I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors

1. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
2. As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down
3. Past performance of the Sponsors/AMC/Mutual Fund does not guarantee future performance of the scheme.
4. The name of the scheme does not in any manner indicate either the quality of the scheme or its future prospects and returns.
5. The sponsors are not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of ₹10,000/- made by them towards setting up the Fund.
6. The present scheme is not a guaranteed or assured return scheme.
7. Statements/Observations made are subject to the laws of the land as they exist at any relevant point of time.
8. Growth, appreciation, dividend and income, if any, referred to in this Scheme Information Document are subject to the tax laws and other fiscal enactments as they exist from time to time.
9. The NAVs of the Scheme may be affected by changes in the general market conditions, factors and forces affecting capital market, in particular, level of interest rates, various market related factors and trading volumes, settlement periods and transfer procedures.
10. The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.
11. Mutual Funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in schemes. The various factors which impact the value of scheme investments include but are not limited to fluctuations in the equity and bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes etc. and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
12. As the liquidity of the Scheme's investments could at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of units may be significant in the event of an inordinately large number of redemption requests or of a restructuring of the Scheme's portfolio. In view of this the Trustee has the right, in sole discretion to limit redemptions (including suspending redemption) under certain circumstances, as described under the section titled "Right to limit Redemptions" in the SAI.
13. **Credit Risk:** Bonds /debentures as well as other money market instruments issued by corporates run the risk of down grading by the rating agencies and even default as the worst case. Securities issued by Central/State governments have lesser to zero probability of credit / default risk in view of the sovereign status of the issuer.
14. **Interest - Rate Risk:** Bonds/ Government securities, which are fixed income securities, run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The level of interest rates is determined by the rates at which government raises new money through RBI, the price levels at which the market is already dealing in existing securities, rate of inflation etc. The extent of fall or rise in the prices is a function of the prevailing coupon rate, number of days to maturity of a security and the increase or decrease in the level of interest rates. The prices of Bonds/ Government securities are also influenced by the liquidity in the financial system and/or the open market operations (OMO) by RBI. Pressure on exchange rate of the rupee may also affect security prices. Such rise and fall in price of bonds/ government securities in the portfolio of the scheme may influence the NAV under the scheme as and when such changes occur.
15. **Liquidity Risk:** The Indian debt market is such that a large percentage of the total traded volumes on particular days might be concentrated in a few securities. Traded volumes for particular securities differ significantly on a daily basis. Consequently, the scheme might have to incur a significant "impact cost" while transacting large volumes in a particular security.
16. The aggregate value of "illiquid securities" of the scheme, which are defined by SEBI as non traded, thinly traded and unlisted equity shares, shall not exceed 15% of the total assets of the scheme and any illiquid securities held above 15% of the total assets shall be assigned zero value. The scheme would aim to invest in a higher proportion of liquid and traded debt instruments including Government Securities. As the Indian Debt market is characterised by high degree of illiquidity, the proposed aggregate holding of assets considered "illiquid", including debt securities (for which there is no active established market), could be more than 10% of the value of the net assets of the scheme. In normal course of business, the scheme would be able to make payment of redemption proceeds within 10 business days, as it would have sufficient exposure to liquid assets.

In case of the need for exiting from such illiquid debt instruments in a short period of time, the NAV of the scheme could be impacted adversely.
17. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable,

UTI-Unit Linked Insurance Plan (UTI-ULIP)

even though it is intended to generate capital appreciation and maximize the returns by actively investing in equity/equity related securities.

18. The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.
19. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the equity and equity related investments made by the Scheme which could cause the scheme to miss certain investment opportunities. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The inability of the Scheme to make intended securities purchases due to settlement problems could also cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Scheme's portfolio due to the absence of a well developed and liquid secondary market for debt securities would result, at times, in potential losses to the Scheme, in case of a subsequent decline in the value of securities held in the Scheme's portfolio.
20. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. Within the regulatory limits, the AMC may choose to invest in unlisted securities that offer attractive yields. This may however increase the risk of the portfolio.
21. The Scheme may use various derivative products as permitted by the Regulations. Use of derivatives requires an understanding of not only the underlying instrument but also of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Usage of derivatives will expose the Scheme to certain risks inherent to such derivatives
22. The Scheme may also invest in ADRs / GDRs as permitted by Reserve Bank of India and Securities and Exchange Board of India. To the extent that some part of the assets of the scheme may be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.
23. A scheme intends to deploy funds in money market instruments to maintain liquidity. To the extent that some assets/funds are deployed in money market instruments, the scheme will be subject to credit risk as well as settlement risk which might affect the liquidity of the scheme.
24. Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly a scheme's risk may increase or decrease depending upon its investment pattern. For eg. Corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.
25. **Securities Lending:** It is one of the means of earning additional income for the scheme with a lesser degree of risk. The risk could be in the form of non-availability of ready securities for sale during the period the securities remain lent. The scheme would be exposed to risk through the possibility of default by the borrower/intermediary in returning the securities. However, the risk would be adequately covered by taking of suitable collateral from the borrower by the intermediary involved in the process. The scheme will have a lien on such collateral. It will also have other suitable checks and controls to minimise any risk involved in the securities lending process.
26. **Investment in overseas markets:** The success of investment in overseas markets depends upon the ability of the fund manager to understand conditions of those markets and analyse the information which could be different from Indian markets. Operations in foreign markets would be subject to exchange rate fluctuation risk besides market risks of those markets.
27. **Trading in debt and equity derivatives involves certain specific risks like:**
 - a. **Credit Risk:** This is the risk on default by the counter party. This is usually to the extent of difference between actual position and contracted position. This risk is substantially mitigated where derivative transactions happen through clearing corporation.
 - b. **Market Risk:** Market movement may also adversely affect the pricing and settlement of derivative trades like cash trades.
 - c. **Illiquidity Risk:** The risk that a derivative product may not be sold or purchased at a fair price due to lack of liquidity in the market.
 - d. An exposure to derivatives can lead to losses. Success of dealing in derivatives depends on the ability of the Fund Manager to correctly assess the future market movement and in the event of

UTI-Unit Linked Insurance Plan (UTI-ULIP)

incorrect assessment, if any, performance of the scheme could be lower.

- e. Interest Rate Swaps (IRSs) and Forward Rate Agreements (FRAs) do also have inherent credit and settlement risks. However, these risks are substantially less as they are limited to the interest stream and not the notional principal amount.
 - f. Participating in derivatives is a highly specialized activity and entails greater than ordinary investment risks. Notwithstanding such derivatives being used for limited purpose of hedging and portfolio balancing, the overall market in these segments could be highly speculative due to action of other participants in the market.
 - g. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
 - h. The risk associated with the use of derivatives are different from or possible greater than, the risk associated with investing directly in securities and other traditional investments.
28. In the event of receipt of inordinately large number of redemption requests or of a restructuring of the Scheme portfolio, there may be delays in the redemption of units.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. The two conditions shall be complied with in each calendar quarter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

UTI-Unit Linked Insurance Plan (UTI-ULIP)

II. INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

UTI-Unit Linked Insurance Plan is an open ended tax saving cum insurance scheme.

B. WHAT IS THE INVESTMENT OBJECTIVE OF THE SCHEME?

Investment objectives of the scheme is primarily to provide return through growth in the NAV or through dividend distribution and reinvestment thereof. Amounts collected under the scheme shall generally be invested as follows:

- (a) Not less than 60% of the funds in debt instruments with low to medium risk profile.
- (b) Not more than 40% of the funds in equities and equity related instruments.

C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

- (a) Minimum and maximum asset allocation:

Instruments	Indicative allocation (% of Total Assets)		Risk profile
	Maximum	Minimum	
Debt	100%	60%	Low to Medium
Equity	40%	0%	Medium to High

- (b) No fixed allocation will normally be made for investment in money market instruments. Investment in money market instruments will however be kept to the minimum so as to be able to meet the liquidity needs of the scheme. Pending deployment of funds in securities in accordance with the investment objective of the scheme, the AMC may invest the surplus in money market instruments.
- (c) The scheme retains the option to alter the asset allocation for short term periods on defensive considerations.

(d) Debt and Money market in India

(i) Debt Instrument Characteristics:

A Debt Instrument is basically an obligation which the borrower has to service periodically and generally has the following features:

- Face Value : Stated value of the paper / Principal Amount
- Coupon : Zero; fixed or floating
- Frequency : Semi-annual; annual, sometimes quarterly
- Maturity : Bullet, staggered
- Redemption : FV; premium or discount
- Options : Call/Put
- Issue Price : Par (FV) or premium or discount

A debt instrument comprises of a unique series of cash flows for each paper, terms of which are decided at the time of issue. Discounting these

cash flows to the present value at various applicable discount rates (market rates) provides the market price.

(ii) Debt Market Structure:

The Indian Debt market comprises of the Money Market and the Long Term Debt Market.

Money market instruments have a tenor of less than one year while debt market instruments typically have a tenor of more than one year.

Money market instruments are Commercial Papers (CPs), Certificates of Deposit (CDs), Treasury bills (Tbills), Repos, Inter-bank Call money deposit, CBLOs etc. They are mostly discounted instruments that are issued at a discount to face value.

Long Term Debt market in India comprises mainly of two segments viz., the Government securities market and the corporate securities market.

Government securities includes central, state and local issues. The main instruments in this market are Dated securities (Fixed or Floating) and Treasury bills (Discounted Papers). The Central Government securities are generally issued through auctions on the basis of 'Uniform price' method or 'Multiple price' method while State Govt. are through on-tap sales.

Corporate debt segment on the other hand includes bonds/debentures issued by private corporates, public sector units (PSUs) and development financial institutions (DFIs). The debentures are rated by a rating agency and based on the feedback from the market, the issue is priced accordingly. The bonds issued may be fixed or floating. The floating rate debt market has emerged as an active market in the rising interest rate scenario. Benchmarks range from Overnight rates or Treasury benchmarks.

Debt derivatives market comprises mainly of Interest Rate Swaps linked to Overnight benchmarks called MIBOR (Mumbai Inter Bank Offered Rate) and is an active market. Banks and corporate are major players here and of late Mutual Funds have also started hedging their exposures through these products.

Securitized Debt Instruments - Asset securitization is a process of transfer of risk whereby commercial or consumer receivables are pooled packaged and sold in the form of financial instruments. A typical process of asset securitisation involves sale of specific Receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company. The SPV in turn issues financial instruments to investors, which are rated by an independent credit rating agency. Bank, Corporates, Housing and Finance companies generally issue securitized instruments. The underlying receivables generally comprise of loans of Commercial Vehicles, Auto and Two wheeler pools, Mortgage pools (residential housing loans), Personal Loan, credit card and Corporate receivables.

UTI-Unit Linked Insurance Plan (UTI-ULIP)

The instrument, which is issued, includes loans or receivables maturing only after all receivables are realized. However depending on timing of underlying receivables, the average tenure of the securitized paper gives a better indication of the maturity of the instrument.

(iii) Regulators: The RBI operates both as the monetary authority and the debt manager to the government. In its role as a monetary authority, the RBI participates in the market through open-market operations as well as through Liquidity Adjustment facility (LAF) to regulate the money supply. It also regulates the bank rate and repo rate, and uses these rates as indirect tools for its monetary policy. The RBI as the debt manager issues the securities at the cheapest possible rate. The SEBI regulates the debt instruments listed on the stock exchanges.

(iv) Market Participants:

Given the large size of the trades, the debt market has remained predominantly a wholesale market.

Primary Dealers

Primary dealers (PDs) act as underwriters in the primary market, and as market makers in the secondary market.

Brokers

Brokers bring together counterparties and negotiate terms of the trade.

Investors

Banks, Insurance Companies, Mutual Funds are important players in the debt market. Other players are Trusts, Provident and pension funds.

(v) Types of Security Issuances and Eligible Investors

Issuer	Instruments	Yields	Maturity	Investors
Central Government	Dated Securities	8.12% - 8.92%	1-30 years	Banks, Insurance Co, PFs, MFs, PDs, Individuals, FII

Negotiated Dealing System (NDS) is an electronic platform for facilitating dealing and online reporting of transactions. Government Securities (including T-bills), call money, notice/term money, repos in eligible securities, etc. are available for negotiated dealing through NDS. Currently G-Sec deals are done telephonically and reported on NDS. Corporate Debt is basically a phone driven market where deals are concluded verbally over recorded lines. The reporting of trade is done on the NSE Wholesale Debt Market segment.

3. Participating in Derivative Products:

- (i) These scheme will use hedging techniques including dealing in derivative products - like futures and options, warrants, interest rate swaps (IRS), forward rate agreement (FRA) as may be permissible under SEBI (MFs) Regulations.
- (ii) The schemes may take derivatives position based on the opportunities available subject to the guidelines issued by SEBI from time to time and in line with the overall investment objective of the scheme. These may be taken to hedge the portfolio and rebalance the same.
- (iii) The Fund manager may use various strategies for trading in derivatives with a view to enhancing returns and taking cover against possible fluctuations in the market.

(iv) Derivatives:

A derivative instrument, broadly, is a financial contract whose payoff structure is determined by the value of an underlying security, index, interest rate etc. Thus a derivative instrument derives its value from some underlying variable.

UTI-Unit Linked Insurance Plan (UTI-ULIP)

Derivatives are further classified into

Futures.

Options.

Swaps.

(v) Futures: A futures contract is a standardized contract between two parties where one of the parties commits to sell, and the other to buy, a stipulated quantity of a security at an agreed price on or before a given date in future.

(vi) Options:

An option is a derivative instrument which gives its holder (buyer) the right but not the obligation to buy or sell the underlying security at the contracted price on or before the specified date. The purchase of an option requires an up-front payment (premium) to the seller of the option.

There are two basic types of options, call option and put option.

(a) Call option:

A call option gives the buyer of the option the right but not the obligation to buy a given quantity of the underlying asset, at a given price (strike price), on or before a given future date.

(b) Put option:

A put option gives the buyer of the option the right but not the obligation to sell a given quantity of the underlying asset, at a given price (strike price), on or before a given future date.

On expiry of a call option, if the market price of the underlying asset is lower than the strike price the call would expire unexercised. Likewise, if, on the expiry of a put option, the market price of the underlying asset is higher than that of the strike price the put option will expire unexercised.

The buyer/holder of an option can make loss of not more than the option premium paid to the seller/writer but the possible gain is unlimited. On the other hand, the option seller/writer's maximum gain is limited to the option premium charged by him from the buyer/ holder but can make unlimited loss.

(vii) Swaps:

The exchange of a sequence of cash flows that derive from two different financial instruments. For example, the party receiving fixed in an ordinary Interest Rate Swap receives the excess of the fixed coupon payment over the floating rate payment. Of course, each payment depends on the rate, the relevant day count convention, the length of the accrual period, and the notional amount.

Debt derivatives are as of now customised over the counter products and there is no guarantee that these products will be available on tap.

There are various possible combinations of strategies, which may be adopted, in a specific situation. The provision for trading in derivatives is an enabling provision and it is not binding on the Scheme to undertake trading on a day to day basis.

(viii) Exposure limits:

- a. The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.
- b. Mutual Funds shall not write options or purchase instruments with embedded written options.
- c. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
- d. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.
- e. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following:-
 - (i) Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - (ii) Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point a.
 - (iii) Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
 - (iv) The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.

UTI-Unit Linked Insurance Plan (UTI-ULIP)

- f. Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.
- g. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point a.

Definition of Exposure in case of Derivative Positions

Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Premium Paid * Lot Size * Number of Contracts.

The AMC retains the right to enter into such derivative transactions as may be permitted by the Regulations from time to time. For risks associated with investments in derivatives investors are requested to refer to Risk Factors of this Scheme Information Document.

E. WHAT ARE THE INVESTMENT STRATEGIES?

The debt component of the scheme would be invested in debt securities and money market instruments. The duration of the debt portfolio would primarily be managed with a view to generate income with minimum interest rate risk. Owing to its long term nature, emphasis will be on adjusting the asset allocation and the mix within an asset class depending on the prevailing market conditions.

Portfolio Turnover Policy

The scheme portfolio management style is conducive to a low portfolio turnover rate. However, the scheme will take advantage of the opportunities that present themselves from time to time because of the inefficiencies in the securities markets. A high portfolio turnover rate in the equity component of the portfolio may represent arbitrage opportunities that exist for scrips held in the portfolio. The AMC will endeavour to balance the increased cost on account of higher portfolio turnover with the benefits derived therefrom.

However, the detailed parameters for such investments shall be approved by the AMC Boards and the Trustees. The details of such investments shall be communicated by UTI AMC to the Trustees in their periodical reports. However, in case any security does not fall under the parameters, the prior approval of the Board of AMC and Trustees shall be required.

It is further clarified that the investment limits at clause II (I) (a) and (b) above are applicable to all debt securities, which are issued by public bodies/institutions such as electricity boards, municipal corporations, state transport corporations etc. guaranteed by either state or central government. Presently, the minimum target amount under the scheme is ₹15000/- which is required to be invested over 10/15 year period. The UTI AMC may change the minimum target amount if and when it is considered necessary. It will be applicable to those investors who will be joining the scheme after such a change is made effective. Beyond the minimum, the target amount can be chosen in multiples of ₹1000 / ₹1500 for participating in the 10/15 year plan respectively. Accordingly, unitholders are eligible to participate for the target amount up to ₹15,00,000/- provided the target amount is in multiples of ₹1000/- and ₹1500/- as the case may be.</p> <p>The target amount can be increased or reduced in association with LIC or any insurance company, as the case may be. A person can participate in the scheme to the extent of the maximum target amount either through one or more applications over a period of time subject to his being not above the maximum age prescribed for entry to the scheme.</p> <p>(b) The first/initial contribution shall have to be paid along with the application for joining the scheme. Subsequent contributions (renewal contributions) are required to be paid by the unitholders either half-yearly or annually or any number of contributions upfront to the extent desired by the unitholder or at such other intervals, as the UTI AMC may permit from time to time, as per the option indicated by him at the time of joining the scheme. The period and mode of contribution once exercised is final and cannot be changed.</p> <p>(c) When the unitholder joins the 10 year plan, the amount of each contribution shall be 1/20th of the target amount in the case of the half-yearly mode of payment and 1/10th of the target amount in the case of the annual mode of payment. For the unitholders joining the scheme for 15 years, each contribution shall be 1/30th of the target amount in the case of the half-yearly mode of payment and 1/15th of the target amount in case of the annual mode of payment. If it is decided to permit contribution at any other interval/s the number of contributions will also be prescribed at that time.</p> <p>(d) The half-yearly renewal contributions shall fall due in the seventh month from the month in which initial contribution is paid and the month in which the unitholder had joined the scheme (the due month). If the yearly mode is opted, the RC will fall due every year in the month in which the unitholder had joined the scheme. Illustratively, if the initial contribution is paid in the month of January, the half yearly contributions will fall due on the first day of the months of July and January every year. Similarly, in case of yearly mode all the subsequent contributions shall fall due on the first day of the month of January every year. However, the unitholder is allowed to pay any number of renewal contributions in advance in multiples of the instalment amount. The contribution paid in advance will have no effect on the life insurance cover.</p> <p>(e) Depending on the “due month” for payment of the renewal contribution as detailed above, the renewal contribution has to be paid latest by the 1st of the “due month” otherwise the policy will lapse and no cover will be available.</p> <p>(f) The initial/renewal contributions will not be accepted during book closure, if any, under the scheme.</p> <p>(g) The investor can invest more than the maximum target amount of ₹15 lacs in one or more instalments, the life insurance cover will, however, be limited to ₹15 lacs.</p> <p>The maximum target amount of ₹15 lacs is the combined target amount available for the Declining term Insurance cover and Fixed Term Insurance Cover together.</p>
<p>Minimum balance to be maintained and consequences of non maintenance.</p>	<p>Partial redemption may be allowed after completion of 7 years and 10 years from the date of acceptance of the application under the 10 year and 15 year plans respectively subject to maintaining a minimum balance of ₹5,000/- to be reckoned at the NAV prevailing on the date of such redemption. November 13, 2000, granted interim relief of stay of the operation of the order dated July 27, 2000 of the Securities Appellate Tribunal and January 19, 2000 of SEBI and has further directed that the matter be placed on the board for final hearing. The matter is still pending.

- (b) The merchant banking division of the BoB was the pre-issue lead manger for the public issue of shares of Trident Steels Limited ("Trident") in November, 1993. SEBI issued a show cause notice dated April 29, 2004 calling upon the merchant banking division of the Bank to show cause why action should not be taken against it for failing in its duty to exercise due diligence in the above mentioned public issue. SEBI alleged that the merchant banking division of the Bank did not disclose the material fact that 750,000 shares out of the pre issue capital of Trident had been pledged by the directors and holders of those shares to the Industrial Finance Branch of the Bank towards enhancement of various credit facilities extended by the Bank to Trident. In October 1989, the directors and holders of those shares have given an undertaking that as long as the dues of Trident to the Bank are not paid in full, they will not transfer, deal with or dispose off equity or preference shares held by them in the company or any shares that might be acquired in future, without prior written consent of the Bank. BOB Caps, in its reply to the show cause notice, has submitted that it was the obligation of Trident to give true disclosures and that any punitive action will lie solely against Trident, its promoters and directors.
- (c) The BoB had acted as lead managers to the public issue of Kraft Industries Limited ("Kraft") in May 1995. It is alleged that the Managing Director and Promoter of Kraft did not possess the qualifications as mentioned in the prospectus. SEBI has asked for qualification certificates/copies from the Bank. The Managing Director of Kraft has reported having lost the certificates in transit. The Bank has replied accordingly to SEBI.
