A lot of modern medicine is concerned with promotion of good health. Many patients as well as many physicians pay very little attention to health; but very much attention to health makes some people imagine that they are ill. Our great concern with health is shown by the medical columns in newspaper, the health articles in popular magazines and the popularity of the television programme and all those books on medicine we talk about health all the time. Yet for the most only result is more people with imaginary illnesses. The healthy man should not be wasting any time talking about health, he should be using health for work, the work he does and the work that good health makes possible.

**Passage – II
(Question Nos. 156-165)**

Time was when people looked heavenward and prayed, "Ye Gods, given us rain, keep drought away," Today there are those who pray. "Give us rain, keep El Nino away."

El Nino and its atmospheric equivalent, called the Southern Oscillation, are together referred to as ENSO, and are household words today. Meteorologists organize it as often being responsible for natural disaster worldwide. But this wisdom dawned only after countries suffered, first from the lack of knowledge, and then from the lack of coordination between policy making and the advance in scientific knowledge.

Solved Paper

Put simply, El Nino is a weather event restricted to certain tropical shores, especially the Peruvian coast. The event has diametrically opposite impacts on the land and sea. The Peruvian shore is a desert. But every few years, an unusually warm ocean current – El Nino – warms up the normally cold surface-waters of the Peruvian coast, causing very heavy rains in the early half of the year.

And then, miraculously, the desert is matted green. Crops like cotton, coconuts and banana grow on the otherwise stubbornly barren land. These are the Peruvians' *anos de abundancia* or years of abundance. The current had come to be termed El Nino, or the Christ Child because it usually appears as an enhancement if a mildly warm current that normally occurs here around every Christmas.

But this boon on land is accompanied by oceanic disasters. Normally, the waters off the South American coast are among the most productive in the world because of a constant upswelling of nutrient rich cold waters from the ocean depths. During an El Nino, however waters are stirred up only from near the surface. The nutrient-crunch pushes down primary production, disrupting the food chain. Many marine species, including anchoveta (anchovies) temporarily disappear.

This is just one damming effect of El Nino. Over the years its full impact has been studied and what the Peruvians once regarded as manna, is now seen as a major threat.

Passage – IV
(Question Nos. 176-180)

Authors William Strauss and Neil Howe are known for their theories about cycles of generations in American history. They refer to each cycle of four generations as a constellation, and they posit that each constellational era corresponds to “recurring types of historical events” and moods. They state that adjacent generations do not live similar lives, and that each generation ages as a singular cohort as time moves forward. According to Strauss and Howe, each generation is comprised of people who possess (1) common age (2) common beliefs and (3) perceived membership in the same generation. A generation is approximately 22 years in length. Since a lifetime may reach 80-90 years, members of 4 generations are alive at one time. The four generational archetypes identified by Strauss are Idealist, Reactive, Civic and Adaptive. Idealist are “increasingly indulged youth after a secular crisis,” who cultivate principle rather than pragmatism in midlife, and emerge as “visionary elders.” Reactives grow up “Under protected and criticized youths during a spiritual awakening,” mature into risk taking adults, mellow into “pragmatic midlife leaders during a secular crisis,” and become reclusive elders. Civics grow up “increasingly protected youths after a spiritual awakening,” become “a heroic and achieving cadre of young adults,” build institutions as midlifers, and “emerges as busy midlifers, attacked by the next spiritual awakening.”

Adaptive grow up as "overprotected and suffocated youths during a secular crisis," become "risk-average, conformist rising adults," mature into "indecisive arbitrator leaders during a spiritual awakening," and become sensitive elders.

176. What is the assumption made by Strauss and Howe?

- (A) Alternate generations live similar lives.
- (B) Four generation co-exist at one and the same time.
- (C) The cycles of generations share some common features and moods.

177. What is the dissimilarity between adjacent generations?

- (A) Adjacent generations do not live similar lives.
- (B) Each generation focuses on its specific traits.
- (C) Adjacent generations are not influenced by each other.
- (D) Adjacent generations are not in touch with each other.

- (A) Idealist are one generation younger than the Reactives
- (B) Adaptives are elders when Civics are midlifers.
- (C) When Reactives are adults, Civics are youths.
- (D) Reactives are one generation younger than the Civics.

179. According to the passage, what happens to the Civic generation at its members enter midlife?

(A) It is attacked by Idealists who are coming of age.

**Passage – VI
(Question Nos. 186-190)**

The environment comprises all the physical, social and cultural factors and conditions influencing the existence or the development of

an organism. Due to indiscriminate industrialization, man has created a state of decadence. He has continuously tampered “with nature which has resulted in the threat to the sustenance of mankind. Although, attempts have been made to restore nature to its previous state of purity and serenity, the efforts have not been whole-hearted.

Earth is the home we all share and would pass on to our future generations as their legacy. But if they inherit the present state of the world, they would be unable to sustain themselves. Man has steadily improved the technologies and other means necessary for higher production of wealth and for the availability of devices that could give more physical and mental pleasures. The industrial revolution led to a drastic escalation of earth's surface temperature. Man exploited nature for his benefits, without any foresight as to what the implications of his actions would be. Indiscriminate industrialization resulted in urban migration as the rural poor settled in cities in search of opportunities. Cities, already facing a population crisis could not accommodate the migrants and this led to the development of slums. This had resulted in increased pressure on the available resources and further degradation of the environment.

186. A state of decadence has come about because of
- (A) Indiscriminate exploitation of resources
 - (B) Due to half-hearted attempts
 - (C) Natural disasters
 - (D) None of the above

Passage – VII
(Question Nos. 191-195)

A hybrid vehicle is a vehicle which uses two or more kinds of propulsion. Most hybrid vehicles use a conventional gasoline engine as well as an electric motor to provide power to the electric motor to provide power to the vehicle. These are usually called hybrid-electric-vehicles, or HEVs. Hybrids use two types of propulsion in order to use gasoline more efficiently than conventional vehicles do. Most hybrid vehicles use the gasoline engine as a generator which sends power to the electric motor. The electric motor then power the car. In conventional vehicles, the gasoline engine powers the vehicle directly. Since the main purpose of using a hybrid system is to efficiently use resources, most hybrid vehicles also use other efficient systems. Most hybrid vehicles have regenerative braking systems. In conventional vehicles, the gasoline engine powers the brake, and the energy used in braking is lot. In regenerative braking system, the energy lost in braking is sent back into the electrical battery for

use in powering the vehicle. Some hybrid vehicles use periodic engine shutoff as a gas-saving feature. When the vehicle is in idle, the engine temporarily turns off. When the vehicle is put back in gear, the engine comes back on. Some hybrids use tires made of a stiff material which rolls easily and prevents drag on the vehicle. Since hybrid vehicles use less gasoline than conventional vehicles, they put fewer emissions into the atmosphere than conventional vehicles do. As hybrids become more popular, conventional vehicles are being used less, and the level of emissions being put into the air is decreasing. Hybrid vehicles are an example of an energy-efficient technology that is good for both consumers and the environment.

191. Two kinds of propelling forces used by hybrid vehicles are
 (A) elective motor and power
 (B) electric engine and generator
 (C) gasoline engine and electric motor
 (D) electrical battery and gasoline
192. The difference between hybrid and conventional vehicle is that
 (A) Hybrids are heavier as compared to conventional ones.
 (B) Hybrids do not used electric motors while conventional ones do.
 (C) Hybrids use gas while conventional vehicles use petrol.
 (D) Hybrids use two types of propulsions while conventional rely on one.
193. Why do HEVs use two types of propulsions?
 (A) To go faster.
 (B) To use gasoline efficiently.
 (C) To provide a comfortable ride.
 (D) To become environmental friendly.

Solved Paper

194. 'Regenerative' most closely means;
(A) Restorative (B) Electric

195. In the context of the passage which of the following best articulates how the author regards the topic?
(A) Conventional vehicles may be more powerful than hybrid vehicles but hybrid vehicles are more socially responsible.
(B) Since hybrid vehicles use less gasoline and put fewer emissions into the atmosphere, they are better for the environment.
(C) Hybrid vehicles are less expensive, so they are a smarter buy than conventional vehicles.
(D) Conventional vehicles are faster but hybrid vehicles are better for the environment.

**Passage – VIII
(Question Nos. 196-200)**

If you are a poet, you will see carefully that there is cloud floating in this sheet of paper. Without a cloud there will be no rain: without rain, the tress cannot make paper. The cloud is essential for the paper to exist. If the cloud is not here, the sheet of paper cannot be here either. So we can say that the cloud and the paper inter-are If we look into this sheet of paper even more deeply, we can see the sunshine in it. If the sunshine is not there, the forest cannot grow. In fact, nothing can grow. Even we cannot grow without sunshine. And so, we know that the sunshine is also in this sheet of paper. The paper and the sunshine inter-are.

And if we continue to look, we can see the logger who cut the tree and brought it to the mill to be transformed into paper. And we see the wheat. We know that the logger cannot exist without his

daily bread, and therefore the wheat that became his bread is also in this sheet of paper. And the logger's father and mother are in it too. When we look in this way, we see that without all of these things, this sheet of paper cannot exist.

Looking even more deeply, we can see we are in it too. This is not difficult to see, because when we look at a sheet of paper, the sheet of paper is part of our perception. Your mind is in there and mine is also. So we can say that everything is in here with this sheet of paper. You cannot point out one thing that is not here – time, space, the earth, the rain, the minerals in the soil, the sunshine, the cloud, the river, the heat. Everything co-exists with this sheet of paper. This is why I think the word inter – be should be in the dictionary, "To be" is inter-be. You have to inter-be with every other thing. This sheet of paper is, because everything else is.

196. A poet sees a cloud in a sheet of paper is
(A) he/he is very creative
(B) he/she loves nature
(C) he/she writes poetry on paper
(D) he/she sees the universe as a single entity
197. A cloud and the paper inter-are means
(A) both are very important
(B) both exist because of the other; they are interrelated
(C) a cloud exists on its own
(D) everything in this world is separate
198. Why can't the logger exist without his bread?
(A) He will die without food
(B) He can't grow wheat
(C) Without cutting trees he can't earn money; can't buy his meals
(D) There won't be enough trees to cut

199. The theme of the comprehension is
 (A) Everything co-exists in nature
 (B) Don't harm anybody
 (C) Inter-are and inter-be
 (D) Very confusing
200. Why does the writer think that the word 'inter-be' should be in the dictionary?
 (A) Because he didn't find this word in the dictionary
 (B) Because he is a linguist
 (C) Because he is interested in new words
 (D) Because our very existence is defined by this term
