Maharshi Dayanand University Rohtak

Ordinances, Syllabus and Courses of Reading for M.C.A Examination

Session - 2009-2010

Available from: Price:

Incharge (Publication) At the Counter : Rs. 50/-Maharshi Dayanand University By Regd. Parcel : Rs. 90/-Rohtak-124 001 (Haryana) By Ordinary Post : Rs. 70/-

(ii)

MASTER OF COMPUTER APPLICATIONS (MCA) COURSE TO THE REGULAR STUDENTS OF U.T.D/ AFFILIATED COLLEGES

(Semester System)

- During of the course leading to the conferment of the degree of Master of Computer Applications (MCA) shall be of three academic years. Each year shall be divided into two semesters.
- 2. The minimum eligibility condition for admission to first semester of the course shall be as follows:-

Recognised Bachelor's Degree of minimum three years duration in any discipline with Mathematics at 10+2 school level or Mathematics as one of the subjects at graduation level.

OR

B.C.A. (Bachelor of Computer Applications) Degree of three years duration from a recognised University.

OR

Bachelor Degree of minimum three years duration in any discipline with Mathematics/Statistics as one of the subjects.

- 3. The examination for the 1st, 3rd and 5th semesters shall ordinarily be held in the month of December/January and for 2nd, 4th and 6th semesters in the month of May/ June or on such dates as may be fixed by the Vice-Chancellor. The dates of examinations under this clause shall be notified by the Controller of Examinations to the Head of the Department/Principal of the College concerned.
- 4. The Head of the Department/Principal of the College concerned shall forward to the Controller of Examinations, at least five weeks before the commencement of the examination in each semester, a list of students who have satisfied the requirement of rules and are qualified to appear in the examination.
- 5. The last date for the receipt of admission forms and fee with or

- without late fee, as prescribed by the University shall be notified by the Controller of Examinations.
- 6. Every candidate shall be examined in the subjects as laid down in the scheme of examination and syllabus prescribed by the Academic Council from time to time. There shall be 25% marks (10% for test, 10% for assignment and 5% for attendance) for internal Assessment in each paper (Theory/Practical/Project Report). The Head of the Department/ Principal of the College concerned shall forward the internal assessment marks to the Controller of Examinations at least two weeks before the commencement of semester examination. The Department/College shall preserve the record of Internal Assessment of the candidates, upto six months from the date of declaration of result of semester examination.
- 7. The medium of instruction and medium of examination shall be English.
- 8. Every student admitted to the M.C.A. course shall be on the rolls of the College/Department of Computer Science and Applications of the University and shall pay such fees to the University as is prescribed from time to time.
- 9. The First/Second/Third/Fourth/Fifth/Sixth semesters examination shall be open to a regular student who:-
 - (a) has passed requisite qualifying examination as laid down in clause-2, if he is a candidate for the first semester examination, or has passed the preceding semester examination if he is a candidate for the second/Third/Fourth Semester, Vth/VIth semesters examination. This is however, subject to clause-10 below:
 - (b) has been on the rolls of the Department/College during one semester in preceding examination:
 - (c) has attended not less than 80% of the total theory lectures delivered and practical conducted in each paper pre-

(iii)

- scribed for the Semester. Provided that the deficiency not more than 20% may be condoned by the Head of the Department/Principal of the College concerned.
- (d) has obtained atleasts 40% marks in the internal assessment of each paper separately in theory/practical/project report and 50% marks in the overall internal assessment of all theory/practicals and project report put together.
- (e) has not been debarred by the University from appearing in the examination on any ground; and
- (f) has been certified to be a good character by the Head of the Department/Principal of College concerned.
- A candidate who has completed the prescribed course of instruction in the Department/College for any semester examination but does not appear in it or having appeared but failed, may be allowed on the recommendations of the Head of the Department/Principal of the College concerned to appear/reappear in the semester examination/paper(s) as the case may be, as an ex-student without attending a fresh course of insatructions, While re-appearing in the examination, the candidate shall be exempted from reappearing in the paper(s). Project Report, Practicals, Viva-voce in which he had obtained 50% marks including the marks for internal assessment, where prescribed. The internal Assessment award of a candidate who fails in any semester examination shall be carried forward to the next examination. The failed/reappearing candidates shall have to submit the examination from along with the requisite fee to the University on such dares as may be notified by the University.

A candidate will be allowed to join the M.C.A 3rd Semester class only if he clears the minimum of 50% theory and practical papers (fractional part of 50% calculation of number of paper will be discarded i.e. 50% of 7 papers is equal to 3.5 should be taken as 3) of First and Second Semester examination taken together. A candidate will be allowed to join MCA Vth Semes-

ter class if he has passed all papers of first semester examinations. OR

Passed 50% papers of each semester 1st, 2nd, 3rd and 4th examinations. OR

2/3 papers of semester 1st, 2nd, 3rd & 4th examinations taken together.

Provided that a candidate shall not be allowed to attend classes in any semester unless he has fulfilled the above requirements of the previous semester(s).

Provided further that a candidate who has paid dues for the higher class and is dropped for want of fulfilment of any of the above conditions shall not be required to pay the dues again on re-admission after fulfimlment of above conditions.

- 11. Each theory paper for the University examination will be set by an external examiner. However, in question paper(s), any special instructions, if required will be issued by the Chairman, Board of Post-Graduate Studies in Computer Science & Applications.
- 12. The final result of a student shall be based on the internal assessment, University examinations and assessment of the project work. For theory papers, the internal assessment shall include assessment of attendance, home assignments and class tests. For practical papers the internal assessment shall be based on attendance, practical assignment and class tests. The scheme of the internal assessment has been described in clause-6.
- 13. Every student shall work full time on a project during the sixth semester of the course, after appearing in the University examination and shall submit three copies of his/her report on the project work done by him/her in two parts, interim and final by the dates, which shall be notified and displayed on the notice board of the department. Extension, upto one month, may be allowed by the Departmental Committee of the Department of Computer Science & Applications, in special circumstances to

(v)

the student who makes a written request for extension justifying the special circumstances under which the project work could not be completed by him/her.

The subject/topic of project work of each student shall be approved by the Departmental Committee of the Department of Computer Science & Applications. Applications from the student indicating the subject of their project work alongwith synopsis of about 500 words shall be required to be submitted to the Head of the Deptt. by the date notified by him and displayed on the notice board of the Department. The department Committee may approve the subject of project work with such modifications as it deams fit. The Head of the Department shall appoint a supervisor for the project work for each student.

The project work and viva-voce shall be evaluated jointly by an internal and an external examiner. If the two examiners are unable to agree in respect of a student, the average of the two awards shall be taken as his final award.

- 14. The student shall have to complete all the requirements of the course and pass its all prescribed examination within a maximum of five annual academic sessions from the original date of joining the course in order to be eligible for the award of MCA degree.
- 15. The minimum number of marks required to pass the examination in each semester shall be as under:-
 - (i) 40% in the internal assessment of each theory and practical paper of the examination separately and 50% in the overall internal assessment of all theory and practical papers put together as a pre-requisite to appear in the semester examination;
 - (ii) 40% in the University examination in each theory and practical paper of the examination and in the project work and viva-voce, if applicable, separately and 50% marks in the aggregate, for passing the semester examination.

- 16. The successful candidates shall be classified as under:-
 - a) Those who obtain 75% or more marks
 of the total aggregate marks of the first,
 second, third, fourth and fifth semester
 examinatoins, internal assessments, and
 assessment of the project report taken
 together in first attempt.
 - b) Those who obtain 60% or more marks but less than 75% marks; and 1st Division
 - c) Those who obtain 50% or more marks but less than 60% marks

 IInd Division
- 17. Every successful candidate shall be awarded the degree of Master in Computer Applications showing the division in which he/she has passed the examination.
- 18. The student who tops the list of successful candidates shall be given a gold medal, provided he/she has completed all requirements and has also passed University examination in the first attempt. A separate merit list of first top 20 students shall be prepared and communicated to Head of the Department/ Principal at the time of declaration of result.
- 19. The amount of admission/examination fee to be paid by a student shall be as prescribed by the University from time to time.
- 20. A candidate who joins MCA course shall not be allowed to pursue another course of study simultaneously in any institution of this or any other University.
- 21. Notwithstanding the integrated nature of this course which is spread over more than one academic year, the Ordinace in force at the time a student joins the course shall hold good only for the examinations held during or at the end of the academic year concerned and nothing in this Ordinance shall be deemed to debar the University from amending it the ordinance and the amended Ordinance, if any shall apply to all students, whether

old or new.

Master of Computer Applications (MCA) Regular Programme Syllabus and Scheme of Examination w.e.f. 2009-10

MCA First Year

Semester-I

Paper Code		Course Requirement (Hrs)	University Exams	Internal Assessment	Total
MCA-101	Mathematical Foundation of Computer Science	5	75	25	100
MCA-102	Computer Fundamentals Programming in C	5	75	25	100
MCA-103	Digital Design	5	75	25	100
MCA-104	Internet and Web Designi	ing 4	75	25	100
MCA-105	Object Oriented Programming Using C++	5	75	25	100
MCA-106	Software Lab-1 i) Programming in C ii) Web Programming Using HTML	8	75	25	100
MCA-107	Software Lab-2 i) Programming in C++ ii) Use of MS-Office	8	75	25	100
MCA-108	Soft Skills-I	2	-	25	25
	Total	42	525	200	725

^{*}Practical Examination of MCA-106 & 107 may be conducted on the same day in 2 sittings each maximum of 4 hours.

Semester-II

Elective-I*

At present only 'Soft Computing' course (MCA-504) is being offered under Elective-I but depending upon the availability of expertise and the required infrastructure determined by the University, any one of the following subjects could be offered in place of 'Soft Computing'.

- i) Simulation and Modeling
- ii) Theory of Computing
- iii) Unix and Network Programming
- iv) Enterprise Resource Planning
- v) Onject Oriented Analysis and Design
- vi) Analysis & Design of Algorithms
- vii) Multimedia and its Applications
- viii) Distributed Computing

Elective-II*

At present only 'Soft Computing' course (MCA-505) is being offered under Elective-II but depending upon the availability of expertise and the required infrastructure determined by the University, any one of the following subjects could be offered in place of 'Computer Security'.

- i) Digital Image processing
- ii) Software Project Management
- iii) Embedded Systems
- iv) Bio-Informatics

SYLLABUS - MCA

- v) Mobile Computing
- vi) Neural Network
- vii) Perl Programming

MCA FIRST SEMESTER- 2009-10

MCA - 101 Mathematical Foundation of Computer Science

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Relation: Relations, Properties of Binary relation, Matrix representation of relations, Closures of relations, Equivalence relations, Partial order relation. **Function:** Types, Composition of function, Recursively defined function.

Algebraic Structres: Properties, Semi group, Monoid, Group, Abelian group, Subgroup, Cyclic group, Cosets, Normal Subgroups, Lagrange's Theorem, Permutation groups.

Unit-II

Propositional Logic: Prepositions, logical operations, Tautologies, Contradictions, Logical implication, Logical equivalence, Normal forms, Theory of Inference and decuction. Predicate Calculus: Predicates and quantifiers, Mathematical Induction.

Unit-III

Lattices and Boolean Algebra : Introduction, Partially Ordered Set, Hasse diagram, Well ordered set, Lattices, Proerties of lattices, Bounded lattices, Complemented and Distributive lattices, Boolean Algebra.

Unit-V

Introduction to defining language, Kleene Closure, Arithmetic expressions, Chomsky Hierarchy, Regular expressions, Generalized Transition graph.

Conversion of regular expression to Finite Automata, NFA, DFA, Conversion of NFA to DFA. Optimizing DFA, FA with output: Moore machine, Mealy machine, Conversions.

Suggested Readings:

- 1. C.L.Liu: Elements of Discrete Mathematics McGraw Hill.
- 2. Lipschutz, Seymour: Discrete Mathematics, Schaum's Series.
- 3. Babu Ram: Discrete Mathematics, Vinayek Publishers, New Delhi.
- 4. Trembley, J.P. & R. Manohar: Discrete Mathematical Structure with Application to Computer Science, TMH.
- 5. Kenneth H. Rosen: Discrete Mathematics and its applications, TMH.
- 6. Doerr Alan & Levasseur Kenneth; Applied Discrete Structures for Computer Science, Galgotia Pub. Pvt. Ltd.
- 7. Gersting: Mathematical Structure for Computer Science, WH Freeman & Macmillan.
- 8. Hopcroft J.E., Ullman J.D.: Introduction to Automata theory, Languages and Computation, Narosa Publishing House, New Delhi.
- 9. Any other book(s) covering the contents of the paper in more depth.

Note: Lastest and additional good books may be suggested and added from time to time.

MCA-102 Computer Fundamentals & Programming in C

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Evolution of information processing: Concept of data and information, data processing. Hardware—CPU, Storage Devices & Media, VDU, Input — Output, Devices, Type of Software — Sysem Software, Application Software, Overview of OS. Programming Languages and its Classification, Compiler, Interpreter, Linker, Loader.

Range of Applications: Scientific, business, educational, industrial, weather forecasting, remote sensing, planning, multilingual applications. Social concerns of Computer Technology: Positive and Negative Impacts, Computer Crimes, Viruses and their remedial solutions.

Unit-II

Problem Solving: Problem Identification, Analysis, Flowcharts, Decision Tables, Pseudo codes and algorithms, Program Coding, Program Testing and Execution.

C Programming:

Concept of Variables and constants, Structure of a C program, Operators & Expressions: Arithmetic, Unary, Logical, Bit-wise, Assignment & Conditional Operators, Library Functions, Control Statements: while, do., while, for statements, Nested loops, if..else, switch, break continue and goto statements, Comma operator.

Unit-III

Functions: Defining & Accessing: Passing arguments, Function Prototype, Recursion, Use of Library Functions, Storage Classes: Automatic, External and static Variables (Register), Arrays: Defining & Processing, Passing to a function, Multidimensional Arrays.

String : Operations of String (String handling through built-in & UDF : Length, Compare Concatenate, Reverse, Copy, Character Serach using array)

Pointers: Declarations, Passing to a function, Operations on Pointers, Pointers & Arrays, Array of Pointer, Pointer Arithmetic, Array accessing through pointers, Pointer to structure, Pointer to functions, Function returning pointers, Dynamic Memory Alloctions.

Unit-IV

Structures: Defining & Processing, Passing to a function, Union (Array within structure, Array of structure, Nesting of structure, Passing structure and its pointer to UDF, Introduction to Unions and its Utilities).

Data Files : Open, Close, Create, Process Unformatted Data Files. (Formatted Console I/O functions Unformatted console I/O functions, Modes of Files, Use of fopen(), fclose(), fgetc(), fputc(), fgets(), fprintf(), fscanf(), fread(), fwrite(), Command Line Arguments).

Departmentation, deburring, C Processors, Macros Examples illustrating structured program development methodology and use of a block structured algorithmic language to solve specific problems.

Suggested Readings

- 1. Kenneth, A.: C problem solving and programming, Prentice Hall.
- Gottfried, B.: Theory and problems of Programming in C, Schaum Series.
- 3. Gill, Nasib Singh: Essentials of Computer and Network Technology, Khanna Books Publishing Co., New Delhi.
- 4. Sanders, D.: Computers Today, Tata McGraw-Hill.
- 5. Rajender Singh: Application of IT to Business, Ramesh Publishers.
- 6. Cooper, Mullish: The spirit of C, An Introduction to Modern Programming, Jaico Publ. House, New Delhi.
- 7. Kerninghan & Ritchie: The Programming Language, PHI.

- 8. Gottfried, B.: Theory and problems of Programming in C, Schaum Series.
- 9. E. Balaguruswamy: Programming in C, Tata McGraw Hill.
- 10. H. Schildt: C-The Complete Reference, Tata McGraw Hill.
- 11. Y.Kanetkar: Let us C, BPB Publication.
- 12. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-103: Digital Design

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Number System: Binary, Octal, Hexadecimal and Decimal. 1's and 2's Complements, Inter-conversion of numbers. Codes: BCD Code, Excess-3 Code, Gray code, Alphanumeric Codes, Parity Bits, Hamming Code, Floating Point Numbers.

Binary Arithmatic: Basic Rules of Binary Addition and Subraction, Addition and Subtraction Using 2's Complement Method, Binary Multiplicity - repeated Left shift and Add Algorithm, Binary Division - Repeated Right Shift and Subtract Algorithm.

Unit-II

Positive and Negative Logic, Truth Tables, Logic Gates, Fan out of Logic Gates, Logic Families, TTLLogc Family, CMOS Logic Family, ECL Logic Family, NMOS and PMOS Logic Family.

Boolean Algebra vs. Ordinary Algebra, Boolean Expressions-Variables and Literals, Boolean Expressions-Equivalent and Complement,

Theorem of Boolean Algebra, Minimisation Techniques, SOPs & POSs Boolean Expressions, Quine-McCluskey Tabular Method, Karnaugh Map Method.

Unit-III

Combinational Circuits, Implementing Combinational Logic, Arithmetic Circuits- Basic Building Blocks, Adder- Subtractor, BCD Adder, Magnitude Comparator, Parity Generator and Checker, Demultiplexers and Decoders, Encoders, Read Only Memory (ROM), Programmable Logic Array (PLA).

R-S Flip Flop, Level Triggered and Edge Triggered Flip Flops, J.K. Flip Flop, Synchronous and Ascychronous Inputs.

Unit-IV

Ripple Counter vs. Synchronous Counter, Mudulus of a Counter, Propagation Delay in Ripple Counters, Binary Ripple Counters, Up/Down Counters, Decade and BCD Counters, Pre-settable Counters, Shift Register, Controlled shift Registers.

RAM Architecture, Static RAM (SRAM), Dynamic RAM (DRAM)

Suggusted Readings

- 1. Mano, M.M.: Digital Logic and Computer Design, Prentice-Hall of India.
- 2. Gill, Nasib Singh and Dixit J.B.: Digital Design and Computer Organisation, University Science Press (Laxmi Publications), New Delhi.
- 3. Stallings, William: Computer Organisation & Architecture.
- 4. Mano, M.M.: Digital Design, Prentice-Hall of India.
- 5. Anand Kumar: Fundamentals of Digital Circuits, PHI.
- 6. Tokheim: Digital Electronics, TMH.
- 7. S. Rangnekar; Digital Electronics, ISTE/EXCE.L
- 8. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-104: Internet and Web Designing

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Introduction to Internet, Internet Services, WWW, Working of Internet, Internet Connection Concepts, Introduction to internet, DNS working, Configuring Internet Connection, Connecting LAN to Internet.

Single User, Multi User, Server, Workstation, Client-Server evironment, Computer Network, Types of Computer Network: LAN, WAN, MAN: Network Topologies. Network Protocols, Windows and GUI.

E-Mail Concepts - configuring E-Mail Program, Sending and Receiving Files through E-Mail, Fighting Spam, Sorting Mail, and Avoiding E-Mail Viruses.

Unit-II

Web Browsers, Search Engines, Categories of search Engines, Searching Criterion, Surfing the Net, Hypertext Transfer Protocol (HTTP), URL. Other Internet Tools.

Online Chatting, Messaging, and Conferencing Concepts, E-Mail mailing lists, Usenet newsgroup concepts-Reading usenet newsgroups, internet Relay Chat, Instant messaging, Web-Based chat rooms and discussion boards, Voice adn Video conferencing.

Streamlining Browsing, Keeping track of Favorite Web Sites, Web Security, Privacy, and Site-Blocking. Searching the Web – Audio and Video on the Web.

Unit-III

HTML: Internet Language, Understanding HTML, Create a Web Page, Linking to other Web Pages, Publishing HTML Pages, Text Alignment and Lists, Text Formating Fonts Control, E-mail Links and link within a page, Creating HTML Forms.

Unit-IV

Creating Web Page Graphics, Putting Graphics on a Web Page, Custom Backgrounds and Colours, Creating Animated Graphics.

Web Page Design and layout, Advanced Layout with Tables, Using Style Sheets.

Suggested Readings:

- 1. Dick Oliver: Tech Yourself HTML 4 in 24 Hours, Techmedia.
- 2. Satish Jain: "O" Level Information Technology.
- 3. Craig Zacker: 10 minutes Guide to HTML Style Sheets, PHI.
- 4. V.K. Jain: "O" Level Information Technology, BPB Publications.
- 5. Gill, Nasib Singh: Essentials of Computer and Network Technology, Khanna Books Publishing Co., New Delhi.
- 6. Margaret Levine Young: Internet The Complete Reference.
- 7. Harley Hahn: The Internet Complete Reference, TMH.
- 8. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-105 Object Oriented Programming Using C++

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Introduction to object oriented programming, user defined types, polymorphism, and encapsulation. Getting started with C++-syntax, data-type, variables, strings, functions, exceptions and statements, namespaces and exceptions, operators, Flow control, functions, recursion. Arrays and pointers, structures.

Unit-II

Abstracting Mechanisms: Classes, private, public, constructors, destructors, member functions, static members, references etc. Class hierarchy derived classes.

Inheritance: simple inheritance, polymorphism, object slicing, base intialization, virtual functions.

Unit-III

Prototypes, linkages, operator overloading, ambiguity, friends, member operators, operator function, I/O

Operators etc. Memory management: new, delete, object copying, copy constructors, assignment operator, this input/output.

Exception handling: Exceptions and derived classes, function exception declarations, Unexpected exceptions, Exceptions when handling exceptions, resource capture and release etc.

Unit-IV

Templates and Standard Template library: template classes, declaration, template functions, namespaces, string, iterators, hashes, iostreams and other type.

Design using C++ design and development, design and programming. role of classes.

Suggested Books:

- 1. Herbert Schildts: C++ The Complete Reference, Tata McGraw Hill Publications.
- 2. Balaguru Swamy: C++, Tata McGraw Hill Publications.

- 3. Balaguruswamy: Object Oriented Programming and C++, TMH.
- 4. Shah & Thakker: Programming in C++, ISTE/EXCEL.
- 5. Johnston: C++ Programming Today, PHI.
- 6. Olshevsky: Revolutionary Guide to Object Oriented Programming Using C++, SPD/WROX.
- 7. Object Oriented Programming and C++, Rajaram, New Age International.
- 8. Samanta: Object Oriented Programming with C++ & JAVA, PHI.
- 9. Subburaj: Object-Oriented Programming with C++, VIKAS.
- 10. Any other book(s) covering the constents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA - 2nd Semester

MCA-201: Data Structures

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Introduction to Algorithm Design and Data Structures: Design and analysis of algorithm: Algorithm definition, comparison of algorithms. Top down and bottom up approaches to Algorithm design. Analysis of Algorithm; Frequency count, Complexity measures in terms of time and space. Structured approach to programming.

Unit-II

Arrays: single and multidimensional arrays. Address calculation using column and row major ording. Various operations on Arrays. Vectors. Appliation of arrays: Matrix multiplication, Sparse polynomial representation and addition.

Stacks and Queues: Representation of stacks and queues using arrays and linked -list. Circular queues, Priority Queue and D-Queue. Applications of stacks: Conversion from infix to postfix and prefix expressions, Evaluation of postfix expression using stacks.

Unit-III

Linked list: Singly linked list; operations on list, Linked stacks and queues. Polynomial representation and manipulation using linked lists. Circular linked lists, Doubly linked lists.

Binary tree traversal methods: Preorder, In-order, Post-ordered traversal. Recursive Algorithms. Traversal methods. Representation of trees and its applications: Binary tree representation of a general tree. Conversion of forest into tree. Threaded binary trees. Binary search tree: Height balanced (AVL) tree, B-trees.

Unit-IV

Sorting: Selection sort, Insertion sort, Bubble sort, Quick sort, merge sort, Heap sort, Radix sort and their complexity, Searching: Sequential search, Binary Search Tree, ASVL trees, B trees, Seaching, sorting and complexity, Searching: Sequential and binary searches, indexed search, Hashing Schemes. Comparison of time complexity.

Graph representation: Adjacency matrix, Adjacency lists, Traversal schemes: Depth first search, Breadth first search, Spanning tree: Definition, Minimal spanning tree algorithms. Shortest Path algorithms (Prim's and Kruskal's)

Suggested Readings:

- 1. Hubbard JR: Schaum's outline of Data Structures with C++, TMH.
- 2. R. Sedgewick: Algorithms in C++, Pearson, Education Asia.
- 3. Y. Langsam, M.J. Augenstein and A.M. Tanenbaum: Data Structures Using C and C++, Prentice Hall of India.
- 4. R. Kruse, C.L. Tonodo and B. Leung: Data Structures and Program Design in C, Pearson Education.
- 5. S.Chottopadhyay, D. Ghoshdastidar & M. Chottopadhyay: Data Structures Through 'C' Language, BPB Publication.
- 6. G.L. Heileman: Data Structures, Algorithms and object Oriented Programming, Tata McGraw Hill.
- 7. E. Horowitz, Sahni and D. Mehta: Fundamentals of Data Structures in C++, Galgotia, Publication.
- 8. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-202: Computer Organization & Architecture

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Basic organization of the computer and block level description of the functional units as related to the execution of a program. Operational concepts, Bus structures, Von Neumann Concept, Fetch, decode and execute cycle. Role of operating systems and compilers.

Basic Processing: Instruction code, Instruction set, Instruction sequencing, Instruction cycle, Instruction format, Addressing modes, Micro instruction, Data Path, Hardwired controlled unit, Micro programmed controlled unit.

Unit-II

Timing and Control Unit, Micro-operations, Instruction cycle, Design of ALU: Binary arithmetic Addition and Subtraction of signed number, Multiplication of +ve number, Signed operand multiplication, Division, Floating point number representation and arithmetic.

General Register Organization, Stack, Organization, Instruction Formats, Addressing Models, Data Transfer and Manipulation, Program Control, RJSC Vs. CISC architectures. Programming in Assembly Language for 8086/8088/80X6 Micro-processor.

Unit-III

Input/output Organization: Peripheral Devices, Input-output Interface, Asynchronous Data Transfer, Mode of Transfer, Priority Intterupt, Direct Memory Access, Input-output Processor, Serial Communication, Memory Hierarchy, Main Memory, Auxillary Memory, Associative Memory, Cache Memory, Virtual Memory, Memory Management Hardware.

Unit-IV

Introduction to parallel processing - Pipelining, Parallelism in unipolar systems, Parallel Computer structures, Architectural classification schemes. Principles of pipelining & Vector processing – Principles of Linear pipelining, Classification of pipeline processors, General pipelines and reservation tables, interleaved memory Organizations, Instruction and Arithmetic pipelines, Principles of designing pipelined processors, Vector processing Requirements. Structure for array processors: SIMD Array processor, SIMD Interconnection networks. Parallel Processing Applications.

Suggested Readings

- 1. Mano, M.M.: Digital Logic and Computer Design, Prentice-Hall of India.
- 2. Stallings, William: Computer Organisation & Architecture.
- 3. Gill, Nasib Singh and Dixit J.B.: Digital Design and Computer Organisation, University Science Press (Laxmi Publications), New Delhi.
- 4. Mano, M.M.: Digital Logic and Computer Design, Prentice-Hall of India.
- 5. Kai Hwang: Advanced Computer Architecture, McGraw Hill International.
- 6. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA- 203 : Computer Based Management System & E-Commerce

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Introduction to Management: The Managment Processes:

Planning, Organizing, Leading and Controlling, Management Levels: Top, Middle and Bottom. The Management School: Scientific Management, Classical Management, Behavioral Management, Management Science, Systems Approach, Contingency Approach.

Unit-II

Management in 21st **Century:** Seven-S Model, Organization Structure, Communication Process, Strategy: Institutional, Operational, Total Quality Control (TQC). Total Quality Management (TQM), Electronic Data Interchange (EDI), Just-in-Time (JIT) Approach.

Unit-III

Applications of Management Information System: Types of Information System in Organizations: Transaction Processing System (TPS), Office System, Knowledge Work System (KWS), Decision Support System (DSS), Management Information System (MIS), Executive Support System (ESS).

Unit-IV

E-Commerce : Overiew of E-Commerce, Benefits of E-Commerce, Impact of E-Commerce, Applications of E-Commerce, Business Models of E-Commerce, Electronic Payment System : Introduction to Payment System : Online Payment System, Pre-paid and post-paid Payment System. Security in E-Commerce : Transaction Security, Cryptology, Authentication Protocol, Digital Signature.

Suggested Readings:

- 1. Stoner, Freeman, Gilbert : Management, Latest, PHI Publication.
- 2. Kenneth, C. Laudon, Jane P. Laudon: Management Information System, Latest Edition, Pearson Education Publication.
- 4. P.T. Joseph: E-Commerce A Managerial Perspective, PHI Publication.
- 5. Any other book(s) covering the contents of the paper in more Publication.

Note: Latest and additional good books may be suggested and added from time to time.

MCA- 204 : Data Base Management Systems

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Data base System Applications, data base System Vs. File Processing System, View of Data, Data Abstraction, Instances and Schemes, Data Models – ER Model, Relational Model, Other Models. Database Languages - DDL, DML, Database Access for applications Programsdata base Users and Administrator, Transaction Management, Data base system Structure, Storage Manager, Query Processor, History of Databae Systems. Data base design and ER diagrams- Beyond ER Design Entities, Attributes and Entity sets, Relationship and Relationship sets, Additional features of ER Model, Concept Design with the ER Model, Conceptual Design for Large enterprises.

Unit-II

Relational Model: Introduction to the Relational Model, Integrity Constraint Over relations, Enforcing Integrity constraints, Querying relational data, Logical data base Design, Introduction to views, Destroying/altering Tables and Views.

Relational Algebra and Calculus: Relational Algebra, Selection and projection set operations, renaming, Joins, Division, Examples of Algebra overviews, Relational calculus- Tuple relational Calculus, Domain relational calculus, Expressive Power of Algebra and Calculus.

Unit-III

Form of Basic SQL Query- Example of Basic SQL Queries, Introduction to Nested Queries, Correlated Nested Queries Set, Comparison Operators, Aggregative Operators, NULL values, Comparison using Null values, Logical connectivity's – AND, OR

and NOT. Impact on SQL Constructs, Outer Joins, Disallowing NULL values, Complex Integrity Constraints in SQL Triggers and Active Data bases.

Schema refinement, Problems Caused by redundancy, Decompositions, Problem related to decomposition, Normalization: FIRST, SECOND, THIRD Normal forms, BCNF, Lossless join Decomposition, Dependency preserving Decomposition, Schema refinement in Data base Design, Multi valued Dependencies, forth Normal Form.

Unit-IV

Overview of Transaction Management : ACID Properties, Transactions and Schedules, Concurrent Execution of transaction, Lock Based Concurrency Control, Performance Locking, Transaction Support in SQL, Introduction to Crash recovery.

Concurrency Control: Serializability, and recoverability, Introduction to Lock Management, Lock Conversions, Dealing with Dead Locks, Specialized Locking Techniques, Concurrency without Locking.

Suggested Readings:

- 1. Raghurama Krishnan : Data base Management Systems, Johannes Gehrke, Tata McGraw Hill Latest Edition.
- 2. Siberschatz, Korth: Data base System Concepts, McGraw Hill, latest edition.
- 3. P. Radha Krishna: Database Management Systems, HI-TECH Publications.
- 4. C.J. Date: Introduction to Database Systems, Pearson, Education.
- 5. Rob & Coronel: Data base Systems design, Implementation, and Management, latest Edition, Thomson.
- 6. Elmasri Navrate : Data base Management System, Pearson Education.
- 7. Mathew Leon: Data base Management System, Leon Vikas.
- 8. Connoley: Data base Systems, Pearson Education.

9. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA- 205: Principles of Systems Programming & Compiler Design

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Evolution of the Components of Systems Programming: Assemblers, Loaders, Linkers, Macros, Compilers.

Software Tools: Variety of Software tools, Text editors, Interpreters and program generators, Debug Monitor, Programming environment. Loader Schemes, compile and go loader, general loader schemes, absolute loader, Subroutine linkage, Reallocating loader, Direct Linkage Loader, Binders, Linkage loader, overlays.

Unit-II

Compiler: Phases of Compiler, Compiler writing tools, Lexical Analysis, Finite Automata, Regular Expression, From a Regular expression to an NFA, NFA to DFA, Design of Lexical Analyzer.

Syntax Analyzer, CFG, Role of the Parser, CFG, Top Down Parsing, Recursive descent parsing, predictive parsers, Bottom up Parsing, Shift reduce, operator precedence parsers, LR Parsers.

Unit-III

Syntax directed definition: Construction of Syntax trees, Intermediate code generation, Intermediate Languages, Syntax trees, post fix form. Symbol table: contents of Symbol table, Data Structures for Symbol table; Runtime storage Administration.

Unit-IV

Code optimization and code generation: Principles sources of optimization, loop optimization, Dag Representation of Basic blocks, Code generation – problems in code generation, a simple code generator, Register allocation and Assignment, Peephone optimization.

Suggested Readings:

- 1. Donovan: Systems Programming, Tata McGraw Hill.
- 2. Dhamdhere: System Software, Tata McGraw Hill.
- 3. Alfred V. Aho, Ravi Sethi, Jeffrey D. Ullman: Compilers Principles, Techniques and Tools, Addison Wesley.
- 4. Alfred V. Aho and Jeffrey D. Ullman: Principles of Compiler Design, Addison Wesley.
- 5. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA - 3rd Semester

MCA-301: Computer Graphics & Multimedia

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

An Introduction Graphics System : Computer Graphics and Its Types, Application of computer graphics, Graphics Systems : Video Display Devices, Raster Scan Systems, Random Scan Systems, Graphics Monitors and Work Stations, Input Devices, Hard Copy Devices, Graphics Software.

Unit-II

Output Primitives and Attributes of Output Primitives: Output Primitive Points and Lines, Line Drawing Algorithms, Circle Generating Algorithms, Scan-Line Polygon Fill Algorithm, Inside-Outside tests, Boundary-Fill Algorithm, Flood Fill Algorithm, Cell Array, Character Generation, Attributes of Output Primitives: Line Attributes, Color and Grayscale Levels, Area fill Attributes, Character Attributes, Bundled Attributes, Anti-aliasing.

Unit-II

Two-dimensional Geometric Transformations: Basic Transformations, Matrix Representation and Homogeneous Coordinates, Composite Transformations, Reflection and Shearing.

Two-Dimension Viewing: The viewing Pipeline, Window to view port coordinate transformation, Clipping Operations, Point Clipping, Line Clipping, Polygon Clipping, Text Clipping, Exterior Clipping Three-Dimensional Concepts: Three Dimensional Display Methods, 3D Transformations, Parallel Proection and Perspective Projection.

Unit-IV

Multimedia: Introduction to Multimedia: Classification of Multimedia, Multimedia Software, Components of Multimedia – Audio: Analog to Digital conversion, sound card fundamentals, Audio play backing and recording Video, Text: Hyper text, Hyper media and Hyper Graphics, Graphics and Animation: Classification of Animation. Authoring Process and Tools.

Case Study: A graphics software MatLab, Use of MatLab in graphics application, Features of MatLab, Generalize application by using MatLab.

Suggested Readings:

- 1. Donald Hearn and M. Pauline Baker: Computer Graphics, PHI Publications.
- 2. Plastock: Theory & Problem of Computer Gaphics, Schaum Series.

SYLLABUS - MCA

- 3. Foley & Van Dam: Fundamentals of Interactive Computer Graphics, Addison-Wesley.
- 4. Newman: Principles of Interactive Computer Graphics, McGraw Hill.
- 5. Tosijasu, L.K.: Computer Graphics, Springer-Verleg.
- 6. S. Gokul: Multimedia Magic, BPB Publication.
- 7. Bufford: Multimedia Systems, Addison Wesley.
- 8. Jeffcoate: Multimedia in Practice, Prectice-Hall.
- 9. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-302: Operating Systems

Max. Marks : **75**

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Operating System Introduction : Functions, Characteristics, Structures - Simple Batch, Multi programmed, timeshared, Personal Computer, Parallel, Distributed Systems, Real-Time Systems, System components, Operating-System services, System Calls, Virtual Machines.

Process and CPU Scheduling: Process concepts and scheduling, Operation on processes, Cooperating Processes, Threads, and Interposes Communication Scheduling Criteria, Scheduling Algorithm, Multiple-Processor Scheduling, Real-Time Scheduling.

Unit-II

Memory Management and Virtual Memory: Logical versus Pysical Address Space, Swapping, Contiguous Allocation, Paging, Segmentation with Paging, Demand Paging, Performance of Demanding Paging, Page Replacement, Page Replacement Algorithm, Allocation of Frames, Thrashing.

Unit-III

File System Interface and Implementation - Access methods, Directory Structure, Protection, File System Structure, Allocation methods, Free-space Management, Directory Management, Directory Implementation, Efficiency and Performance.

Process Management and Synchronization : The Critical Section Problem, Synchronization Hardware, Semaphores, and Classical Problem of Synchronizatoin, Critical Regions, Monitors.

Unit-IV

Deadlocks: System Model, Deadlocks Characterization, Methods for Handling Deadlocks, Deadlock Prevention, Deadlock Avoidance, Deadlock Detection and Recovery from Deadlock.

I/O Management - I/O software and its types, Disk Scheduling.

Shell Programming: Concept of shell, Types of shell, Editors for shell programming (e.g. vi), basics of Shell programming.

Case Study - UNIX, LINUX, and Windows NT.

Suggested Readings:

- 1. Silberschatz & Galvin: Operating System Concept, Wiley, Latest Edition.
- 2. Milan Milenkovic: Operating Systems, Tata McGraw Hill Latest, Edition.
- 3. William Stallings: Operating Systems, PHI, Latest Edition.
- 4. Yashawant Kanetkar: Unix Shell Programming BPB.
- 5. A.S. Tanenbaum: Modern Operating Systems, Latest edition Pearson/PHI.

SYLLABUS - MCA

- 6. Dhamdhere: Operating Systems, Tata McGraw Hill.
- 7. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-303: Artificial Intelligence & Expert Systems

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Introduction and applications of artificial intelligence, Problem solving: Defining the problem as state space search, Production system, Problem characteristics, Problem system characteristics, Search techniques: Generate and test, Hill climbing, Best first Search, A* algorithm, Problem reduction, Expert system: Definition, Role of knowledge in expert system, Architecture of expert system.

Unit-II

Expert system development life cycle: Problem selection, Prototype construction, Formalization, Implementation, Evaluation, Knowledge acquisition: Knowledge engineer, Congnitive, behavior, Acquisition techniques, Knowledge representation: Level of representation, Knowledge representation schemes, Formal logic, Inference Engine, Semantic net, Frame, Scripts.

Unit-III

Perception: Sensing, Speech recognition, Vision, Action, Neutral Networks: Introduction, Comparison of artificial neural networks with biological neural networks, Learning in neural networks, Perceptrons,

Back propagation networks, application of neural networks, Fuzzy logic: Definition, Difference between process for fuzzy expert system, fuzzy controller.

Unit-IV

Programming in Logic (PROLOG): Introduction, Prolog variables, Using rules, Input and Output predicates, Fail and cut predicates, Recursion, Arithmetic operation, Compound object, Dynamic database, Lists, String, File operations.

Suggested Readings:

- 1. David W. Rolston: Principles of Artificial Intelligence and Expert System Development, McGraw Hill Book Company.
- 2. Elaine Rich, Kevin Knight: Artificial Intelligence, Tata McGraw Hill.
- 3. Carl Townsend: Introduction to Turbo Prolog, BPB.
- 4. Stamations V. Kartalopous : Understanding Neural Networks and Fuzzy Logic, PHI.
- 5. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-304: Data Communication & Computer Networks

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Data Communication: Theoritical basis of data communication; analog and digital signals; asynchronous and synchronous transmission; data encoding and modulation, techniques, broadband and base band

transmission; pulse code modulation, bandwidth, channel, baud rate of transmission; multiplexing; transmission medium; transmission errors-error detection and correction.

Unit-II

Network Classification and Data Communication Services: Local area networks, metropolitan area network, wide area network, wireless network, internetworking; switched multi-megabit data services, X.25, frame relay, narrow band and board ISDN asynchronous transfer modes.

Network Reference Models: Layered architectures, protocol hierarchies, interface and services: ISO-OSI reference model, TCP/IP reference model; internet protocol stacks.

Unit-III

Datalink layer Functions and Protocols: Framing, error-control, flow-control; sliding window protocol; HDLC; Data link layer of Internet and ATM.

Medium Access Syblayer : CSMA/CD protocol, switched and fast Ethernet, token ring, FDDI, IEEE standards for LAN and MAN; satellite networks.

Unit-V

Network functions and protocols: Switching mechanism: Circuit switching, message switching, packet switching, cell switching, routing and congestion control, TCP/IP protocol architecture.

Network Applications : File transfer protocol, electronic mail, World Wide Web.

Suggested Readings:

- 1. A.S. Tanebaum: Computer Networks (4th ed.), Prentice-Hall of India.
- 2. W. Tomasi: Introduction to Data Communications and Networking, Pearson, Education.

- 3. P.C. Gupta: Data Communications and Computer Networks, Prentice-Hall of India.
- 4. Behrouz Forouzan and S.C., Fegan: Data Communications and Networking, McGraw Hill.
- 5. L.L. Peterson and B.S. Davie: Computer Networks: A system Approach, Morgan Kaufmann.
- 6. William Stalilngs: Data and Computer Communications, Pearson Education.
- 7. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-305: Object technology

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Object-Oriented Languages, Java's History, Creation of Java, Importance of Java for the Internet, Java's Magic: Byte-code, Its Features, Object-Oriented Programming in Java.

Java Program Structure and Java's Class Library, Data Types, Variables and Operators, Operator Preecedence. Selection Statements, Scope of Variable, Iterative Statement. Defining Classes & Methods, Constructors, Creating Objects of a Class, Assigning object Reference Variables, Variable this, Defining and Using a Class, Automatic Garbage Collection.

Arrays and Strings: Arrays, Arrays of Characters, String Handling Using String Class, Operations on String Handling Using, String Buffer Class.

Unit-II

Extending Classes and Inheritance: Using Existing Classes, Class Inheritance, Choosing Base Class, Access Attributes, Polymorphism, Multiple Levels of inheritance, Abstraction through Abstract Classes, Using Final Modifier, The Universal Super-class Object Class.

Package & Interfaces: Understanding Packages, Defining a package, Packaging up Your Classes, Adding Classes from a package to Your Program, Understanding CLASSPATH, Standard Packages, Access Protection in Packages, Concept of Interface.

Exception Handling: The concept of Exceptions, Types of Exceptions, Dealing with Exceptions, Exception Objects, Defining Your Own Exceptions.

Unit-III

Multithreading Programming: The Java Thread Model, Understanding Threads, The Main Thread, Creating a Thread, Creating Multiple Threads, Thread Priorities, Synchronization, Deadlocks Interthread communication, Deadlocks.

Input/Output in Java : I/O Basic, Byte and Character Structures, I/O Classes, Reading Console Input Writing Console Output, Reading and Writing on Files, Random Access Files, Storing and Retrieving Objects from File, Stream Benefits.

Creating Applets in Java: Applet Basics, Applet Architecture, Applet Life Cycle, Simple Applet Display Methods, Requesting Repainting, Using The Status Window, The HTML APPLET Tag Passing Parameters to Applets.

Unit-IV

Working with Windows: AWT Classes, Window Fundamentals, Working with Frame, Creating a Frame Window in an Applet, Displaying Information Within a Window.

Working with Graphics and Texts: Working with Graphics, Working with Color, Setting the Paint Mode, Working with Fonts,

Managing Text Output Using Font Metrics, Exploring Text and Graphics.

Suggested Readings:

- 1. The Complete Reference JAVA, TMH Publication.
- 2. Begining JAVA, Ivor Horton, WROX Public.
- 3. JAVA 2 UNLEASHED, Tech Media Publications.
- 4. JAVA 2(1.3) API Documentations.
- 5. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA - 4th Semester

MCA-401: Advanced JAVA PROGRAMMING

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Introduction to Java Scripts, Objects in Java Script, Dynamic HTML with Java Script.

XML: Document type definition, XML Schemas, Document Object model, Presenting XML, Using XML Processors: DOM and SAX. Review of Applets, Class, Event Handling, AWT Programming.

Unit-II

Introduction to Swing: Applet Handling Swing Controls like Icons – Labels – Buttons – Text Boxes – Combo – Boxes – Tabbed Pains – Scroll Pains – Trees – Tables Differences between AWT Controls & Swing Controls Developing a Home page using Applet & Swing.

Java Beans: Introduction to Java Beans, Advantages of Java Beans, BDK Introspection, Using Bound properties, Bean info Interface, Constrained properties Persistence, Customizers, Java Beans API.

Unit-III

Introduction to Servelets: Lifecycle of a Serverlet, JSDK The Serverlet API, The javax.servelet Package, Reading Servelet parameters, Reading initialization parameters. The Javax.servelet HTTP package, Handling HttPRequest & Responses, Using Cookies-session Tracking, Security Issues.

Introduction to JSP, The Problem with Servelet. The Anatomy of a JSP Page, JSP Processing. JSP Application Design With MVC Setting Up and JSP Environment: Installing the Java Software Development, Kit, Tomcat Server & Testing Tomcat.

Unit-IV

JSP Application Development: Generating Dynamic Content, Using Scripting Elements Implicit JSP Objects, Conditional Processing—Displaying Values Using an Expression to

Set an Attribute, Declaring variables and Methods Error Handling and Debugging Sharing Data Between JSP pages, Requests, and Users Passing Control and Date between Pages—Sharing Session and Application Data—Memory Usage Considerations.

Database Access Database Programming using JDBC Studying Javax.sql* package Accessing a Database from a JSP Page Application—Specific Database Actions Deploying JAVA Beans in a JSP Page. Introduction to Struts framework.

Suggested Readings:

- 1. Dietel and Nieto: Internet and World Wide Web How to Program? PHI/Pearson Education Asia.
- 2. Patrick Naughton and Herbert Schildt: The Complete Reference Java, Latest Edition, Tata Mc-Graw Hill.
- 3. Hans Bergstan: Java Server Pages.

4. Bill Siggelkow, S P D O' Reilly: Jakarta Struts, Cookbook.

- 5. Murach: Murach's beginning JAVA JDK 5, SPD.
- 6. Wang-Thomson : An Introduction to Web Design and Programming.
- 7. Knuckles: WEb Applications Technologies Concepts-John Wiley.
- 8. Sebesta: Programming world wide web, Pearson.
- 9. Building Web Applications NIIT, PHI.
- 10. Bai/Ekedaw-Thomas: Web Warrior Guide to Web Programming.
- 11. Jon Duckett: Beginning Web Programming, WROX.
- 12. Pekowsky, Java Server Pages, Pearson.
- 13. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-402: Data Warehousing & Mining

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Need for data warehouse, definition, goals of data warehouse, Data Mart, Data warehouse, architecture, extract and load process, clean and transform data, star, snowflake and galaxy schemas for multidimensional databases, fact and dimension data, Designing fact tables, Partitioning, partitioning strategy—horizontal partitioning, vertical partitioning.

Unit-II

Data warehouse and OLAP technology, multidimensional data models and different OLAP operations, OLAP Server: ROLAP, MOLAP and HOLAP. Data warehouse implementation, efficient computation of data cubes, processing of OLAP queries, indexing OLAP data.

Unit-III

Data Preprocessing, data integration and transformation, data reduction, Discretization and concept Hierarchy Generation, Data mining primitives, Types of Data Mining, Data Mining query language,

Architectures of data mining. Data generation & Summarization based characterization, Analytical characterization, Mining class comparisons, Mining descriptive statistical measures in large databases.

Mining Association Rules in large databases: Association rule mining

Mining Association Rules in large databases: Association rule mining, single dimensional Bookan association rules from Transactional DBS. Multi level association rules from transaction DBS, multidimensional association rules from relational DBS and DWS, Correlation analysis, Constraint based association mining.

Univ-IV

Classification and Prediction: Classification by decision tree induction, Back propagation, Bayesian classification, classification based in association rules, Prediction, classifier accuracy, Cluster analysis, partitioning and hierarchical methods, Denrity based methods, Grid based methods, web mining, Temporal and spatial data mining.

Suggested Readings:

- 1. W.H.Inmon: Building Data Ware House, John Wiley & Sons.
- 2. S. Anahory and D. Murray : Data Warehousing, Pearson Education, ASIA.
- 3. Jiawei Han & Micheline Kamber: Data Mining Concepts & Techniques, Harcourt India Pvt. Ltd. (Morgan Kaufmann Publishers).
- 4. Michall Corey, M. Abbey, I Azramson & Ben Taub : Oracle 8i Building Data Ware Housing, TMH.

- 5. I.H. Whiffen: Data Mining, Practical Machine Cearing tools & techniques with Java (Morgan Kanffmen)
- 6. Sima Yazdanri & Shirky & S. Wong: Data Ware Housing with oracle.
- 7. A.K. Pujari: Data Mining Techniques, University Press.
- 8. IBM An Introduction to Building the Data Warehouse, PHI, Publication.
- 9. Pieter Adriaans Dolf Zantinge: Data Mining, Addition Wesley.
- 10. David Hand, Heikki Mannila, and Padhraic Smyth: Principles of Data mining, PHI, Publication.
- 11. Anahory S., Murray D.: Data Warehousing in the Real World, Addision Wesley.
- 12. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-403: Software Engineering

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Softaware Engineering Paradigms: Software Characteristics, Software myths, Software Applications, Software Engineering Definitions, Software Process Models, Process iteration, Process activities, Computer-aided software engineering (CASE) and CASE Tools.

Software Project Management : Management activities, Project planning, Project scheduling, Risk management and activities.

Unit-II

Software Requirements Engineering: Requirements Engineering Processes, Feasibility studies Requirements elicitation and analysis, Requirement validation, Requirements management.

Software Requirements, Functional and non-functional requirements, User requirements, System requirements, Interface, specification, software requirement specification document. Specification language.

Software Metrics and Measures - Process Metrics, Project metrics, Software Project Estimation Models-Empirical, Putnam, COCOMO models.

Unit-III

Software Design Process, Principles of s/w design, Design Strategies. Levels of s/w Design, Interface Design, Coding, Software, Reuse, Computer Aided Software Engineering (CASE), CASE Tools.

Software Testing, Software Reliability, Software Safety, Defect testing, Debugging Tools.

Unit-IV

Software Maintanenace and its types, S/w Congiguration Management, S/w Reuse, Software Evolution, Software Quality Assurance—plans & activities, Software Documentation.

Suggested Readings:

- 1. Pressman: Software Engineering, TMH.
- 2. Gill N.S.: Software Engineering, Khanna Book Publishing Co. (P) Ltd. N. Delhi.
- 3. Jalote, Pankaj: An Integrated Approach to Software Engineering, Narosa Publications.
- 4. Chhillar Rajender Singh: Software Engineering: Testing, Faults, Metrics, Excel Books.
- 5. Ghezzi, Carlo: Fundaments of Software Engineering, PHI.

- 6. Fairely, R.E.: Software Engineering Concepts, McGraw-Hill.
- 7. Lewis, T.G.: Software Egineering, McGraw-Hill.
- 8. Shere: Software Engineering & Management, Prentice Hall.
- 9. Deutsch, Wills: Software Quality Engineering: A Total Technical and Management Approach, Prentice Hall.

Note: Latest and additional good books may be suggested and added from time to time.

MCA- 404: Advanced Database Systems

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

The Extended Entity Relationship Model and Object Model: The ER model revisited, Motivation for complex data types, User defined abstract data types and structured types, Object-Oriented Databases: Overview of Object-Oriented concepts, Object identity, Object structure, and type constructors, Encapsulation of operations, Methods, and Persistance, Type hierarchies and Inheritance, Type extents and quetries, complex objectsl; Database schema design for OODBMS; OQL, Persistent programming languages; OODBMS architecture and storage issues; Transactions and Concurrency control, Example of ODBMS.

Unit-II

Object Relational and Extended Relational Databases: Database design for an ORDBMS - Nested relations and collections; Storage and access methods, Query processing and Optimization; Advance Querying and Information Retrieval Decision Support Systems, Information Retrieval Systems Data Analysis and OLAP, Data Mining.

Unit-III

Parallel and Distributed Databases and Client-Server Architecture: Architectures for parallel databases, Parallel query evaluation; Parallelizing individual operations, Sorting, Joins; Distrubuted database concepts, Data fragmentation, Replication, and allocation techniques for distributed database design; Query processing in distributed database; Concurrency control and Recovery in distributed databases.

Unit-IV

Databases on Web and Semi Structured Data: Web interfaces to the Web, Overview of XML; XML Applications; The semi structured data model, Implementation issues, Enhanced Data Models for Advanced Applications; Active database concepts. Temporal database concepts; Spatial databases, Concepts and architecture; Deductive databases and query processing; Mobile databases, Geographic information systems, Multimedia databases.

Suggested Readings;

- 1. Elmasri and Navathe, Fundamentals of Database Systems, Pearson Education.
- 2. Korth, Silberchatz, Sudarshan, Database System Concepts, McGraw-Hill.
- 3. C.J.Date, Longman, Introduction to Database Systems, Pearson Education.
- 4. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-405: Visual Languages Programming

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Client Server Basics: Discover Client-Server and Other Computing Architectures, Understand File Server Versus Client -Server Database Deployment, Learn About the Two Tier Versus Three Tire Client-Server Model.

Visual Basic Building Blocks and Default Controls: Forms, Using Controls, Exploring Properties, Methods and Events, Introduction To Intrinsic Controls, Working With Text, Working With Choices, Special Purpose Controls.

VB Advance Controls : Events, Menu bar, Popup Menus, Tool bar, Message box, Message Box, Input Box, Built-in Dialog Boxes, Creating MDI, Working with Menus.

Unit-II

VB Programming Fundamentals and Variables : Introduction to Variables, Variable Declaration. Arrays, Introduction to Constants And Option Explicit Statement, Assignment Statements, Working With Math Operations, Strings, Formatting Functions.

Controlling And Managing Program: All Control Statement, Loops, Error Trapping, Working With Procedures, Functions, Controlling How Your Program Starts, Common controls and control arrays: Introduction to common controls: Treeview, listview, tabstrip Creating and working with control arrays.

Visual Basic and databases : Understanding the Data Controls and Bound Controls, Introduction to Data Form Wizard, Introduce DAO, Working With Recordsets, Record Pointer, Filter, Indexes, Sorts And Manipulation of Records.

Unit-III

Remote And ActiveX data Objects: Working with ODBC, Remote Data Objects And Remote data Control, Introducing ADO, ADO Data Control, Using DataGrid Control And ActiveX Data Objects.

ActiveX Controls, Extending ActiveX Controls And Classes: Creating, Testing, Compiling, Enhancing and User Drawn ActiveX Controls, Using ActiveX Control Interface Wizard And Property Pages Wizard, Introducing Ambient, Extender Objects, Creating Property Pages, Building Class Modules, ActiveX DLL.

Unit-IV

Client-Server Development Tools : COM, Services Models, Development Tools Included with VB 6, Working With Source Safe Projects Reports And Packaging : Data Reports And Crystal Reports, Packaging A Standard EXE Project.

VB And Internal : Introduction to VBScript, Tools used with VBScript and VBScript Languages, Introduction to Active Server Pages, ASP Objets.

Suggested Readings:

- 1. McBride, P.K.: Programming in Visual Basic, BPB Publ.
- 2. Holzner Steven: Visual Basic Programming, IDG Books India Ltd.
- 3. Artiken: Visual Basic for Programming Explorer, Comdex.
- 4. Visual Basic 6 Client/Server How-To
- 5. Using Visual Basic 6.
- 6. Any other book(s) covering the content of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA - 5th Semester MCA- 501 : Advanced Technology

Max. Marks: 75 Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Basic of the .net framework : .net acrhitecture, managed code, assemblies, CLR, Execution of assemblies code, IL, JIT, .NET framework class library, common type system, common language specification, introperability with unmanaged code.

Unit-II

Introduction to V.B. Net and C#:

VB.Net: Net features, DAta Types

C#: Data Types, Operators, Garbage Collection, Jagged Array, Collection (Array list, Hash table), Indexer (one Dimension) and property, Delegates and events (Multicasting, Multicasting Event). Exception Handling.

Unit-III

ADO.Net & Object Oriented Concepts (Using VB.net or C#) Basic window control, Architecture of ADO.Net, Comparison with ADO, .Net Data provider, Data Adapter, Data Set, Data Row, Data Column, Data Relation, command, Data Reader, Data Grid Constructor, Destructor, Abstraction, Interface, polymorphism (Over loading and over ridding).

Unit-IV

ASP. Net: Anatomy of ASP. NET Page, Server Controls: label, dropdown list box, validation controls, list box, text box, radio button, check box, State Management: session caching, Authentication (window,.Net Passport, Forms Based), Authorization, web services, Advance Grid Manipulation.

Suggested Readings:

- 1. Jeffrey Richter, Francesco Balena: Applied .Net Framework Prog. In MS VB. Net, TMH Publications.
- 2. Herbert Schildt: Complete Reference C#, TMH Publication.
- 3. Michael Halvorsan: Microsoft Visual Basic.NET step by step, PHI Publication.

- 4. G. Andew Duthie: Microsoft ASP. Net With C#. Net step by step, PHI Publication.
- 5. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-501: Software Testing & Quality Assurance

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Software Testing and the related concepts: significance and potential; Testability and features of Test cases.

Software Testing techniques; WBT, BBT, Ticking Box testing; static analysis, symbolic testing, program mutation testing, input space, partitioning, functional program testing, data flow guided testing.

Unit-II

Software Testing Strategies: Approach, Issues, integration, incremental, System, alpha, Beta testing etc; Comparative evaluation of techniques: Testing tools; Dynamic analysis tools, test data generators, Debuggers test drivers etc.

Technical Metrics for Software: Quality Factors, framework; Metrics for analysis, design, testing source code etc.

Unit-III

Object Oriented Testing: OOT strategies and issues, Test Case design, interface testing.

Software Quality Assurance: concept, importance and essence; FTR, structured walk through technique etc.

Unit-IV

SW Reliability, validation, Software Safety and Hazards Analysis; Features affecting software quality, SQA Plan.

Using project management software tools, Quality management, issue, standard and methods. ISO Quality models: ISO 9000 and SEI-CMM and their relevance.

Suggested Readings:

- 1. Meyers, G.: The art of Software Testing, Wiley-Inter Science.
- 2. Deutsch, Willis: Software Quality Engineering: A Total Technical and Management Approach, Prentice Hall.
- 3. Pressman: Software Engineering, TMH.
- 4. Gill N.S.: Software Engineering Realiability, Testing and Quality Assurance, Khanna Book Publishing Co. (P) Ltd, N. Delhi.
- 5. Ghazz, Carlo: Fundaments of Software Engineering, PHI.
- 6. Chhillar Rajender Singh: Software Engineering: Testing, Faults, Metrics, Excel Books.
- 7. Jalote, Pankaj : An Integrated Approach to Software Engineering, Narosa Publications.
- 8. Doug Bell, Ian Murrey, John Pugh: Software Engineering-A Programming Approach, Prentice Hall.
- 9. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-503: Windows Programming & Visual C++

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Introdution to Windows Program. Message processing in Windows Programming. Message boxes, Menu and Accelerators. Dialog Box. Creating Icons, Cursor and Bitmaps.

Introduction to Child Window Controls. Check boxes, Static control, Radio Buttons, Scroll bars, Advance Window Controls: Toolbars up down controls, Spin control, Progress bar, Tree view, Tab controls, Text and Font.

Unit-II

Working with Graphics, Consoles, Multitasking Process and Threads Clipboard Drag and Drops, Advance features of Windows Programming GDI Metafiles, Sound API, DLL.

Unit-III

Visual C++ Basic: Introduction, Building a Basic Application, SDI and MDI, View Document Architecture Using Microsoft Foundation Class (MFC) Library, Visual C++ Resources: Application Wizard, Acceleators and Menus, Toolbars.

Unit-IV

Visual C++ And Database Management: MFC programming without View Document Architecture, Data Access Objects (DAO) versus Open Database Connectivity (ODBC), Database building Overview, Building a Database Application using ODBC, Building a Database Application Using.

Suggested Readings:

- 1. Charles Petzold: Windows Programming, Microsoft Press.
- 2. Herbett Schildts: Windows Programming, TMH.
- 3. Murray: VC++, TMH.
- 4. Steve Holzner: Introduction to VC++.
- 5. Any other book(s) covering the contents of the paper in the depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-504: Soft Computing

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

Introduction: Introduction to soft computing; introduction to biological and artificial neural network; introduction to fuzzy sets and fuzzy logic systems.

Introduction to Genetic Algorithm, Genetic Operators and Parameters, Genetic Algorithms in Problem Solving, Theoritical Foundations of Genetic Algorithms, Implementation Issues.

Unit-II

Artificial neural networks and applications: Different artificial neural network models; learning in artificial neural networks; neural network applications in control systems. Neural Nets and applications of Neural Network.

Unit-III

Fuzzy systems and applications: Fuzzy sets, fuzzy reasoning; fuzzy inference systems; fuzzy control; fuzzy clustering; applications of fuzzy systems.

Neuro-fuzzy systems: neuro-fuzzy modeling; neuro-fuzzy control.

Unit-IV

Applications: Pattern Recognitions, Image Processing, Biological Sequence Alignment and Drug Design, Robotics and Sensors, Information Retrieval System, Share Market Analysis, Natural Language Processing.

Suggested Readings:

- 1. M. Mitchell: An Introduction to Genetic Algorithms, Prentice-Hall.
- 2. J.S.R. Jang, C.T. Sun and E.Mizutani: Neuro-Fuzzy and Soft Computing, PHI, Pearson Education.
- 3. Timothy J. Ross: Fuzzy Logic with Engineering Applications, McGraw-Hill.
- 4. Davis E. Goldberg: Genetic Alorithms: Search, Optimization and Machine Learning, Addison Wesley.
- 5. S. Rajasekaran and G.A.V. Pai: Neural Networks, Fuzzy Logic and Genetic Algorithms, PHI.
- 6. D.E. Goldberg: Genetic Algorithms in Search, Optimization, and Machine Learning, Addison-Wesley.
- 7. Z. Michalewicz : Genetic Algorithms + Data Structures = Evolution Programs, Spinger-Verlag.
- 8. N.K. Sinha & M.M. Gupta (Eds): Soft Computing & intelligent Systems: Theory & Applications, Academic Press.
- 9. M.T. Hagan, H.B. Demuth, And M. Beale: Neural Network Design, Thompson Learning.
- 10. C. Lau (Ed.): Neural Networks, IEEE Press.
- 11. J. Freeman and D. Skapura: Neural Networks: Algorithms, Applications and Programming Techniques, Addition-Wesley.
- 12. G.J. Klir and T.A. Folger: Fuzzy Sets, Uncertainly, and Information, PHI.
- 13. A. Konar: Computational Intelligence Principles, Techniques and Applications, Springer.
- 14. Kishan Mehrotra, Chilukuri K. Mohan and Sanjay Ranka: Elements of Artificial Neural Networks, Penram, Mumbai.

- 15. J.S.R. Jang, C.T. Sun, E, Mizutani: Neuro-Fuzzy and Soft Computing: A Computational Approach to Learning and Machine Intelligence, Prentice Hall.
- 16. Mitchell, Melanie: An Introduction to Genetic Algorithms, PHI.
- 17. Any other book(s) covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

MCA-505: Computer Security

Max. Marks: 75

Time: 3 hrs.

Note: There shall be 8 questions in all, 2 from each Unit and carrying equal marks, and the candidate will be required to attempt 5 questions in all selecting at least one from each Unit.

Unit-I

The Security Problem in Computing: The meaning of Computer Security, Computer Criminals, Methods of Defense, Elementary Cryptography: Substitution Ciphers, Transpositions, Making "Good" Encryption Algorithms, The Data Encryption Standard, The AES Encryption. Algorithm, Public Key Encryptions, Uses of Eneryption.

Unit-II

Program Security: Secure Programs, Non-malicious Program Errors, viruses and other malicious code, Targeted Malicious code, controls Against Program Threats, Protection in General-Purpose operating system protected objects and methods of protection, File protection Mechanisms, User Authentication Designing Trusted O.S: Security polices, models of security, trusted O.S. design, Assurance in trusted OS, Implementation examples.

Unit-III

Data bas Security: Security requirements, Reliability and integrity, Sensitive data, Inference, multilevel database, proposals for multilevel security.

Security in Network: Threats in Network, Network Security Controls, Firewalls, Intrusion Detection Systems, Secure E-mail.

Unit-IV

Administering Security: Security Planning, Risk Analysis, Organizational Security policies, Physical Security. Legal Privacy and Ethical Issues in Computer Security.

Protecting Programs and data, Information and the law, Rights of Employees and Employers, Software failure, Computer Crime, Praia, Ethical issues in Computer Security, Case studies of Ethics.

Suggested Readings:

- 1. P. Pfleeger, Shari Lawrence Pfleeger Charles : Security in Computing, PHI.
- 2. William Stallings: Cryptography & Network Security, Pearson Education.
- 3. Charlie Kaufman, Radia Perlman, Mike Speciner: Network Security, Private communication in a public world, PHI.
- 4. Douglas R. Stinson: Cryptography Theory and Practice, CRC Press.
- 5. Bruce Schneier, Niels Ferguson: Practical Cryptography, Wiley Dreamtech India Pyt. Ltd.
- 6. Any other book(s) Covering the contents of the paper in more depth.

Note: Latest and additional good books may be suggested and added from time to time.

Soft Skils -I (MCA-108) & II (MCA-208)

To develop following skills by way of self-study, student seminars, workshops, Extensions Lecturers, etc.

Communication Skills

Presentation Skills

Behavioral Skills

Active Listening

Body Language

Managerial Skills

Group Working Culture Skills

Giving and Receiving Feedback

• Head of the Department/Director/Principal shall assign the task of assessment of soft skills of students to Faculty Member(s) and each student will be evaluated on the basis of the soft skills and shall award marks out of 25 for each student as Inernal Assessment.

Minor Project - I (MCA-408) & II (MCA-508) (Guideline for Minor Project)

- The aim of the Minor Project(s) is to lay a foundation for Major Project to be carried out by the student during 6th Semester of MCA Programme.
- Each student should carry out Minor Project(s) using the software development tools/languages/technologies that they have learnt and/or have studied during the conerned semester.
- It should be compulsorily done by the student in-house under the supervision of the staff(s) assigned by Head of the Department/Director/Principal.
- The Minor Project(s) will be assessed by the concerned supervisor(s) and shall award marks out of 25 for each students as Internal Assessment.
