Max. Marks 85

Candidates are required to give their answers in their own words as far as practicable. Marks allotted to each question are indicated against it.

Special Instructions :-

2. While answering your questions, you must indicate on your Answer-book the same question No. as appears in your question paper.
3. Do not leave blank page / pages in your Answer-book.
4. This paper is divided into three sections A, B and C. All the sections are compulsory.
5. Do not exceed word limit wherever prescribed while answering the questions.

Section-A

Q1. Read the passages given below and answer the questions that follow :

- (i) In today's fiercely competitive business environment, companies need to communicate information pertaining to a whole range of issues in a lucid and precise manner to their customers.
- (ii) This is particularly so in the case of companies which do business in areas such as manufacturing, information technology (IT), engineering products and services — companies whose product and services may not be understood by a customer not familiar with its technical aspects.
- (iii) These communication materials are prepared in a company these days by 'technical writers — people who can effectively communicate to an intended audience.
- (iv) The skills of a technical writer are being increasingly sought for preparing marketing documents such as brochures, case studies, website content and media kit and for the preparation of a whole range of manuals. Though technical writers in a company do a good portion of such work, the trend now is to outsource technical writing to free-lancers.
- (v) Technical writing and writing text-books are poles apart. The former is aimed at those who do not have an in-depth knowledge about a product and hence should be direct and lucid. An overdose of technical terms and jargon would only add to the confusion of the customer.

- (vi) The basic requirement for being a technical writer is near total mastery over English language. A technical writer should be natural in creative writing and needs to be an expert in using Business English.
- (vii) This simply means that those with a Bachelor's degree in English Literature alongwith a diploma / degree in Journalism and having a Post-Graduate Diploma in Computer Application (PGDCA) are being employed as technical writers.
- (viii) According to Joe Winston, Chief Executive Officer of 'I Manager', speaking ability is not imperative for a technical writer. All that one needs is the talent to write in a simple and effective manner. Many have inhibition in speaking English but not their writing skills would be very sharp.
- (ix) Technical writing would be a good option for such people. If a candidate is to be assigned the task of preparing high–end technical manuals, he /she is required to have higher qualifications such as an M.A./M.Phil. in English Literature and a degree such as M.C.A.
- (x) Companies look for such qualifications because technical writer first need to understand the technical information themselves, before trying to communicate it in de-jargonised language to the potential customers.
- (xi) However, it is also true that many companies provide rigorous on the job-training to fresh technical writers before allowing them to graduate to high-end products.
- (xii) Though the demand for good technical writers has risen sharply over the years, the emphasis is never on numbers but on skills.
- (xiii) Merely having the right mix of writing and comprehension skills is not sufficient. A technical writer should keep his 'writing blades' constantly sharpened. It means untold hours of reading up the latest in the technological trends and ceaseless honing of one's Business English and writing skills. The nature of technical writing is such that a writer has to be at the peak of his expressive powers in each piece of writing he produces.
- (xiv) A career in technical writing is seen as a good choice for women mainly because it is widely held that women are more adept at creative writing than men and the job does not entail 'graveyard shifts' or 'arduous travelling'.
- (xv) A beginner can expect to be paid anywhere between Rs. 15,000/- a month. Technical writers usually join as executive technical writers and then go on to become senior technical writers, team leaders, documentation heads and some even manage to make it to a management job within a decade. As in most private sector jobs, merit is the main criterion for rise in jobs and not necessarily the number of years one has put in.

Questions :-

(a) Answer the following questions briefly :

(i) What is the need of technical writing in today's world ?

1

- (ii) What is the nature of the job of a technical writer ? 1
 - (iii) Whom does the technical writing aim at ? 1
 - (iv) According to Joe Winston, who could be a technical writer ? 1
 - (v) What should be the academic qualification of a technical writer ? 1
 - (vi) Is technical writing a good career for women ? Give two reasons. 2
- (b) Find words from the passage which mean the same as the following :
- (i) Clear (Para 1)
 - (ii) Continuous / without stopping (Para 13)
 - (iii) difficult (Para 14) (3×1=3)

Q2. Read the following passages carefully and answer the questions that follow :

Child labour has been sought in the country since the middle of the 19th century when factories first made an appearance. Since children in most industries provide the same productivity as adults, and in several cases even more, but at a far lower cost, they were soon recognised as a means to lower overheads and increase profits. However, as the industrial revolution progressed, gradually the people became aware of the torture they were subjecting their children to — both mentally and physically. But even as the country continued to progress at various levels, it lagged behind in terms of the wherewithal and prosperity needed to take care of new social relations which had sprung up. With the result that wages for workers were abysmally low and it was difficult for a family to survive on one man's wages. This is when human resources became the only true assets families had and every pair of working hands, including those of children, was engaged in earning a livelihood.

And once child labour had made an appearance in the job market, employers soon began to prefer working children to working adults, for not only could they give the same output as an adult worker at a much lower cost but were also more nimble and agile and more amenable to discipline. Today, child labour has become a vested interest for studies have revealed that child labour intensive areas are also high adult unemployment zone. So it is not as if adult workers are not available. They are available, only the employers prefer children because their high profits depend largely on child labour.

However, it would be unfair to categorise child labour as purely a medium of exploitation abject poverty existing in the country has made it a necessary evil gravitated by the economic compulsions of the parents or guardians. A study conducted revealed that 87% of the children in villages are forced to work out the economic necessity while another conducted on the urban child labour force disclosed that 88% of the children came to work due to poverty, 3% due to neglect parents, 5% due to sudden death of parents and 4% due to parental compulsions.

It is indeed lamentable that poverty even compels parents and guardians to barter their children for money. A number of young children are sold by their parents or pledged as bonded labour.

समाज में नारियों की स्थिति किसी भी समाज की संस्कृति की नींव पर आधार रखती है। शिक्षित, सुसंस्कृत नारी ही अपने समाज को आगे बढ़ा सकती है। भारत में नारियों की दशा समय-समय पर बदलती रही है। प्राचीन काल में, समाज में उनकी बहुत प्रतिष्ठा थी। समाज में उनको पुरुषों की भान्ति स्थान दे कर उन्हें कल्याणी, अर्द्धांगिनी, गृहलक्ष्मी आदि सुन्दर नामों से विभूषित किया। वे अध्यात्मवादी थीं और उनका लक्ष्य ज्ञान-विज्ञान द्वारा अपने को ऊँचा उठाना था। उनका दाम्पत्य जीवन धर्म और अध्यात्मवाद से ओतप्रोत था। वे वैदिक काल से ऋषियों के आश्रम में रह कर ऊँची-ऊँची शिक्षाएं प्राप्त करती थीं। उन्हें धार्मिक ग्रन्थों की शिक्षा प्राप्त करने का अधिकार समाज द्वारा मान्य था। उनका जीवन स्वतन्त्र था। वे साहित्य, विज्ञान, कला, राजनीति सभी क्षेत्रों में पुरुषों के समकक्ष थीं। परन्तु जैसे-जैसे समय बीतता गया, नारियों की स्थिति खराब होती गई। समाज के ठेकेदारों ने नारियों के अधिकार छीन लिए। अशिक्षित, दुर्बल नारियों ने वधू, विधवा और दासी स्त्री के रूप में वर्षों तक घोर अत्याचार सहा। स्त्री अहिंसा की अवतार है। अहिंसा का अर्थ है – असीम प्रेम और असीम प्रेम का अर्थ है – असीम कष्ट सहने की शक्ति। यह शक्ति पुरुष की जननी स्त्री के सिवा अधिक से अधिक मात्रा में कौन दिखा सकता है ? संसार भर में सारी स्त्रियां बहनें हैं, माताएं हैं। यह विचार ही मनुष्य को ऊँचा उठाने वाला है और बन्धन से मुक्त करने वाला है।
