

# Placement Brochure

## 2012 - 2013

# Indian Statistical Institute

[www.isical.ac.in/~placement](http://www.isical.ac.in/~placement)

# Preface

This brochure provides relevant information about Indian Statistical Institute (ISI) for prospective employers. It comprises a brief introduction of the Institute followed by descriptions of various academic programmes, profiles of current batches of students and a summary of past recruitments.

The placement of ISI students is facilitated by the placement committee. On behalf of this committee, we would like to invite all prospective employers to visit the Kolkata campus to recruit students graduating in July/August 2013. Going by the latest trends in the placement of our students, it is indeed heartening to note that leading corporate giants have been visiting our Institute regularly with employment offers for outgoing students of our Masters-level academic programmes [M. Stat., M. Math., M.S. (QE), M. Tech. (CS) and M. Tech. (QROR)]. Our website (<http://www.isical.ac.in/~placement>) provides further details about course curriculum and other relevant information regarding placement opportunities.

Companies interested in campus recruitment are requested to send the ISI Campus Recruitment Form (preferably with relevant company literature), duly filled-in, by email/fax/courier/post to the Convener of the Placement Committee. Dates for campus interviews are fixed on a first-come, first-served basis. It may be mentioned here that the Institute does not charge any placement fee. We also do not permit placement consultants or third-party recruiters to conduct campus interviews. We look forward to formal feedbacks in the prescribed form, from companies after their campus recruitment, as inputs for review of our academic and placement policies.

We do hope that this placement brochure will be useful to employers visiting the Institute. Any suggestion for improving the brochure is most welcome.

Pinak Pani Pal  
*Convener, Placement Committee*

Bhabani P. Sinha

# Message from the Director

The Indian Statistical Institute has a long and proud tradition of excellence in training, teaching and research in a number of academic disciplines. The Institute completed its Platinum Jubilee Celebration in 2006 and has completed its one year Golden Jubilee Celebration of the degree courses in 2010. Its alumni have made outstanding contributions to academia, governance and industry, and it is my firm conviction that newer generations of alumni will continue to do so in years to come.

As in previous years, this brochure is being published to showcase our academic programmes and provide relevant information to prospective employers. I am sure that the HRD people of leading Commercial and Industrial Organization will continue to conduct on-campus recruitment with greater vigour, making offers of bright, productive future (with them) to our outgoing students every year.

Bimal K. Roy  
Director

# Message from the Dean of Studies

Indian Statistical Institute, founded in the year 1931, is an Institute of national importance. This Institute has been carrying forward the legacy of academic excellence of international repute since its inception. Over these years, we have adapted ourselves to the global and national trends in both teaching and research in Statistics, Mathematics, Economics, Computer Science and many other branches of natural and social sciences. Research, in its theoretical, applied and interdisciplinary forms, is the primary driving force of this institute. Our postgraduate courses are geared towards that end. This gives a unique edge of our students who are well proficient in the analytical skills. Currently, our Institute offers six master level courses along with Ph.D. programmes in Statistics, Mathematics, Computer Science, Quantitative Economics and Quality Reliability & Operations Research. Apart from these, we have two undergraduate courses in Statistics and Mathematics. We have four centres at Delhi, Bangalore, Chennai and Tezpur where also we run our courses in some of the above subjects.

The Placement brochure gives an overall idea about the placement process at Indian Statistical Institute.

I hope, you would find the placement brochure sufficiently informative.

It is my immense pleasure to invite the leading corporates and companies to hire our postgraduates as in the previous years through campus recruitments. I am sure our current students would prove themselves worthy as their seniors.

Bhabani P. Sinha  
Dean of Studies

# Introduction

The Indian Statistical Institute (ISI), founded by late Professor P. C. Mahalanobis in 1931, owes its origin to the statistical studies and research initiated by him in the Statistical Laboratory set up in Presidency College, Kolkata. The Institute was registered as a learned society under the Societies Registration Act in 1932. Later in 1959, the Parliament of India enacted the Indian Statistical Institute Act, 1959, declaring the Institute to be an Institution of National Importance and empowering it to confer degrees and diplomas in Statistics. The Indian Statistical Institute Act was amended in 1995 empowering it to grant degrees and diplomas in Statistics, Mathematics, Quantitative Economics, Computer Science and such other subjects related to Statistics. ISI has made some noteworthy contributions towards development of the nation. Formation of NSSO on the basis of the proposal from P.C. Mahalanobis was an important contribution to that extent. Also the second 5 year plan was chalked out at ISI under the guidance of Prof. Mahalanobis.

The Institute has all along been playing a pioneering role in theoretical and applied research, teaching and training, in the fields of Statistics, Mathematics, Economics, Computer Science, Quality Control, Reliability, Operations Research and other disciplines. It has made significant contributions to (a) statistical, social and economic planning of the government of India, (b) knowledge regarding statistical quality control and quantitative management techniques for industry, and (c) research and development in theoretical and applied Computer Science.

In keeping with its pursuit of excellence in research, the

Institute has designed several courses of study to train selected students in appropriate fields. ISI has been recognized as one of the pioneering institutes of this country to introduce degree programmes in respective fields. These programmes have always attracted some of the best talents of the country who have proved their worth in various organizations and educational institutions both in India and abroad. ISI has its head office at Kolkata with centres at New Delhi and Bangalore, where regular degree courses and research work in various disciplines are conducted. In addition, there are several Statistical Quality Control and Operations Research (SQC & OR) Units situated in other cities of the country. ISI regularly takes up large projects funded by public sector undertakings, defence, private sector enterprises, MNCs, the UN and its specialized agencies, Overseas Development Corporations (ODC), UK, Ford Foundation and other national and international bodies. Apart from these, software development assignments related to research problems from government bodies and industries are taken up regularly. The training environment at ISI is designed to impart an optimal combination of advanced theoretical knowledge and practical applications. The students actively participate in the ongoing projects and are exposed to real-life problems. The curriculum includes project work which consists of either solving real-life problems or developing theoretical tools for a class of problems. Students undergo internship with reputed industries and research institutes. The institute is in constant touch with other leading institutions in the world through the exchange of visiting faculties. This contact helps maintain a high standard of the training programmes.

| PROGRAMMES   | DURATION | VENUE                   |

# M. Stat.

## Introduction

The M.Stat programme of ISI is viewed as arguably the best postgraduate degree programme in Statistics in the world. This view is justified by the fact that people with an M. Stat. background have been accredited with a large percentage of the sophistication that Statistics has seen in the past few decades. The factors contributing to this legacy are the quality of the students and teachers alike and the rigorous and in-depth course structure with its unique out-of-the-box flavour.

## Programme Description

The M. Stat. programme is specifically designed to address both theoretical and practical issues and has the flexibility to evolve and change in response to new requirements.

## Admission

The M. Stat. programme is run through two parallel streams viz. the B-stream and the NB-stream. Graduates of our prestigious *B. Stat. course (the flagship programme of ISI)* are offered direct admission to the B-stream while graduates in statistics and mathematics from all over India are enrolled into the NB-stream are selected after a rigorous entrance procedure - a two tier subjective and objective assessment examination and a viva-voce thereafter.

## Courses

Subjects covered in the first two semesters of M. Stat. include:

- Regression Techniques
- Time Series Analysis and Forecasting
- Applied Stochastic Processes (only B-stream)
- Optimization Techniques
- Multivariate Analysis
- Decision Theory
- Measure Theoretic Probability
- Sample Surveys & Design of Experiments.

The final year students are required to opt for specialization in one of several branches of statistics as per his/her domain of interest.

The list of specialization offered for the current year includes:

- Actuarial Statistics
- Applied Statistics and Data Analysis
- Bio-Statistics and Data Analysis
- Mathematical Statistics and Probability

A detailed programme description is available at:  
MStat:

<http://www.isical.ac.in/~deanweb/MSTATBROCHURE2009.pdf>

BStat:

<http://www.isical.ac.in/~deanweb/brochure/bstat2010.pdf>

## Students

- The success rate in the ISI admission process is *1 out of 150, in comparison to 2% for the IITs and IIMs*, and an even lower success rate of BStat, where a meager number below 50 are selected compared to thousands in case of IITs .
- Even the selected students undergo rigorous training and course-work, under the best tutors in the field, and only those who keep to the standards survive the entire course.
- Students being awarded the best national scholarships like KVPY, NBHM, NTSE, INSPIRE and having won reputed national and international level Olympiads testify their highest levels of excellence.
- Students of MStat undergo a *special training for ISS personnel at C.S.O, New Delhi, followed by a project under various ministries of Govt. of India.*
- Students of *Actuarial specialization* gets automatic exemptions in 6 of the first 9 actuarial CT papers.
- Students are very conversant in using programming languages like C,C++ and statistical packages like R, MATLAB & SAS.

### Current Batch Strength

66 students

# M.S. (QE)

## Master of Science in Quantitative Economics

### Introduction

The Indian Statistical Institute has been playing a pioneering role in the research, training and application of Quantitative Economics in India for a long time. The MS (QE) programme, from its very inception, came up as one of the very best of its kind in the country and compared favourably with that of any top ranking university in the world. The popularity of the programme is partially reflected by the fact that students getting admission offers to MS (QE) as well as to other premier economics departments in the country have almost revealed their preferences for MS (QE) over the others.

### Programme Description

The MS (QE) programme aims to give the students not only a thorough exposure of economics and econometrics, but equips them with rigorous mathematical and statistical techniques that can be used as tools in the industry.

### Courses offered:

The programme has 20 courses - five per semester. A few courses are listed below:

- Econometrics
- Advanced Econometrics
- Time Series Analysis & Forecasting
- Mathematical Finance
- Game Theory
- Industrial Organization
- International Trade
- Macroeconomics & Microeconomics
- Development Economics
- Linear Algebra & Real Analysis

### Our strengths:

- Adaptable & innovative
- Market knowledge
- Communication skills

### Scope:

The course emphasizes theoretical as well as empirical aspects of the subjects. Class room teachings and traditional methods of evaluation are supplemented by assignments and take home projects. Majority of the students opt for challenging corporate jobs in India and abroad. Some students after successfully completing the MS (QE) programme have joined the top economics departments of the world including Harvard, Princeton, Yale, Northwestern, Boston, Rochester and Cornell, to pursue their Ph.D. degrees. A detailed programme description is available at

<http://www.isical.ac.in/~deanwebmsqebrochure2003.pdf>

### Students:

- The best students in the country are chosen for this programme based on extremely rigorous entrance exam followed by personal interviews.
- The programme has gained immense popularity even among working professionals from the industry who intend to take up higher course in economics.
- Students come from diverse backgrounds ranging from Economics, Mathematics, Statistics and Physics to even engineering graduates.
- Students also undergo internships in the corporate sector during their summer break.

### Current batch strength:

- 12 students

# M. Tech. (CS)

## Master of Technology in Computer Science

### Introduction

The Indian Statistical Institute has a long history of the use of computers dating back to the early fifties. The first electronic computer in Asia, a HEC-2N, was installed in the institute in 1956. One of the foremost formal courses for Computer Science started in the institute in 1962. By 1981, the institute started offering an M. Tech. course in Computer Science. Today this course admits students through GATE along with the very competitive ISI entrance examination.

Over the years the institute has attained the reputation of being a centre for cutting edge research in the fields of Soft computing, Image Processing, Pattern Recognition, Machine Learning, Information Retrieval, Handwriting recognition, Cryptography, VLSI, Nano-computing, Algorithms and Computational Geometry. The institute has an enviable group of around forty outstanding faculty members in the field of Computer Science. Currently the institute has five IEEE fellows along with several fellows of Indian National Science Academy, Indian National Academy of Engineering, IETE etc. No wonder the institute attracts some of the best students in the country.

### Major Subjects

The course admits students with B. Tech. degrees or M. Sc. degrees in Mathematics, Physics and Statistics. A list of some core and elective subjects follow:

- Design & Analysis of Algorithms
- Automata Languages and Computation
- Discrete Mathematics
- Probability & Stochastic Processes
- Optimization Techniques
- Computer Architecture
- Computer Networks
- Compiler Construction
- Advanced Database Theory
- Advanced Operating Systems
- Advanced Cryptography
- Pattern Recognition & Image Processing
- Artificial Intelligence
- Computational Geometry

### Our Strength

- Strong foundation in Algorithms and Data Structures.
- Programming skills: Proficient in C, C++, Java (on UNIX/LINUX and WINDOWS platforms), SQL and Shell Programming.
- In-depth knowledge of Operating Systems, Database Management, Computer Architecture and Networks.

### Summer Internship

In order to give the students a good exposure to the current trends in software Industry, they are sent to various industries as well as research organizations for Summer Internship (of about 8 to 12 weeks duration) after the end of the first year. Quite often, the students getting trained in an Industry environment pursue his/her year-long dissertation work in the same direction on a real-life problem.

### Scope

This course is designed to provide a strong foundation in computer science and lend a deep insight into several advanced topics, so that students, on completion of the course, may take up either a professional career in software technology or an academic career for further study and research in the fundamental and applied aspects of Computer Science and related disciplines. A detailed program description is available at

<http://www.isical.ac.in/~deanweb/brochure/cs2010.pdf>

### Current Batch Strength

23 students

# M. Tech. (QROR)

## Master of Technology in Quality, Reliability & Operations Research

### Introduction

Introduced in the year 1989, M.Tech-QROR is a one of its kind, two-year full time academic programme. This programme develops statistical analysts and quality professionals with the aid of a diverse course structure comprising of different Statistical Methodologies, Statistical Quality Control, Reliability Modeling & Life Testing and Optimization Techniques.

### Courses Offered

This programme comprises of 18 subjects, 2 Internship programmes and a Dissertation. The major subjects are:

- Probability Theory and Statistical Methods
- Regression Analysis
- Multivariate Analysis
- Applied Stochastic Process
- Reliability Modeling
- Operations Research
- Design of Experiments
- Statistical Quality Control
- Programming Techniques & DBMS
- Quality Management System
- Engineering Subjects (Statistics Stream only)

### Work Experience and Industry Exposure

- Several students pursuing this course have 1-2 years of work experience in various sectors.
- Every student undergoes two internship programmes in various Industries during his/her stay at ISI.
  - 3 months in 1<sup>st</sup> year
  - 5 months in 2<sup>nd</sup> year
- Internships Involve application of Predictive Models, Six Sigma, Reliability, Optimization Techniques, Data Mining, Time Series Forecasting and SQC Tools on live Projects for Companies such as PWC, Tata Steel, Apollo Hospital, Infosys, Schlumberger, etc.

### Students

- Consist of a diverse set of students from both engineering and statistics background.
- Best students from the country are selected for this course after a rigorous entrance examination followed by an interview.
- Students are well acquainted with C, MATLAB and different Statistical Packages like SAS, R, SPSS, MINITAB etc.

### Scope

As the course is designed to implement the statistical theories to handle the real life problems, majority of the students wish to opt for challenging corporate jobs in India and abroad. The past trend of recruitment reflects that many of the students have joined in banking, insurance, analytics, manufacturing, and software sectors.

### Current Batch Strength

- 9 students

A detailed program description is available at:

<http://www.isical.ac.in/~deanweb/brochure/qror2010.pdf>

# Doctor of Philosophy (Ph. D.)

## Introduction

The primary focus of this Institute is research. It has a Doctor of Philosophy programme, Ph.D., offered at its Bangalore, Delhi and Kolkata centres. This degree is awarded for original research contributions in any one of the following five disciplines: (i) Statistics, (ii) Mathematics, (iii) Quality Reliability & Operations Research (QROR), (iv) Computer Science, and (v) Quantitative Economics. For other disciplines like Biological Anthropology, Physics and Applied Mathematics, Agriculture & Ecology, Sociology, Human Genetics, Psychology, Demography and Library & Information Science, doctoral research is carried out in the institute but the degree is awarded from another reputed university. The programme aims to provide students with a high level of research acumen to take up research careers in either academics or industry and continue to contribute in any professional field involving analytical methodology.

## Major Areas in Different Disciplines

The broad areas in each discipline are as follows:

### Statistics:

- Biostatistics
- Design of Experiments
- Dependency Models
- Exploratory Data Analysis
- Multivariate Data Analysis
- Reliability Models, Survival Data Analysis
- Sample Surveys and Design
- Simulation and Study of Systems
- Statistical Inference - Classical and Bayesian
- Time Series and Forecasting

### Mathematics:

- Algebra
- Algebraic Number Theory
- Geometry and Topology
- Mathematical Finance
- Mathematical Logic
- Probability Theory, Stochastic Processes
- Set Theory and Descriptive Set Theory

### Quality, Reliability & Operations Research

- Business Analytics
- Game Theory and Strategy Development
- Measurement Systems for Product and Managerial Control
- Optimization
- Six Sigma, Lean Six Sigma
- Software Quality Measurement, Improvement and Control
- Statistical Process Control
- System and Product Reliability

## Computer Science:

- Bioinformatics, Computational Biology
- Computational Geometry and Graph Algorithms
- Computer Networks, Sensor Networks, Mobile Computing
- Cryptology, Information and Coding Theory
- Data and Text Mining, Web Intelligence
- Digital Document Processing
- Image and Video Processing
- Information Retrieval
- Natural Language Processing
- Nanotechnology, Nano-biosystems, Bio-chips
- Parallel and Distributed Systems
- Pattern Recognition, Machine Learning and Soft Computing
- Simulation and Modeling in Neurosciences
- Speech and Signal Processing
- VLSI Design and Testing

## Economics:

- Development and Welfare Economics
- Environmental Economics
- Financial Econometrics
- Game Theory
- Growth Theory
- International Trade
- Macroeconomics
- Poverty and Inequality
- Public Economics
- Time Series Econometrics

## Scope

A student who successfully completes the programme with his/her exposure to state-of-the art in world-wide research in the concerned field, has an intellectual maturity and resourcefulness that should make him/her an asset in any profession that call for expertise in the relevant discipline.

Based on your requirements, get in touch with the Placement Convener who in turn will guide you to the concerned student and department.

# Placement Guidelines

Placement of ISI students is facilitated by the Placement Committee.

All correspondences in this regard should be made with the Convener, Placement Committee ([plconv@isical.ac.in](mailto:plconv@isical.ac.in))

Students of the M.Stat., M. Tech.(CS), M.S.(QE) and M. Tech.(QROR) courses, passing out in July/August 2013, are eligible for placement. Regarding placement of Ph. D. students, contact the Placement Convener separately.

The placement session for 2012-13 begins in the month of September, 2012.

ISI does not charge any Placement Fee.

## **Campus Recruitment Procedure:**

- Companies interested in conducting campus recruitment need to send the duly filled-in Campus Recruitment Form (ISI-CRF), preferably with relevant company literature, by email/fax/courier/post to the Convener, Placement Committee. This provides the primary basis of communicating the details of the positions offered to the students.
- Based on the feedback of the students and other institute activities, a mutually convenient date (*single day*) for the company visit is finalized by the Convener, Placement Committee. This booking is done on a *first-come first-serve* basis.
- Any specific requirement of the company (especially for briefing company profile to the students) has to be communicated to the Convener, Placement Committee at least one week in advance to avoid any inconvenience during their campus visit.
- At the end of the selection process, the *final list of selected students*, duly signed by the company official, is to be handed over to the Placement Committee on the same day. *No further interview/test should take place outside the campus.*
- Detailed offer letter may be sent to the Convener, Placement Committee for distribution among the selected students. The Convener will coordinate in sending back letters of acceptance to the employer from students.
- Students will join the companies only after the completion of their respective courses.
- The date of joining should preferably be within one month from the official date of completion of the respective course.

**Campus recruitment by placement consultants or third-party recruiters is not permitted.**

Company delegates requiring ISI Guest House accommodation need to send the duly filled-in ISI Guest House Accommodation Form to the Convener, Placement Committee, with a cc to [plcofficer@isical.ac.in](mailto:plcofficer@isical.ac.in).

To know more about the placements at ISI and to get various forms, visit our website <http://www.isical.ac.in/~placement>

# Summer Internship

First year students of different courses are available for internships during their summer break which generally starts (in mid May) after completion of their second semester examination and continues till their third semesters begins. The duration of the internship varies from course to course as follows.

|                |   |   |
|----------------|---|---|
| M. S. (QE)     | : | About 7 weeks   |
| M. Stat        | : | About 7-8 weeks   |
| M. Tech (CS)   | : | About 12 weeks  |
| M. Tech (QROR) | : | The duration is a bit more than 12 weeks but that is handled by their department independently. |

**Please note that we prefer telephonic interviews for summer training of ISI students.**

For all courses except M. Tech (QROR) interested companies are requested to send the duly filled in ISI-SIF (available in doc & pdf format in the download section) by email / fax / courier to:

*Pinak Pani Pal*  
*Convener, Placement Committee*  
*Indian Statistical Institute*  
*203, BT Road, Kolkata - 700108*

# How to Reach

The Kolkata campus of the Indian Statistical Institute is located in a sprawling 30-acre estate on the Bar-rackpore Trunk Road (BT Road) in the Baranagore suburb of Greater Kolkata. It consists of two ap-proximately equal parts - the office complex and the residential complex, separated by a public road. This road (Girish C. Ghosh Street) connects BT Road with Gopal Lal Tagore Road, a road that runs along the western boundary of the main campus. The office complex bears door numbers 202, 203 and 204, and the residential complex, 205 and 206. If you are coming from airport, take Belgharia Ex-pressway from Jessore Road (approaching North) and take exit at Dakshineswar (before the Express-way merges to Nivedita Bridge over Ganges). As you take exit from Belgharia Expressway, take PWD Road towards Dunlop Bridge (Dunlop Bridge is in the East from Dakshineswar). Take right turn at the Dunlop Bridge at PWD Road - BT Road crossing and after about 500 meters on the BT Road, you can see the institute campus on your right.
