish diseases: Bacterial, viral and parasitic; Preservation and processing of harvested fish, Fishery by-products | | |
| Unit 5: Fish in research | | 6 |
| Transgenic fish | | |
| Zebrafish as a model organism in research | | |
| Reference Books | | |
| 75 | | |

• Q Bone and R Moore, Biology of Fishes, Talyor and Francis Group, CRC Press, U.K.

Note: Classification to be followed from: Romar A. S. (1959)

4.18. DSE P9 – Fish and Fisheries Lab

| Fish and Fisheries | | | | |
|--------------------|--|-----------------------------|--|--|
| | | 2 Credits | | |
| | | | | |
| List of | Practical | | | |
| 1. | Morphometric and meristic characters of fishes | | | |
| 2. Lal | 2. Identification of Petromyzon, Myxine, Pristis, Chimaera, Exocoetus, Hippocampus, Gambusia, Cabeo, | | | |
| | Heteropneustes, Anabas | | | |
| 3. | Study of different types of scales (through permanent slides/ photographs). | | | |
| 4. | Study of crafts and gears used in Fisheries | | | |
| 5. | Water quality criteria for Aquaculture: Assessment of pH, conductivity, To solids | tal solids, Total dissolved | | |
| 6. | Study of air breathing organs in Channa/ Heteropneustes/ Anabas/ Clan | rias(Market variety) | | |
| 7. | Project Report on a visit to any fish farm/ pisciculture unit/ Zebrafish rearin | g Lab. | | |

5. Skill Enhancement Course

5.1. SEC T1 – Apiculture

| Apiculture | | |
|--|------------------------|-------|
| | 2 Credits | Class |
| | | |
| Unit 1: Biology of Bees | | 2 |
| Classification and Biology of Honey Bees | | |
| Social Organization of Bee Colony | | |
| Unit 2: Rearing of Bees | | 10 |
| Artificial Bee rearing (Apiary), Beehives – Newton and Langstroth | | |
| Bee Pasturage | | |
| Selection of Bee Species for Apiculture | | |
| Bee Keeping Equipment | | |
| Methods of Extraction of Honey (Indigenous and Modern) | | |
| Unit 3: Diseases and Enemies | | 5 |
| Bee Diseases and Enemies | | |
| Control and Preventive measures | | |
| Unit 4: Bee Economy | | 2 |
| Products of Apiculture Industry and its Uses (Honey, Bees Wax, Propolis), Polle | n etc | |
| Unit 5: Entrepreneurship in Apiculture | | 6 |
| Bee Keeping Industry – Recent Efforts, Modern Methods in employing artific pollination in horticultural gardens | ial Beehives for cross | |
| Reference Books | | |
| Prost, P. J. (1962). Apiculture. Oxford and IBH, New Delhi. Bisht D.S., Apiculture, ICAR Publication. | | |

5.2. SEC T2 - Aquarium Fish Keeping

| Aquarium Fish Keeping | | |
|--|---------------------|-------|
| | 2 Credits | Class |
| | | |
| Unit 1: Introduction to Aquarium Fish Keeping | | 2 |
| The potential scope of Aquarium Fish Industry as a Cottage Industry, Exotic and Aquarium Fishes | Endemic species of | |
| Unit 2: Biology of Aquarium Fishes | | 10 |
| Common characters and sexual dimorphism of Fresh water and Marine Aquarium fishes such as Guppy, Molly, Sword tail, Gold fish, Angel fish, Blue morph, Anemone fish and Butterfly fish | | |
| Unit 3: Food and feeding of Aquarium fishes | | 7 |
| Use of live fish feed organisms. Preparation and composition of formulated fish f as larval predator | eeds, Aquarium fish | |
| Unit 4: Fish Transportation | | 3 |
| Live fish transport - Fish handling, packing and forwarding techniques. | | |
| Unit 5: Maintenance of Aquarium | | 3 |
| General Aquarium maintenance – budget for setting up an Aquarium Fish Industry | Farm as a Cottage | |

5.3. SEC T3- MEDICAL DIAGNOSTIC TECHNIQUES

| Medical Diagnostic Techniques | |
|---|-------|
| 2 Credits | Class |
| | |
| Unit 1: Introduction to Medical Diagnostics and its Importance | 2 |
| | |
| Unit 2: Diagnostics Methods Used for Analysis of Blood | 7 |
| Blood composition, Preparation of blood smear and Differential Leucocyte Count (D.L.C) using Leishman's stain, Platelet count using haemocytometer, Erythrocyte Sedimentary Rate (E.S.R), Packed Cell Volume (P.C.V.) | |
| Unit 3: Diagnostic Methods Used for Urine Analysis | 4 |
| Urine Analysis: Physical characteristics; Abnormal constituents | |
| Unit 4: Non-infectious Diseases | 5 |
| Causes, types, symptoms, complications, diagnosis and prevention of Diabetes (Type I and Type II), Hypertension (Primary and secondary), Testing of blood glucose using Glucometer/Kit (Principle) | |
| Unit 5: Infectious Diseases | 3 |
| Causes, types, symptoms, diagnosis and prevention of Tuberculosis and Hepatitis, Malarial parasite (Microscope based and ELISA based) | |
| Unit 6: Clinical Biochemistry | 1 |
| LFT, Lipid profiling | |
| Unit 7: Clinical Microbiology | 1 |
| Antibiotic Sensitivity Test | |
| Unit 8: Tumours | 2 |
| Types (Benign/Malignant), Detection and metastasis; Medical imaging: X-Ray of Bone fracture, PET, MRI and CT Scan (using photographs). | |

5.4. SEC T4– Sericulture

| Sericulture | |
|--|-------|
| 2 Credits | Class |
| | |
| Unit 1: Introduction | 2 |
| Sericulture: Definition, | |
| Types of silkworms, Distribution and Races | |
| Exotic and indigenous races | |
| Mulberry and non-mulberry Sericulture | |
| Unit 2: Biology of Silkworm | 4 |
| Life cycle of Bombyx mori | |
| Structure of silk gland and secretion of silk | |
| Unit 3: Rearing of Silkworms | 10 |
| Selection of mulberry variety and establishment of mulberry garden | |
| Rearing house and rearing appliances. | |
| Disinfectants: Formalin, bleaching powder, RKO | |
| Silkworm rearing technology: Early age and Late age rearing | |
| Types of mountages | |
| Spinning, harvesting and storage of cocoons | |
| Unit 4: Pests and Diseases | 7 |
| Pests of silkworm: Uzi fly, dermestid beetles and vertebrates Pathogenesis | |
| of silkworm diseases: Protozoan, viral, fungal and bacterial Control and | |
| prevention of pests and diseases | |
| Unit 5: Entrepreneurship in Sericulture | 2 |
| Prospectus of Sericulture in India: Sericulture industry in different states, employment, potential in | |

mulberry and non-mulberry sericulture

6. General Elective

6.1. GE T1-Animal Diversity

| Animal Diversity | | |
|--|-----------|-------|
| | 4 Credits | Class |
| | | |
| Unit 1: Protista | | 3 |
| Protozoa | | |
| General characters of Protozoa; Life cycle of Plasmodium | | |
| Unit 2: Porifera | | 3 |
| General characters and canal system in Porifera | | |
| Unit 3: Radiata | | 3 |
| General characters of Cnidarians and polymorphism | | |
| Unit 4: Aceolomates | | 2 |
| General characters of Platyhelminthes | | |
| Unit 5: Pseudocoelomates | | 3 |
| General characters of Nematoda | | |
| Unit 6: Annelida | | 3 |
| General characters of Annelida | | |
| Metamerism | | |
| Unit 7: Arthropoda | | 4 |
| General characters | | |
| Social life in Honey bees. | | |
| Unit 8: Mollusca | | 4 |
| | | |

| General characters of mollusc | |
|--|---|
| Pearl Formation | |
| Unit 9: Echinodermata | 4 |
| General characters of Echinodermata | |
| Water Vascular system in Starfish | |
| Unit 10: Protochordata | 2 |
| Salient features | |
| Unit 11: Pisces | 3 |
| General Characters | |
| Migration of Fish | |
| Unit 12: Amphibia | 4 |
| General characters, Parental care | |
| Unit 13: Reptilia | 4 |
| General Characters, Differences between poisonous and non-poisonous snakes, poison apparatus, venom and anti-venom | |
| Unit 14: Aves | 4 |
| General Characters | |
| Flight adaptations | |
| Unit 15: Mammalia | 4 |
| General Characters, Integumentary glands | |
| Reference Books | |

6.2. GE P1 – Animal Diversity Lab

| Anima | l Diversity |
|----------|--|
| | 2 Credits |
| | |
| List of | Practical |
| 1. | Spot identification (specimen/ photographs/ permanent slides): a. Non Chordates: Euglena, Paramecium, Sycon, , Physalia, Metridium, Taenia, Ascaris, Nereis, Leech, Peripatus, Limulus, Hermitcrab, Daphnia, Millipede, Centipede, Beetle, Chiton, Octopus, Asterias, Antedon and Balanoglossus, b. Chordates: Amphioxus, Petromyzon, Scoliodon, Hippocampus, Labeo, Icthyophis/Uraeotyphlus, Salamander, Draco, Naja, Viper, Archaeopteryx, any three common birds-(Crow, duck, Owl), Squirrel and Bat. |
| 2. | Identification of following specimen through Slides/ photographs: Cross section of <i>Sycon</i> , and <i>Ascaris</i> (male and female). T. S. of Earthworm passing through typhlosolar intestine. Bipinnaria and Pluteus larva. |
| 3. | Temporary mounts of:a. Cyclophs/ Daphnia.b. Unstained mounts of Placoid, cycloid and ctenoid scales. |
| 4. 5. | Dissections of: a. Digestive system of Cockroach Study of gut parasite of cockroach. |

6.3 GE T2 -Insect Vectors and Diseases

| Insect Vectors and Diseases | | |
|--|------------------------|-------|
| | 4 Credits | Class |
| | | |
| Unit 1: Introduction to Insects | | 2 |
| General Features of Insects, Morphological features, Head – Eyes, Types parts (with reference to feeding) | of antennae, Mouth | |
| Unit 2: Concept of Vectors | | 4 |
| Brief introduction to Carriers and Vectors (mechanical and biological vectors),Res relationship, Adaptations as vectors, Host specificity | servoirs, Host-vector | |
| Unit 3: Insects as Vectors | | 6 |
| Detailed features of orders with insects as vectors – Diptera, Siphonaptera, Siphona | culata, Hemiptera | |
| Unit 4: Dipteran as Disease Vectors | | 20 |
| Dipterans as important insect vectors – Mosquitoes, Sand fly, Houseflies | | |
| Study of mosquito-borne diseases – Malaria, Dengue, Chikungunya, Viral encepha | litis, Filariasis | |
| Control of mosquitoes | | |
| Study of sand fly-borne diseases –Leishmaniasis,(visceral and cutaneous), phleboto Sand fly | omus fever; Control of | |
| Study of house fly as important mechanical vector, Myiasis, Control of house fly | | |
| Unit 5: Siphonaptera as Disease Vectors | | 6 |
| Fleas as important insect vectors; Host-specificity, Study of Flea-borne disease fever; Control of fleas | es – Plague, Typhus | |
| Unit 6: Siphunculata as Disease Vectors | | 6 |
| Human louse (Head, Body and Pubic louse) as important insect vectors; Control of | human louse | |
| Unit 7: Hempitera as Disease Vectors | | 6 |

Bugs as insect vectors; Blood-sucking bugs; Chagas disease, Bed bugs as mechanical vectors, Control and prevention measures

6.4. GE P2 –Insect Vectors and Diseases Lab

| Insect Vectors and Diseases | |
|--|--|
| | 2 Credits |
| | |
| List of Practical | |
| Identification of different kinds of mouth parts of Lidentification of following insect vectors throw Anopheles, Pediculus humanus capitis, F Xenopsylla cheopis, Cimex lectularius, Phleb Study of different diseases transmitted by above | bugh permanent slides/ photographs: Aedes, Culex, Pediculus humanus corporis, Phithirus pubis, potomus argentipes, Musca domestica |
| 4. Submission of a project report on any one of the | insect vectors and disease transmitted |
| 4. Submission of a project report on any one of the | insect vectors and disease transmitted |

6.5. GE T3 -Environment and Public Health

| Envir | onment and Public Health | | |
|---------------------------------------|--|------------------------|-------|
| | | 4 Credits | Class |
| | | | |
| Unit 1 | : Introduction | | 10 |
| | s of Environmental hazards, Hazard identification and accounting, Fate of ces in the environment, Biomagnification. | f toxic and persistent | |
| Unit 2 | : Climate Change | | 10 |
| | ouse gases and global warming, Acid rain, Ozone layer destruction, Effe | ct of climate change | |
| Unit 3 | : Pollution | | 5 |
| Air, wa | ter, noise pollution sources and effects, Pollution control | | |
| Unit 4: Waste Management Technologies | | 15 | |
| dispos | s of waste, types and characteristics, Sewage disposal and its man l, Biomedical waste handling and disposal, Nuclear waste handling and power plants. | - | |
| Unit 5 | : Diseases | | 10 |
| Causes | , symptoms and control of tuberculosis, Asthma, Cholera, Minamata diseas | e, typhoid, filariasis | |

6.6. GE P3 – Environment and Public Health Lab

| Environment and Public Health | |
|--|-----------|
| | 2 Credits |
| | |
| List of Practical | |
| 1. To determine pH, Cl, Hardness in water samples from different locations | |
| 2. Visit to Auto/vehicle (Emission) pollution testing centre. | |

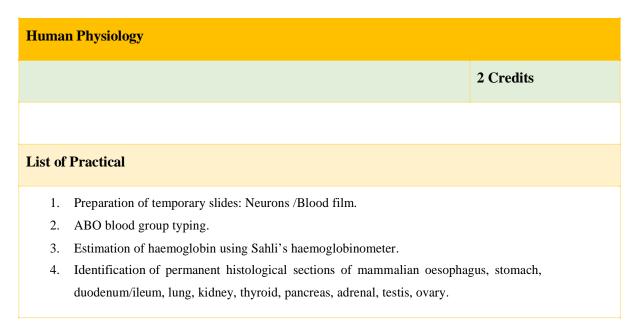

6.7. GE T4 -Human Physiology

| Human Physiology | |
|--|-------|
| 4 Credits | Class |
| | |
| Unit 1: Digestion and Absorption of Food | 8 |
| Structure and function of digestive glands; Digestion and absorption of carbohydrates, fats and proteins; Nervous and hormonal control of digestion (in brief) | |
| Unit 2: Functioning of Excitable Tissue (Nerve and Muscle) | 10 |
| Structure of neuron, Propagation of nerve impulse (myelinated and non-myelinated nerve fibre); Structure of skeletal muscle, Mechanism of muscle contraction (Sliding filament theory), Neuromuscular junction | |
| Unit 3: Respiratory Physiology | 6 |
| Ventilation, External and internal Respiration, Transport of oxygen and carbon dioxide in blood, Factors affecting transport of gases. | |
| Unit 4: Renal Physiology | 6 |
| Functional anatomy of kidney, Mechanism and regulation of urine formation, | |
| Unit 5: Cardiovascular Physiology | |
| Structure of heart, Coordination of heartbeat, Cardiac cycle, ECG | |
| Unit 6: Endocrine and Reproductive Physiology | 12 |
| Structure and function of endocrine glands (pituitary, thyroid, parathyroid, pancreas, adrenal, ovaries, and testes), Brief account of spermatogenesis and oogenesis, Menstrual cycle | |
| Reference Books | |

6.8. GE P4 –Human Physiology Lab

6.9 GE T5 -Food, Nutrition and Health

| Food, Nutrition and Health | |
|--|-------|
| 4 Credits | Class |
| | |
| Unit 1: Basic concept of food and nutrition | 6 |
| Food Components and food-nutrients | |
| Concept of a balanced diet, nutrient needs and dietary pattern for various groups- adults, pregnant and lactating mothers, infants, school children, adolescents and elderly | |
| Unit 2: Nutritional Biochemistry | 16 |
| Carbohydrates, Lipids, Proteins- Definition, Classification, their dietary source and role | |
| Vitamins- Fat-soluble and Water-soluble vitamins- their dietary source and importance | |
| Minerals- Iron, calcium, phosphorus, iodine, selenium and zinc: their biological functions | |
| Unit 3: Health | 14 |
| Introduction to health- Definition, concept of health and disease | |
| Major nutritional Deficiency diseases- Protein Energy Malnutrition (kwashiorkor and marasmus), Vitamin A deficiency disorders, Iron deficiency disorders, Iodine deficiency disorders- their causes, symptoms, treatment, prevention | |
| Life style related diseases- hypertension, diabetes mellitus, and obesity- their causes and prevention through dietary and lifestyle modifications | |
| Social health problems- smoking, alcoholism, drug dependence and Acquired Immuno Deficiency Syndrome (AIDS) - their causes, treatment and prevention | |
| Common ailments- cold, cough, and fevers, their causes and treatment | |
| Unit 4: Food hygiene and Community health | 14 |
| Potable water- sources and methods of purification at domestic level | |
| Food and Water borne infections: Bacterial infection: cholera, typhoid fever, dysentery; Viral infection: hepatitis, poliomyelitis, Protozoan infection: Amoebiasis, Giardiasis; Helminths infection: Taeniasis, Ascariasis, Vector borne diseases: Malaria and Dengue, their transmission, causative agent, | |

sources of infection, symptoms and prevention

Brief account of food spoilage: Causes of food spoilage and their preventive measures

6.10. GE P5 – Food Nutrition and Health Lab

| Food Nutrition and Health | | |
|--|---------------------------|--|
| | 2 Credits | |
| | | |
| List of Practical | | |
| To detect adulteration in Ghee/ Sugars/ Tea leaves/ Turmeric/ milk Gram staining of bacteria. Study of the stored grain pests (<i>Sitophilus oryzae</i>, <i>Trogoderma granar</i> (<i>Anopheles, Culex</i> and <i>Aedes</i>) from slides/ photograph.Identification, damage caused and control. Preparation of temporary mounts of the above stored grain pests. Project- Undertake computer aided diet analysis and Anthropometric r different age groups. OR Identify nutrient rich sources of foods (fruits and vegetables), their seasona OR Study of nutrition labelling on selected foods | habitat and food sources, | |

6.11 GE T6 - Animal Cell Biotechnology

| Animal Cell Biotechnology | | |
|--|-------------------|----------|
| | 4 Credits | Class |
| | | |
| Unit 1: Introduction | | 2 |
| Concept and Scope of Biotechnology | | |
| Unit 2: Techniques in Gene manipulation | | 15 |
| Recombinant DNA technology, Isolation of genes, Restriction endonucleases | | |
| Cloning Vectors: Plasmids, Phage vectors, Cosmids, Phagemids, | | |
| Construction of Genomic libraries and cDNA libraries | | |
| Transformation techniques: microbial and animals: Cloning in mammalian cells, Integration of DNA | | |
| into mammalian genome- Electroporation and Calcium Phosphate Precipitation method. | | |
| | | |
| Unit 3: Animal cell Culture | | 9 |
| Basic techniques in animal cell culture and organ culture, Primary Culture and Ce media- Natural and Synthetic, Stem cells, Cryopreservation of cultures. | ll lines, Culture | |
| Basic idea of agarose and Polyacrylamide Gel Electrophoresis, Southern, Northern | and Western blott | ing, DNA |
| sequencing: (Sanger method), Polymerase chain reaction, DNA Fingerprinting. | | |
| Unit 4: Fermentation | | 8 |
| Different types of Fermentation: Submerged & Solid state; batch, Fed batch & Cor | ntinuous; Stirred | |
| tank, Air Lift, Fixed Bed and Fluidized. | | |
| Downstream Processing: Filtration, centrifugation, extraction, chromatography, spray drying and lyophilization. | | |
| Unit 5: Transgenic Animal Technology | | 6 |

| Production of transgenic animals: nuclear transplantation, Retroviral method, DNA microinjection method, Dolly and Polly. | | |
|---|---|---|
| Unit (| 6: Application in Health | 6 |
| | opment of recombinant Vaccines, Hybridoma technology, Gene Therapy (ADA). tion of recombinant Proteins: Insulin. | |
| Unit 7 | : Bio safety Physical and Biological containment | 4 |
| Bio sat | ety Physical and Biological containment | |

6.12. GE P6 – Animal Cell Biotechnology Lab

| Animal Cell Biotechnology | | |
|---------------------------|--|---------------------------|
| | | 2 Credits |
| | | |
| List of | Practical | |
| 1. | Packing and sterilization of glass and plastic wares etc for cell culture. | |
| 2. | Preparation of bacterial culture media. | |
| 3. | Preparation of genomic DNA from E. coli/animals/ human. | |
| 4. | DNA quantitation using agarose gel electrophoresis (by using lambda DN | IA as standard). |
| 5. | Restriction digestion of lambda (λ) DNA using EcoR1/ Hind III. | |
| 6. | Techniques: Western Blot, Southern Hybridization, DNA Fingerprinting, P | CR, (Through photographs) |
| | | |

6.13. GE T7-Aquatic Biology

| Aqua | tic Biology | |
|------------------------|--|------|
| | 4 Credits | Clas |
| | | |
| Unit | l: Aquatic Biomes | 10 |
| | ntroduction to the aquatic biomes: Freshwater ecosystem (lakes, wetlands, streams and rivers), es, intertidal zones, oceanic pelagic zone, marine benthic zone and coral reefs. | |
| Unit | 2: Freshwater Biology | 20 |
| stratifi gases | Lake as an Ecosystem, Physico-chemical Characteristics: Light, Temperature, Thermal cation, Dissolved Solids, Carbonate, Bicarbonates, Phosphates and Nitrates, Turbidity, dissolved (Oxygen, Carbon dioxide). Nutrient Cycles in Lakes (Nitrogen, Sulphur and Phosphorous). | |
| Unit 3: Marine Biology | | 10 |
| Salinit reefs | y and density of Sea water, Continental shelf, Adaptations of deep sea organisms, Coral | |
| Unit 4 | 4: Management of Aquatic Resources | 10 |
| | s of pollution: Agricultural, Industrial, Sewage, Thermal and Oil spills, Eutrophication, gement and conservation (legislations), Sewage treatment Water quality assessment- BOD and | |
| Refer | ence Books | |

| | Welch : Limnology Vols. I-II | |

6.14. GE P7 – Aquatic Biology Lab

| Aquatic Biology | | |
|-----------------|---|---------------------------|
| | | 2 Credits |
| | | |
| List of | Practical | |
| 1. | Determine the area of a pond using graphimetric and gravimetric method. | |
| 2. | Identification of the important zooplanktons present in a pond ecosystem. | |
| 3. | Determine the amount of Dissolved Oxygen, and Free Carbon dioxide | e, Totoal alkalinity |
| | (carbonates & bicarbonates) in water collected from a nearby lake / water b | oody. |
| 4. | Instruments used in limnology (Secchi disc, Van Dorn Bottle, Conductivit | y meter, Turbidity meter, |
| | PONAR grab sampler) and their significance. | |
| | | |
