

AIAPGET 2017

Question paper of All India Ayush PG Entrance (Homoeopathy) 2017

Compiled by **Dr Neethu Venu Gopal**

Published in **www.homeobook.com**

QID : 1 - All of the following provide attachment of trapezius muscle except :

Options:

- 1) First rib
- 2) Occiput
- 3) Clavicle
- 4) Scapula

Correct Answer: First rib

QID : 2 - Sternal angle is the landmark for locating the level of :

Options:

- 1) Jugular notch
- 2) Second costal cartilage
- 3) Xiphoid process
- 4) Costal margin

Correct Answer: Second costal cartilage

QID : 3 - Interventricular septum of heart is supplied by :

Options:

- 1) Right coronary artery only
- 2) Left coronary artery only
- 3) Anterior part by right coronary artery and posterior part by left coronary artery
- 4) Anterior part by left coronary artery and posterior part by right coronary artery

Correct Answer: Anterior part by left coronary artery and posterior part by right coronary artery

QID : 4 - Hepatopancreatic duct opens into which part of duodenum :

Options:

- 1) First
- 2) Second
- 3) Third
- 4) Fourth

Correct Answer: Second

QID : 5 - Bone devoid of muscular attachments is :

Options:

- 1) Cuboid
- 2) Cuneiform
- 3) Navicular
- 4) Talus

Correct Answer: Talus

QID : 6 - Both glomerular filtration rate and renal plasma flow are increased by:

Options:

- 1) Constriction of efferent arteriole
- 2) Dilatation of efferent arteriole
- 3) Dilatation of afferent arteriole
- 4) Hypoproteinaemia

Correct Answer: Dilatation of afferent arteriole

QID : 7 - Isoelectric part of ECG, that represents complete depolarisation of ventricles is:

Options:

- 1) PR interval
- 2) QRS complex
- 3) ST segment
- 4) T Wave

Correct Answer: ST segment

QID : 8 - Pulse pressure is:

Options:

- 1) Highest pressure measured in arteries
- 2) Lowest pressure measured in arteries
- 3) Decreased with decrease in compliance of arteries
- 4) Increased with increase in stroke volume

Correct Answer: Increased with increase in stroke volume

QID : 9 - Which of the following statements is true about rods of retina:

Options:

- 1) Rods are more sensitive to low-intensity light as compared to cons
- 2) Rods adapt to darkness before cons
- 3) Rods are most concentrated on fovea
- 4) Rods are primarily involved in colour vision

Correct Answer: Rods are more sensitive to low-intensity light as compared to cons

QID : 10 - While spinning to the left, the eyes of a dancer snap quickly to the left. This fast eye movement is known as:

Options:

- 1) Ataxia
- 2) Aphasia
- 3) Nystagmus
- 4) Apraxia

Correct Answer: Nystagmus

QID : 11 - The protein 'Caesin' is present in milk in the form of:

Options:

- 1) Calcium caesinogenate
- 2) Lactoalbumin
- 3) Lactoglobulin
- 4) Lactose

Correct Answer: Calcium caesinogenate

QID : 12 - Number of years of healthy life lost due to ill-health, disability or early death is defined as:

Options:

- 1) HALE (Health Adjusted Life Expectancy)
- 2) QALY (Quality Adjusted Life Years)
- 3) DALY (Disability Adjusted Life Years)
- 4) Sullivan's Index

Correct Answer: DALY (Disability Adjusted Life Years)

QID : 13 - The standard reference insecticide aerosol (space spray) recommended by the WHO consists of:

Options:

- 1) Fenthion
- 2) Pyrethrum
- 3) Rotenone
- 4) Abate

Correct Answer: Pyrethrum

QID : 14 - Which of the following is not a variable in Kuppuswamy's scale for measuring socio-economic status?

Options:

- 1) Education
- 2) Occupation
- 3) Family income
- 4) Type of House

Correct Answer: Type of House

QID : 15 - Indicator of virulence of a disease is:

Options:

- 1) Incidence rate
- 2) Prevalence rate
- 3) Case fatality rate
- 4) Mortality rate

Correct Answer: Case fatality rate

QID : 16 - Tattoo marks can be recognised even in a decomposed body by the presence of pigment in:

Options:

- 1) Epidermis
- 2) Hair
- 3) Muscle
- 4) Lymph node

Correct Answer: Lymph node

QID : 17 - Speed balls are prepared from :

Options:

- 1) Cannabis
- 2) Heroine and cocaine
- 3) Pethidine
- 4) Lysergic acid Diethylamide (LSD)

Correct Answer: Heroine and cocaine

QID : 18 - A 18-year-old college student presented with erythematous itching lesions on the wrist. On examination, papules and vesicles were noted in a band like pattern around wrist along with oozing. The most probable diagnosis is:

Options:

- 1) Seborrheic dermatitis
- 2) Herpes simplex
- 3) Contact dermatitis
- 4) Urticaria

Correct Answer: Contact dermatitis

QID : 19 - A 15-year old girl gave a history of well-defined small circular pink scaly lesions on her back followed by widespread papulo squamous eruptions, typically arranged in symmetrical tree-like pattern on trunk. There was no lymph node enlargement and no oral lesions. The most probable diagnosis is:

Options:

- 1) Tinea versicolor
- 2) Pityriasis rosea
- 3) Lichen Planus
- 4) Pemphigus

Correct Answer: Pityriasis rosea

QID : 20 - A 56 year old diabetic and hypertensive male suddenly develops weakness of the left side of his face, along with the weakness of right arm and leg. He also has diplopia on left lateral gaze. Identify the site of lesion.

Options:

- 1) Right side of brainstem
- 2) Left side of brainstem
- 3) Right cerebral hemisphere
- 4) Left cerebral hemisphere

Correct Answer: Left side of brainstem

QID : 21 - A 55-year old female presented with repetitive severe pain for brief duration on right side of face which started after exposure to cold. No other symptoms or physical signs were present. The most probable diagnosis is -

Options:

- 1) Temporal arteritis
- 2) Trigeminal neuralgia
- 3) Migraine
- 4) Tension headache

Correct Answer: Trigeminal neuralgia

QID : 22 - Which of the following is not the feature of grave's disease?

Options:

- 1) Goitre with bruit
- 2) Sinus bradycardia
- 3) Exophthalmos
- 4) Atrial fibrillation

Correct Answer: Sinus bradycardia

QID : 23 - All of the following are consistent with non-proliferative diabetic retinopathy except

Options:

- 1) Micro aneurysms
- 2) Blot hemorrhages
- 3) Cotton wool spots
- 4) Neovascularization

Correct Answer: Neovascularization

QID : 24 - Bamboo spine is seen in

Options:

- 1) Ankylosing spondylitis
- 2) Tuberculosis of spine
- 3) Paget's disease
- 4) Osteoporosis

Correct Answer: Ankylosing spondylitis

QID : 25 - Malabsorption resulting from intolerance to wheat gluten & similar proteins found in rye & barley is seen in

Options:

- 1) Short Bowel Syndrome
- 2) Tropical sprue
- 3) Coeliac disease
- 4) Whipple's disease

Correct Answer: Coeliac disease

QID : 26 - Rapid urease test in cases of peptic ulcers is done for the diagnosis of infection with:

Options:

- 1) Helicobacter pylori
- 2) Entamoeba histolytica
- 3) Salmonella typhi
- 4) Shigella boydii

Correct Answer: Helicobacter pylori

QID : 27 - All of the following are causes of clubbing except

Options:

- 1) Non-small cell lung cancer
- 2) Fibrosing lung disease
- 3) Iron Deficiency Anemia
- 4) Subacute bacterial endocarditis

Correct Answer: Iron Deficiency Anemia

QID : 28 - Which of the following is not a true statement with respect to chronic kidney disease

Options:

- 1) Disturbances of calcium and phosphate metabolism are almost universal in advanced stage
- 2) Urea and creatinine are raised
- 3) Anaemia is a rare phenomenon
- 4) Hypertension and Diabetes mellitus are one of the common causes

Correct Answer: Anaemia is a rare phenomenon

QID : 29 -

Match the following

- | | |
|---------------------|--------------------------------------|
| a) Quincke's sign | i) Femoral bruit |
| b) Duroziez's sign | ii) Head nodding with pulse |
| c) de Musset's sign | iii) Capillary pulsation in nail bed |

Options:

- 1) a-iii b-ii c-i
- 2) a-iii b-i c-ii
- 3) a-ii b-iii c-i
- 4) a-i b-ii c-iii

Correct Answer: a-iii b-i c-ii

QID : 30 - Which of the following statements is false regarding sickle cell anemia

Options:

- 1) Autosomal dominant inheritance
- 2) Painful vaso-occlusive crisis
- 3) Electrophoresis demonstrates the predominance of HbS
- 4) Splenic infarction

Correct Answer: Autosomal dominant inheritance

QID : 31 - Which of the following is not a feature of nephritic syndrome?

Options:

- 1) Haematuria
- 2) Polyuria
- 3) Oedema
- 4) Hypertension

Correct Answer: Polyuria

QID : 32 -

Match the following

- | | |
|----------------|--|
| a) Vitamin A | i) Korsakoff's Psychosis |
| b) Vitamin B12 | ii) Bitot's spots |
| c) Thiamine | iii) Casal's necklace dermatitis |
| d) Niacin | iv) Subacute degeneration of spinal cord |

Options:

- 1) a-iii b-i c-ii d-iv
- 2) a-ii b-iv c-i d-iii
- 3) a-iv b-ii c-i d-iii
- 4) a-i b-ii c-iii d-iv

Correct Answer: a-ii b-iv c-i d-iii

QID : 33 - All of the following are features of lepromatous leprosy except

Options:

- 1) Wide spread nodules and infiltration
- 2) Loss of eyebrows
- 3) Late nerve enlargement & damage
- 4) Zero Bacterial index

Correct Answer: Zero Bacterial index

QID : 34 - Tropical pulmonary eosinophilia is caused by -

Options:

- 1) Wuchereria bancrofti
- 2) Plasmodium falciparum
- 3) Coxiella burnetii
- 4) Salmonella typhi

Correct Answer: Wuchereria bancrofti

QID : 35 - Which of the following is a major manifestation under Jones criteria for the diagnosis of rheumatic fever

Options:

- 1) Fever
- 2) Raised ESR
- 3) Leucocytosis
- 4) Erythema marginatum

Correct Answer: Erythema marginatum

QID : 36 - All of the following are features of lower Motor Neuron disorder except

Options:

- 1) Fasciculation
- 2) Flaccidity
- 3) Spasticity
- 4) Muscle wasting

Correct Answer: Spasticity

QID : 37 - Exclamation mark hair are pathognomonic sign of:

Options:

- 1) Hypertrichosis
- 2) Alopecia areata
- 3) Androgenic alopecia
- 4) Leucotrichia

Correct Answer: Alopecia areata

QID : 38 - Which of the following are features of Menopause :

- a) Serum FSH and LH:> 40 m IU/ml for 300 consecutive values at weekly interval
- b) Vaginal cytology - showing maturation index of at least 10/85/5 suggestive of low estrogen
- c) Serum estradiol : < 20 pg/ml

Options:

- 1) a & b
- 2) b & c
- 3) c & d
- 4) a, b, c

Correct Answer: a, b, c

QID : 39 - Which of the following is invariably the primary site of pelvic tuberculosis :

Options:

- 1) Ovary
- 2) Fallopian tube
- 3) Uterus
- 4) Cervix

Correct Answer: Fallopian tube

QID : 40 - Retrograde menstruation is a feature of :

Options:

- 1) Dysfunctional uterine bleeding
- 2) Endometriosis
- 3) Post Menopausal bleeding
- 4) Adenomyosis

Correct Answer: Endometriosis

QID : 41 - Which of the following is not a feature of Polycystic Ovarian Syndrome (PCOS) :

Options:

- 1) Anovulation
- 2) Hyperandrogenism
- 3) Decreased LH : FSH ratio
- 4) More than 12 peripherally arranged cysts (2-9 mm) in ovaries on sonography

Correct Answer: Decreased LH : FSH ratio

QID : 42 - A 32 year old multipara presented with 32 weeks gestation, mild vaginal bleeding and abdominal pain. On examination her blood pressure was 150/100 mm Hg; abdomen was tense, tender and hard. Fetal heart sounds were not audible. On vaginal examination, placenta was not felt in lower segment. The most likely diagnosis is :

Options:

- 1) Placenta praevia
- 2) Abruption placenta
- 3) Preterm labour
- 4) Pyelonephritis

Correct Answer: Abruption placenta

QID : 43 - Which of the following is a feature of healing by secondary intention?

Options:

- 1) Apposition of wound edge
- 2) Minimal surrounding tissue trauma
- 3) Healing by granulation, contraction and epithelialisation
- 4) Minimal scar

Correct Answer: Healing by granulation, contraction and epithelialisation

QID : 44 - A 28 year old male presented with a discharging opening in the natal cleft overlying the coccyx. On examination, hairs were seen projecting from the sinus. Most likely diagnosis is.

Options:

- 1) Haemorrhoids
- 2) Anal fissure
- 3) Pilonidal sinus
- 4) Hiradenitis suppurativa

Correct Answer: Pilonidal sinus

QID : 45 - A 40-year male presented with sudden onset of epigastric pain radiating to back with repeated vomiting and hiccoughs. On examination, Pulse was 100 per minute, Blood pressure 90/60 mm of Hg and bluish discoloration of flanks and Umbilicus. The abdomen was distended and tender.

Which blood investigation should be performed in this case to confirm acute pancreatitis?

Options:

- 1) Troponin
- 2) Serum Amylase
- 3) Creatine phosphokinase test (CPK)
- 4) Acid phosphatase

Correct Answer: Serum Amylase

QID : 46 - A 40 year old male complains of regurgitation of saliva and ingested but undigested food. A barium radiograph reveals a 'bird's beak' deformity in distal oesophagus. What is the probable diagnosis?

Options:

- 1) Achalasia cardia
- 2) Pyloric stenosis
- 3) Duodenal atresia
- 4) Hiatus hernia

Correct Answer: Achalasia cardia

QID : 47 - Which of the following hernias follow the path of the spermatic cord within the cremasteric muscle?

Options:

- 1) Femoral hernia
- 2) Direct inguinal hernia
- 3) Indirect inguinal hernia
- 4) Umbilical hernia

Correct Answer: Indirect inguinal hernia

QID : 48 - A 40 year old smoker presented with pain in right lower limb aggravated on walking and feels better by rest. On examination, limb becomes pale on elevation and changes to red when the limb is allowed to hang down.

The pulsations in right dorsalis pedis and posterior tibial artery were not felt. The most probable diagnosis is:

Options:

- 1) Peripheral vascular disease
- 2) Spinal Stenosis
- 3) Deep vein thrombosis
- 4) Spondylolisthesis

Correct Answer: Peripheral vascular disease

QID : 49 - Which of the following statements is not a feature of Fallot's Tetralogy?

Options:

- 1) Atrial Septal Defect

- 2) Overriding aorta
- 3) Pulmonary stenosis
- 4) Right ventricular hypertrophy

Correct Answer: Atrial Septal Defect

QID : 50 - All are the components of Acute inflammation except

Options:

- 1) Dilation of small vessels
- 2) Liberation of cytokines
- 3) Decreased permeability of micro vasculature
- 4) Emigration of the leucocytes from micro circulation

Correct Answer: Decreased permeability of micro vasculature

QID : 51 - Which of the following is a gram positive Bacterial infection?

Options:

- 1) Gonorrhoea
- 2) Plague
- 3) Chancroid
- 4) Anthrax

Correct Answer: Anthrax

QID : 52 - The first stage of plasmodium in human blood cell characterized by single chromatin mass is

Options:

- 1) Sporozoite
- 2) Merozoite
- 3) Trophozoite
- 4) Schizont

Correct Answer: Trophozoite

QID : 53 - Which of the following statements is true for atheromatous plaque

Options:

- 1) Stable plaques have thin fibrous cap
- 2) Unstable plaques have dense fibrous cap
- 3) Unstable plaques have minimal lipid accumulation
- 4) Unstable plaques have large lipid cores

Correct Answer: Unstable plaques have large lipid cores

QID : 54 - Macro-ovalocytes is a feature of -

Options:

- 1) Iron deficiency anemia
- 2) Megaloblastic anemia

- 3) Polycythemia
- 4) Thrombocytopenia

Correct Answer: Megaloblastic anemia

QID : 55 - Which type of emphysema is associated with Alpha-I Antitrypsin deficiency?

Options:

- 1) Centriacinar
- 2) Panacinar
- 3) Distal acinar
- 4) Irregular

Correct Answer: Panacinar

QID : 56 -

Match the following

- | | |
|-----------------|---|
| a) Cina | i) Stools like chopped spinach |
| b) Phosphorous | ii) Yellow substance like pulp of orange in stool |
| c) Natrum carb | iii) Stools like small pieces of popcorn |
| d) Argentum nit | iv) Stools like sago particles |

Options:

- 1) a – ii b – i c – iv d – iii
- 2) a – iv b – ii c – iii d – i
- 3) a – iii b – iv c – ii d - i
- 4) a – iii b – i c – ii d – iv

Correct Answer: a – iii b – iv c – ii d - i

QID : 57 -

Match the following

- | | |
|-----------------|-------------------------------------|
| a) Terebinth | i) Intensely Urinous odour |
| b) Benzoic acid | ii) Urine smells like horse's urine |
| c) Nitric acid | iii) Urine has odour of violets |

Options:

- 1) a – ii b – i c – iii
- 2) a – i b – iii c – ii
- 3) a – iii b – i c – ii

4) a – iii b – ii c – i

Correct Answer: a – iii b – i c – ii

QID : 58 - Vomiting with convulsive gagging and inexpressible pain after laparotomy is an indication of the following medicines.

- a) Bismuth
- b) Symphytum
- c) Staphysagria
- d) Nux vomica

Options:

- 1) a,b,c,
- 2) a,c,d
- 3) a,b,d
- 4) b,c,d

Correct Answer: a,c,d

QID : 59 - The sensation as if anus is open, is present in:

Options:

- 1) Lachesis
- 2) Phosphorus
- 3) Causticum
- 4) Nitric acid

Correct Answer: Phosphorus

QID : 60 - The symptom "Constipation always before and during menses" is indicative of -

Options:

- 1) Ammonium carb
- 2) Veratrum alb
- 3) Silicea
- 4) Bovista

Correct Answer: Silicea

QID : 61 -

Match the following complementary medicines

- | | |
|------------------|----------------|
| a) Stannum met | i) Ruta |
| b) Calcarea phos | ii) Pulsatilla |
| c) Kali carb | iii) Chamomila |
| d) Mag carb | iv) Carbo veg. |

Options:

- 1) a – ii b – i c – iv d - iii
- 2) a – i b – iii c – ii d - iv
- 3) a – iii b – ii c – i d - iv
- 4) a – iv b – iii c – i d – iv

Correct Answer: a – ii b – i c – iv d - iii

QID : 62 - Which of the following statements is false :

- a) Cough aggravated by drinking cold water is an indication of Cuprum met.
- b) Prolapse of rectum immediately on attempting a passage is characteristic of Ruta
- c) Pain from sacrum to pubis in nearly all diseases is a keynote of Sabina
- d) Sensitiveness of vagina, rendering coition painful is a feature of Lyssin.

Options:

- 1) a, b and c
- 2) a, c and d
- 3) a only
- 4) b and d only

Correct Answer: a only

QID : 63 - Headache with sensation as if being lifted up high into the air and great anxiety lest she falls from this height is symptom of

Options:

- 1) Bryonia
- 2) Melilotus
- 3) Veratrum Viride
- 4) Hypericum

Correct Answer: Hypericum

QID : 64 - Very forgetful in business, but during sleep dreams of what he had forgotten is a symptom of -

Options:

- 1) Selenium
- 2) Sanicula
- 3) Sepia
- 4) Sanguinaria can.

Correct Answer: Selenium

QID : 65 - Fever paroxysm at 7a.m. with great loquacity during chill and heat is characteristic of

Options:

- 1) Thuja
- 2) Podophylum
- 3) Cactus
- 4) Apis Mell

Correct Answer: Podophylum

QID : 66 - Bubbling sensation in kidneys is a symptom of

Options:

- 1) Berberis Vulgaris
- 2) Cantharis
- 3) Sarsaparilla
- 4) Terebinth

Correct Answer: Berberis Vulgaris

QID : 67 - Which of the following is false regarding the character of cough

Options:

- 1) Gurgling sound in Cuprum met
- 2) Cough dry like a saw driven through a pine board in Spongia
- 3) Minute gun cough during day in Corallium rubrum
- 4) Cough in 3 paroxysms in Merc sol.

Correct Answer: Cough in 3 paroxysms in Merc sol.

QID : 68 - Stertorous breathing and hot perspiration all over body except lower limbs are symptoms of

Options:

- 1) Nux moschata
- 2) Gelsemium
- 3) Opium
- 4) Antim tart

Correct Answer: Opium

QID : 69 - Constant pain under lower and inner angle of right scapula is a feature of

Options:

- 1) Phosphorus
- 2) Chelidonium
- 3) Gelsemium
- 4) Sanguinaria can.

Correct Answer: Chelidonium

QID : 70 - Which one of the following does not have the features-Thirst, drinks little and often is vomited as soon as it reaches the stomach?

Options:

- 1) Sanicula
- 2) Arsenic alb
- 3) Phosphorus
- 4) Pulsatilla

Correct Answer: Pulsatilla

QID : 71 - Which of the following is a right sided remedy, inimical to Lachesis and antidotes poisoning with Rhus and stings of insects

Options:

- 1) Apis mell
- 2) Lycopodium
- 3) Ammonium carb
- 4) Arnica montana

Correct Answer: Ammonium carb

QID : 72 - Ignatia is incompatible with all of the following except

Options:

- 1) Coffea
- 2) Nux vomica
- 3) Natrum mur
- 4) Tabacum

Correct Answer: Natrum mur

QID : 73 - Impotence : with relaxed penis with sexual desire and excitement is found in all EXCEPT

Options:

- 1) Caladium
- 2) Lycopodium
- 3) Selenium
- 4) Cantharis

Correct Answer: Cantharis

QID : 74 -

Match the following

- | | |
|--------------------|--|
| a) Veratrum viride | i) Triangular red tip tongue |
| b) Rhustox | ii) Tongue white or yellow with red streak down the middle |
| c) Natrum phos | iii) Fiery red tongue, clean, smooth as if varnished |
| d) Pyrogen | iv) Golden yellow coating at the base of tongue |

Options:

- 1) a – ii b – i c – iv d - iii
- 2) a – i b – ii c – iii d - iv
- 3) a – iii b – i c – iv d - ii
- 4) a – iv b – ii c – i d – iv

Correct Answer: a – ii b – i c – iv d - iii

QID : 75 - Which of the following medicines is especially adapted to complaints of first and second childhood, the psoric or tubercular

Options:

- 1) Graphites
- 2) Baryta Carb
- 3) Sepia
- 4) Conium

Correct Answer: Baryta Carb

QID : 76 - Change of remedy is recommended when

Options:

- 1) Symptoms change and patient is not improving
- 2) Case is following Hering's direction of cure
- 3) Homoeopathic aggravation
- 4) Symptoms change and patient is improving

Correct Answer: Symptoms change and patient is not improving

QID : 77 - Hahnemann has recommended palliative treatment in which of the following conditions.

Options:

- 1) Sudden accidents with danger to life
- 2) Dysmenorrhea

- 3) True chronic diseases
- 4) Indisposition

Correct Answer: Sudden accidents with danger to life

QID : 78 - In a patient suffering from recurrent attacks of allergic rhinitis, the chronic symptoms are expressed most clearly.

Options:

- 1) During acute attack
- 2) At the end of acute attack
- 3) During indisposition
- 4) At beginning of acute attack

Correct Answer: At the end of acute attack

QID : 79 - Apparent symptoms caused by excess of homoeopathic medicine during administration of indicated medicine in Fifty millesimal scale potency are known as :

Options:

- 1) Schein – Symptome
- 2) Accidental Symptom
- 3) Pathognomonic Symptom
- 4) Accessory miasm

Correct Answer: Schein – Symptome

QID : 80 - Law of minimum is NOT APPLICABLE in homoeopathic treatment of

Options:

- 1) Latent psora
- 2) Secondary stage of syphilis miasma
- 3) Primary stage of psora
- 4) Pseudo-psora

Correct Answer: Primary stage of psora

QID : 81 - Kent's EIGHTH observation highlights concept of :

Options:

- 1) Tautopathy
- 2) Idiosyncrasy
- 3) Palliation
- 4) Doctrine of signature

Correct Answer: Idiosyncrasy

QID : 82 - Which of the following does not belong to the class of chronic diseases

Options:

- 1) One sided diseases
- 2) Indisposition

- 3) Mental & Emotional diseases
- 4) Intermittent diseases

Correct Answer: Indisposition

QID : 83 - Doctrine of vital force was introduced in which edition of Organon of Medicine

Options:

- 1) Second
- 2) Fourth
- 3) Fifth
- 4) Sixth

Correct Answer: Fifth

QID : 84 - Fish brine odour is characteristic of which miasm

Options:

- 1) Sycosis
- 2) Psora
- 3) Pseudo psora
- 4) Syphilis

Correct Answer: Sycosis

QID : 85 - Alternation of Rhus tox and Bryonia was done by Hahnemann in epidemic of :

Options:

- 1) Measles
- 2) Scarlet fever
- 3) Typhus
- 4) Cholera

Correct Answer: Typhus

QID : 86 -

Match the following repertories with their authors:

- | | |
|---------------------------------------|---------------------|
| a) Repertory of Eyes | i) H.C. Allen |
| b) Repertory of cough & Expectoration | ii) Berridge |
| c) Repertory of Fever | iii) Lee and Clarke |

Options:

- 1) a - ii b - iii c - i
- 2) a - i b - ii c - iii
- 3) a - iii b - i c - ii
- 4) a - ii b - ii c - iii

Correct Answer: a - ii b - iii c - i

QID : 87 - In Boenninghausen's Therapeutic Pocket Book, rubric "Eyes protruding" is found under which section of parts of body & organs :

Options:

- 1) Eyes
- 2) Face
- 3) Vision
- 4) Mouth

Correct Answer: Face

QID : 88 - In Boger Boenninghausen's Characteristics & Repertory, rubric "Alcoholism" is found under which section :

Options:

- 1) Mind
- 2) Sensation & complaints in general
- 3) Circulation
- 4) Condition of aggravation & amelioration in general

Correct Answer: Mind

QID : 89 - In which section of Boger Boenninghausen's Characteristics & Repertory will you find the rubric "Hair falling out entire body"

Options:

- 1) Genitalia
- 2) Condition of aggravation & amelioration in general
- 3) Sweat
- 4) Skin

Correct Answer: Skin

QID : 90 - In which section of BBCR is mentioned rubric "Uric Acid diathesis"

Options:

- 1) Lower Extremities
- 2) Urinary organs
- 3) Upper Extremities
- 4) Condition of aggravation & amelioration in general

Correct Answer: Condition of aggravation & amelioration in general
