## FELLOW PROGRAMME IN MANAGEMENT

The Fellow Programme in Management (FPM) is the doctoral programme of the Indian Institute of Management, Ahmedabad. The objective of the programme is to provide students with necessary skills to identify and research complex issues in the field of management. FPM seeks candidates with outstanding academic backgrounds, intellectual curiosity and discipline needed to make scholarly contribution.

FPM is a research programme. To the selected students, IIMA provides an excellent environment for carrying out advanced research, thus creating highly committed researchers trained in the most recent methodologies and engaged in producing original research work. IIMA's doctoral programme provides a diverse set of opportunities for interdisciplinary education and research. The small entering class ensures close interaction with the faculty, where students can determine their own directions under the guidance of their thesis advisory committees.

The student becomes part of one of the ten functional/sectoral groups and acquires the basic theoretical knowledge and practical aspects of the area. This allows close interaction with faculty members, who provide the intellectual stimulation and help develop the student's own research interests and professional goals. The programme is strongly committed to preparing thought leaders both for the academic and corporate world. Students spend generally a little over four years that includes two years of rigorous course work. Course work in the first year provides a general management overview and develops basic skills for analysing managerial problems.

In the second year, students take advanced doctoral level courses in their areas of specialization. The doctoral dissertation, for the next couple of years, provides them with an opportunity to make original contribution to an area of management or to one of its source disciplines.

IIMA's faculty have studied and worked in the best of institutions within India and around the world. Their involvement with public and private organizations internationally allows them to bring relevant managerial issues into the classroom and in their research. This creates an exceptional environment for developing a research programme that can build sound theory for analysing complex managerial problems.

## MESSAGE FROM THE FPM CHAIRPERSON

The Fellow Programme in Management (FPM) is the doctoral programme of the Indian Institute of Management, Ahmedabad – a programme committed to preparing leaders who will be change agents in the practice of management in the corporate world and government, as well as thought leaders in academic institutions. The students in this programme are chosen very carefully from a national selection process and are a small group who obtain the benefit of close interaction with the faculty who themselves have studied and worked in the best institutions in the world. Students are encouraged to first imbibe the tenets and understand the decision problems of the practicing world, which is why their first two terms in the first year of the programme is common with the Post-Graduate Programme in Management. They then go on to do advanced doctoral level course work for another year where they are brought up to date with the most recent developments in their chosen areas of specialization. With this foundation they are then encouraged to explore frontier issues in the field of management and to advance the state of knowledge in the discipline in their doctoral thesis.

The FPM students that are placed in an organization offer the benefit of a unique talent – the capability of performing tasks with speed and agility, combined with the aptitude of standing aside from the churning of the present and taking an objective view of the turn of events that are affecting and shaping the fortunes of an organization. For us, at IIM Ahmedabad, they are the future of what the discipline of management is going to be about.
