- American homes should be well designed, constructed and located.
- American homes should be built under the free enterprise system.

To achieve these three goals, our members pledge to uphold the following Code of Ethics:

- Conduct our business in a manner that will reflect credit upon our association, our industry and ourselves.
- Avoid statements or implications that may be misleading or deceptive.

- Provide high standards of health and safety.
- Deal fairly with everyone involved in our projects including employees, subcontractors, suppliers and customers.
- Encourage research to develop new materials, building techniques, improved building practices and financing methods.
- Perform to the standards of the NAHB residential-construction performance guideline in effect at the time of construction.
- Offer a minimum one-year written warranty on new homes and remodels, and use the MBA's consumer dispute resource program to settle disagreements with builders and remodelers of single-family homes should the association receive a complaint.
- Support our local, state and national associations and all related industries concerned with providing affordable housing.
- Certify that, as a contractor member of the Master Builders Association, we are registered, bonded and insured with the state of Washington.
- Do business with association members whenever possible.
